BROWNING. THE BEST THERE IS.

BROWNING. THE BRAND

The Browning brand is about the genius of a man born 160 years ago in a small town in the American West. John Moses Browning began inventing at an early age. He had a prolific mind, and revolutionised firearms design time and time again.

From the Auto-5 and the B25 to the BAR and more, every one of his designs is a milestone; every work he created is a source of inspiration for future generations. Excellence has to follow a legacy like this.

Now, as always, every shotgun, rifle, ammunition and item of equipment made by Browning undergoes a mandatory series of stringent tests so that you can be confident in the knowledge that they are reliable, high-performing and built to withstand the ravages of time.

THE PERFORMANCE

The quality of a firearm, of ammunition and the effectiveness of an item of clothing are down to observation, talent and hard work; three creative cornerstones that mean as much to Browning as its early legacy. The confidence that the Buckmark brand inspires can be traced directly to the people behind the name, and their attentiveness and desire to deliver the right solutions — our deeply held values.

> Hunters and sports shooters alike are sure to find a Browning product that will take their passion to a new level.

The only thing that matters out shooting, in a hide, woodland or upland stalking, at the clay pigeon stand or in front of the target is the excitement that grips us when all the conditions are just right for turning great times into unforgettable memories.

So let us help you give it your best shot...

OUR VALUES

There is one devastatingly simple target that never leaves our sights: to bring you the best. Our teams are relentless in applying their technical expertise and aesthetic acumen to find new ways of making our current guns, ammunition and other equipment even better.

Because our engineers have a passion for our sport and a deep understanding of the challenges that face you while shooting or stalking, they bring all their personal experience to the solutions they devise and develop.

This continual fine-tuning, this increasingly meticulous scrutiny to detail ultimately makes all the difference — these are Browning's signature touches, its distinctive hallmark among other manufacturers, the proof of its commitment to delivering ever-higher performance.

BROWNING

OUR PLEDGE

Every shooter should be able to purchase the equipment they need and which is right for them, whatever their budget and goals, regardless of whether they follow the latest technological innovations or succumb to the charms of the eternal classics, are or would like to be discerning amateurs, recent converts or old hands.

This is our belief. This is our pledge. Browning has always adhered to this mindset when developing its product lines. The quality of our products is a true reflection of the exacting demands that drive us. What unites us is our pride.

The guns that leave our factory come with a ten-year warranty and a blend of reliability, sturdiness and effectiveness. From manufacturing to fitting and testing, and on to finishing, they each underline the uniqueness of a brand devoted to shooters who are driven by passion.

John M. Browning

The B15, the shotgun the Browning faithful have been waiting for, was developed in 2015, 90 years after the B25 changed the gun world forever. Like its illustrious predecessor, the hand-finished B15 was developed and refined by the gunsmiths at the Fabrique Nationale in Herstal. That means you can expect balance and reliability. You can also expect precision engineering and the finest of aesthetic finishes. The B15 is available in four grades with a choice of exceptional engravings and wood quality.

Four years after it was developed, the B15 is now available in 20-gauge models.

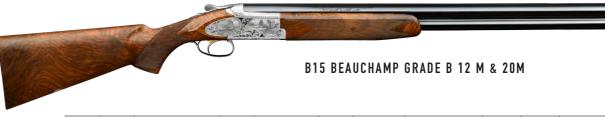

The engravings feature slight variations from the 12-gauge models, but the same DNA can be seen in the hunting scenes
on grades B and D and the chimæra on grades C and E. And the philosophy is unchanged: sophisticated efficiency.

True shotgun connoisseurs will be won over by the B15, appreciating its style for sure, but enjoying the technical quality even more.

John Moses Browning devoted his entire life to guns. That story continues today in the John M. Browning Collection, which duly bears the two hallmarks of his talent: groundbreaking mechanical systems and the handmade custom finish you want. He left a huge impression on the world of gunmaking, and on the gunmaker to which he gave his name. You will find the same devoted spirit lives on today in Belgium.

SHOOTER AND GUN AS ONE

The B725 Pro range has been designed to provide a perfect gun fit whether you're shooting Sporting or Compak. The advanced engineering of its adjustable comb, cutting-edge recoil pad and Invector DS™ Extended chokes are further enhanced by the groundbreaking Pro Balance System that lets you redistribute the weight of the stock and barrels to fine-tune the gun's balance just the way you want it.

Every day, clayshooters are adding to the reputation for excellence of Browning sporting shotguns, which combine outstanding performance with reliability.

The new B725 Pro Master joins the Pro Sport and Pro Trap models in the B725 Pro range. This hybrid Sporting/Trap gun is adjustable for a better body fit and comes with a wide range of accessories to help you exceed your goals.

INTERCHANGEABLE RECOIL PADS

The B725 Pro range is supplied with interchangeable 15mm or 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficult.

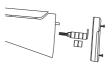

BARREL COUNTERWEIGHT

The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20mm forwards.

STOCK COUNTERWEIGHT

The Pro Balance System allows shooters to finetune the balance points for a perfect mount and swing. Adding counterweight to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance due to the optimal length of 80mm, the exclusive internal shape and patented gas seal segment.

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use, guaranteeing that a second shot can be fired whatever the circumstance.

6

BACK-BORED™ VECTOR PRO™ BARREL

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

All Browning shotguns are designed, tested and proofed for steel shot.

Browning International is proud to support high-level shooters. They are part of the big family of Browning sport shooters and stand by the reliability, accuracy, and technical superiority of our products. As brand ambassadors, they stand out not only for their achievements but also for their sportsmanship. Browning is also one of FITASC's main partners and participates in FITASC's International Championships with quality technical assistance.

BASTIEN HAVART WORLD SPORTING CHAMPIONSHIP 2022 ULTRA XS PRO ADJUSTABLE

MIROKU MK38 SPORTER G5

STYLE AND TECHNIQUE IN PERFECT BALANCE.

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which — we are proud to repeat — makes it the most outstanding over-and-under shotgun on the market. This B725 is supplied with an adjustable comb that lets you alter the drop and cast the way you want it. You can also adjust the gunstock with mm precision for accurate aiming. The gunstock is also ready to accommodate counterweights.

INFLEX™ II RECOIL PAD

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32mm thick (available as an option), make it easy to adjust the length of your stock.

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

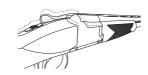

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

LOW ACTION FRAME

The low action frame provides the following benefits when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manœuvrability and effectiveness when shooting.

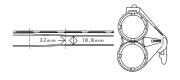

ACTION FRAME GUARANTEED FOR TEN YEARS.

BACK-BORED™ VECTOR PRO™ BARREL

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

B725 SPORTER OVER-AND-UNDER COMPATIBLE

NO-ONE IS LEFT OUT: TRUE LEFT HAND!

Products for left-handed shooters don't always match demand in the gunmaking world. Browning, as an iconic brand, is determined to make a difference. Many of our Browning guns, such as the BAR, Maral, X-Bolt, T-Bolt, etc, are now designed for left handers.

Some of our over-and-unders are also available in left-handed versions. Our B525 and B725 for left-handed shooters are stocked for shouldering on the left so that they can mount their guns as comfortably as right-handed shooters.

But the top lever has always been designed for righthanders. Browning now offers "true left-hand" models! The name says it all. The gun is opened by pushing the top lever to the left rather than the right, allowing left-handed shooters to operate the gun instinctively and improve their performance, all for the same price!

LEAD-FREE COMPATIBLE

A NEW DESIGN ON EXCELLENCE.

This year, we are making a whole series of improvements to the B525 Sporter that bring out its inherent qualities that little bit more.

The barrel has been matted to cut down on reflections from the sun. The grey trigger is adjustable while the action frame bears a new engraving that is understated yet appealing. The stock is counterweight-ready. The B525 Sporter comes with a 12 mm Inflex II recoil pad.

Now you can lengthen the stock easily by adding a thicker recoil pad.

All Browning shotguns are designed, tested and proofed for steel shot.

ENGRAVING B525 SPORTER 1

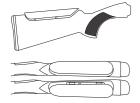

In July 2019, Sam Green and his Ultra XS became FITASC World Sporting Clays Champion. It is supplied with eight Invector Titanium extended chokes, two spacers, three Inflex™ recoil pads and three trigger shoes. The Ultra XS Pro Adjustable Comb can thus be balanced on demand thanks to a clever weight and counterweight system (gunstock and barrel).

The Ultra XS Pro Adjustable Comb is equipped with an adjustable cheek-piece and a trap fore-end. Its technical innovation in no way impairs its elegance, as can be seen in the new engraving decorating its action frame and the grade 4 wood with oiled finish.

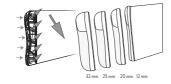

ADJUSTABLE COMB

The Pro Fit adjustment system lets you position the comb just where you need it and use the adjustment screw to trim the drop and cast. Easily visible markings take the quesswork out of adjusting or refitting the comb after removal.

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32mm thick (available as an option), make it easy to adjust the length of your stock.

INVECTOR-PLUS™ EXTENDED CHOKES MIDAS

Adjustable Invector-Plus™ Extended chokes Midas have been specially developed for our Back-bored™ barrel system. They have been designed to obtain 'a perfect target' at different shooting distances. Depending on the Browning choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting (Cyl = 15m, 1/4 Choke = 20m,1/2 Choke = 25m, 3/4 Choke = 30m).

STAY AHEAD OF THE GAME!

Cynergy gives you the lowest action frame on the market (60mm) and the fastest firing system (0.0019 seconds).

Cynergy is also aesthetically modern and attractive, an innovative design carried by trim, fine contours and a slender outline.

The composite stock and fore-end make the Cynergy shotgun significantly light and rugged.

Finally, the Cynergy's Back-bored™ barrels are also suited to high-performance steel shot shells.

ACTION FRAME: 60MM, THE LOWEST ON THE MARKET

The exclusive integrated hinge system gives an ultralow action frame, which has the advantage of making it a natural extension of the shooter.

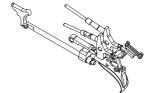

10-YEAR ACTION FRAME WARRANTY.

FAST FIRING SYSTEM: 0.0019 SECONDS

The specific striker mechanism on this shotgun cuts the time between the first and second shots to just 0.0019 seconds, compared to 0.0031 seconds for its nearest rivals.

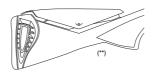

INNOVATIVE DESIGN

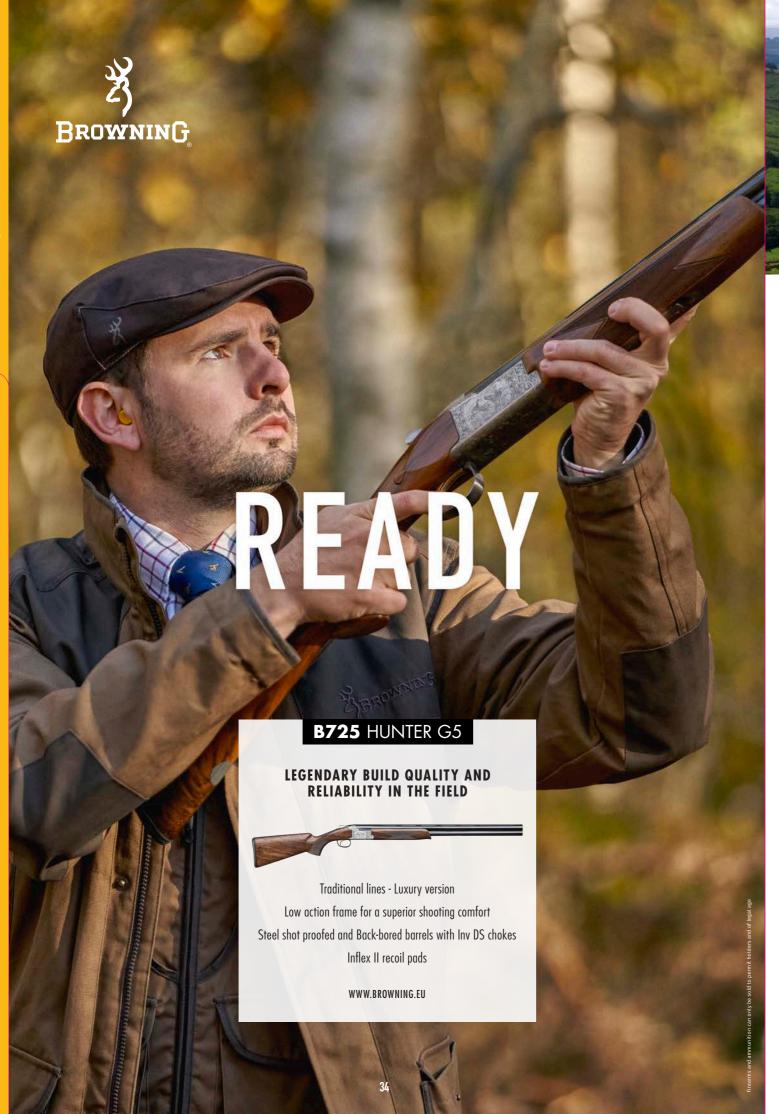

The exclusive structure of this pad absorbs 1.5 to 2 times more recoil than a conventional pad.

The stock length can be adjusted easily and efficiently by 32mm with three recoil pads and an insert.

MAKE YOUR GUN CORRESPOND TO YOUR PHYSIQUE.

BROWNING® PROPOSES THE VERY ULTIMATE TO YOU BY OFFERING TO ADAPT YOUR GUN TO YOUR PERSONAL SIZE.

This service is for persons who are tall, short, with broadshoulders, beginners or just demanding users, as BROWNING® has made a gun that is the perfect tool for your passion.

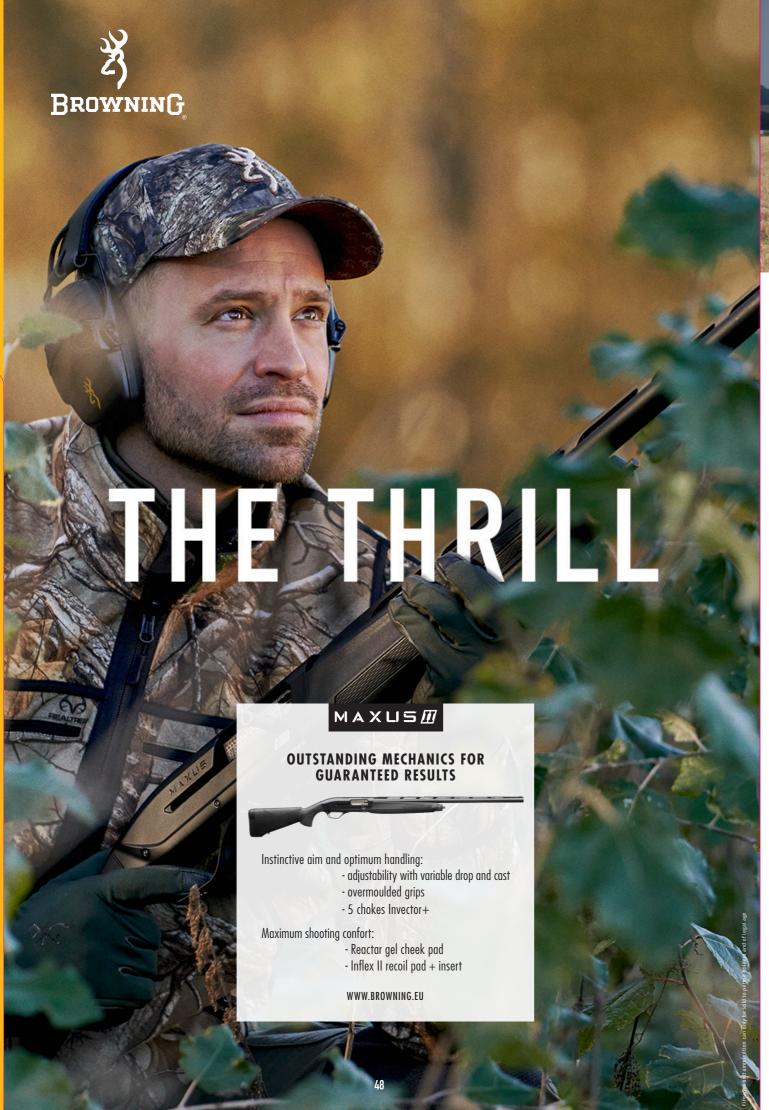

The stock can be adjusted by altering 3 important criteria: Its length, its pitch or even a version for left-handers. See the 3 pictograms summarizing the options available for stocks, all the way through the catalogue.

THE MAXUS II – MEETING HUNTERS' EXPECTATIONS. EASY HANDLING. FAST AIMING AND COMFORTABLE SHOOTING.

The Maxus II is made for shooters and hunters who refuse to compromise. Performance is your motto, and the conditions don't matter.

Reliability is not up for negotiation; it's a dealmaker. Your gun has to meet your standards, not the other way round.

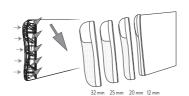

Your Maxus II is the tool that builds your success. The range just got better with three wood models.

1

INFLEX™ TECHNOLOGY

Much more than a recoil pad in a recoil-absorbing material, the Inflex™ II has been designed with an internal structure that lowers the gunstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

4

MAGAZINE CUT-OFF

All our Maxus guns are fitted with a magazine cut-off for unloading and replacing the chambered shell with a new load without having to cycle the new shell from the magazine.

SPEED LOADING AND UNLOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades. Our patented Speed Load Plus system chambers the first round straight from the magazine, and unloads quickly without having to run the bolt to chamber each shell.

5

POWER DRIVE GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. A 20% increase in the piston run increased makes it even more reliable with light charges.

The system works with loads of 24g to 64g.

BARREL ASSEMBLY

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

TECHNICAL SPECIFICATIONS:

INVECTOR-Dus

All Browning shotguns are designed, tested and proofed for steel shot.

Before we developed this virtuoso gun for waterfowling and hunting in open country, we conducted an extensive survey to find out exactly what hunters want. The results show that they are looking for a semi-auto shotgun that offers exceptional performance, especially when it comes to handling, comfort, versatility and ergonomics.

1

EASY HANDLING, FAST AIMING AND COMFORTABLE SHOOTING

- Fully adjustable stock. The drop and cast of the Maxus II can be altered using the six spacers included in the box, as well as the 7 mm stock insert and 32 mm Inflex II recoil pad. A 12 mm insert and 12, 20 and 25 mm recoil pads are also available to buy.
- Full comfort stock. The Inflex II is one of the best performing recoil pads on the market, directing the force of the recoil downwards and away from the shooter's cheek. The stock also features a Reactar gel cheek piece for even better face protection, especially when firing high-gram cartridges.
- Fully balanced gun. The perfect balance of the Maxus II will give you an even more natural swing!

ERGONOMIC

 Everything's in hand. Overmoulded forearm and pistol grips keep the gun securely in your hand even when it's raining. The oversized bolt handle and trigger guard make the Maxus II easy to handle, even with gloves on.

VERSATILE

 All-terrain gun. If you're a wildfowler who shoots from long range, or you like to shoot sporting clays with friends, the Maxus II delivers outstanding performance in any setting. This new reference in semi-automatic shotguns comes with 5 Invector+ chokes for your every need.

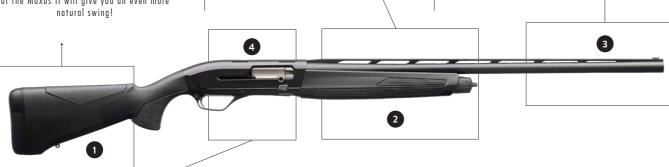

The Maxus II is also capable of firing a wide selection of hunting cartridges, from 28 grams to the largest loads available in gun stores.

· Additional accessories available to buy :

- 12 mm Stock insert

Gauge: 12/76, 12/89

- 12, 20 and 25 mm Inflex II Recoil pad

4

THE VALUE-ADDED EXTRA YOU ONLY GET FROM BROWNING

Speedloading. Every second counts when you're hunting small game in open country and wetlands.
 While your Maxus II has just sent out its own special warm welcome to that flight of mallards, you need to reload fast to greet the next lot.

Speedloading is a Browning proprietary technology that saves you precious time. When you insert the first cartridge into the magazine with the breech open, it is chambered straight away and the bolt springs shut, giving you vital extra seconds to concentrate on what really matters: your quarry.

THE MAXUS II AT A GLANCE

BUILT TO LAST: 100.000-ROUND WARRANTY*

The A5 was developed to be the most reliable, fastest and gentlest inertia-driven semi-automatic shotgun on the market.

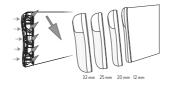

The new, indefatigable Kinematic Drive™ system is what makes it so unfailingly reliable, while further innovative features such as the Invector DS™ chokes, Inflex™ II recoil pad and Speed Load Plus load/unload system add to the A5's technological punch.

1

INFLEX™ II RECOIL PAD

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32mm thick (available as an option), make it easy to adjust the length of your stock.

4

KINEMATIC DRIVE™ SYSTEM

The system accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. It's the simplicity of its design that makes the Kinematic Drive™ system work so efficiently, smoothly and reliably with any typ of load and in any type of extreme weather, temperature, damp and dirt.

HUMPBACK

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past. The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight, which helps you to aim naturally with faster targeting.

SPEED LOADING AND UNLOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades. Our patented Speed Load Plus system chambers the first round straight from the magazine, and unloads quickly without having to run the bolt to chamber each shell.

5

BACK-BORED™ VECTOR PRO™ BARREL

The Back-bored™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

INVECTOR DS™ CHOKES

The Invector DS™ chokes offer unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

All Browning shotguns are designed, tested and proofed for steel shot.

"REFLEX": THE REVOLUTIONARY AIMING SYSTEM.

Thoroughly modern styling, natural handling, excellent ergonomics: the new BAR Reflex in a nutshell. With the new K1 red-dot sight from Kite Optics fitted, this rifle is a revolution: low and forward position, natural handling and easy adjustment.

INTERCHANGEABLE BUTT-PLATE

BAR rifles are fitted with interchangeable Inflex™ II recoil pads on their butt-plates. Different thicknesses are available: 12mm, 20mm or 25mm. These buttplates enable you to adjust the length of your stock without difficulty.

HAND COCKING SYSTEM SAFETY GUARANTEED

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load. Your gun is now ready to fire. You can disarm your gun just as easily by pushing the button.

TRIGGER SYSTEM IS A GLASS-BREAKER

When you want absolute precision, this trigger system is short and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

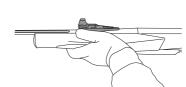

THE LOWEST MOUNTED RED DOT ON THE MARKET

- The red dot is mounted low and forwards for a fast and instinctive aim.
- Perfect alignment with the stock, without a comb.

OPTIMUM ERGONOMICS

- Handles naturally.
- Easily adjustable red-dot brightness.
- Integrates elegantly with the gun.

K1: MAXIMUM FIELD OF VIEW

The Kite K1 was developed to render the edge of the sight practically invisible, to make fast target acquisition easier and provide maximum field of view.

All Browning rifles are designed and tested to fire both leaded and unleaded ammunition.

ATTENTION: Please note that this product is regulated and can only be sold and/or used in certain countries and/or regions - please comply with the applicable law.

With the BAR 4x, the final configuration comes down to you.

We supply the key components - receiver/barrel assembly, stock/forearm kit, magazine and accessories - and you assemble the gun according to the customer's wishes.

- **RECEIVER/BARREL**: the receiver is delivered in a cardboard box or ABS case, depending on the model. The user manual is included with the receiver.
- STOCK/FORE-END KIT: the stock and fore-end are always sold together as a kit to ensure matching wood grades.

 These parts are supplied in a cardboard box along with the assembly notice.
- MAGAZINE: the BAR is delivered with a magazine that complies with the applicable laws in your country.
- ACCESSORIES: open sights, extra magazine, recoil pads and bolt handle knobs for your customers to customise their guns as they wish.

The parts take less than 5 minutes to assemble.

THE 4X RANGE - A TREMENDOUS OPPORTUNITY FOR GUN STORES

Normally, a store that wants to increase sales has to increase its stock, and that means taking a big risk.

The BAR 4X removes this risk. With just a minimum stock of parts, you can increase your product offer considerably.

With solutions that are better matched to your customers' expectations, your sales should grow automatically.

Parts availability from our side also improves, so we can deal with your requests quicker

LEAD-FRI COMPATIB

MODULAR, CUSTOMISABLE AND AVAILABLE, ALL IN ONE

You build the legend around our products. What makes the BAR the world's best-selling semi-automatic hunting rifle is you.

We want to continue supporting your sales by bringing you innovative products that go beyond your expectations. This is how the **BAR 4x range** came to be. How did we do it? We took a new look at our current products, expanded the range and made sure that we improved availability.

A new generation of BAR, we have developed five areas that give our customers a new shooting experience.

IMPROVED ACCURACY

The BAR 4x are even more accurate than their predecessors, and they were already renowned for their excellence. This feat was made possible by a barrel thread assembly. But that's not all! The receiver-to-barrel connection is also more solid. The bearing surfaces and the thickness of the wood have been increased to give greater accuracy without endangering the integrity of the stock.

2 SUPERLATIVE HAND COCKING SYSTEM

The hand cocking system travels 25% less for greater shooting comfort. The knob is also larger for easier handling. The Browning hand cocking system now also comes as standard on all BAR 4x.

3 STANDARDISED BARRELS

The 4x range was developed for modular comfort and ease of customisation. Manufacturers know that any modular system requires a common base. This is why all the barrels on the new BAR 4x are fluted and threaded. We've also taken a look at the sights and included a modular barrel-mounted sighting system that can be re-configured in seconds. The barrel is also pre-drilled for a battue rib or a Kite Optics K1 Reflex red dot sight.

A STOCK FOR EACH SHOULDER

In the 2023 catalogue, you will find two wooden stock references: a grade 2 & 3 ambidextrous pistol stock and a Bavarian stock for right-handers in grade 2, 3 or 4. Products will soon be expanded to give every hunter the right stock for them.

5 NEW-LOOK AESTHETICS

The new styling of the BAR 4x will immediately catch your eye. A number of the BAR 4x models feature a new engraving.

CONFIGURE YOUR OWN DREAM BAR

WITH THE BAR 4X, YOU CAN CONFIGURE YOUR BROWNING® GUN RIGHT THERE IN THE GUN STORE.

Choose your gun's base, add the stock and fore-end kit, and finish with the optional items (magazine, sights, adjustable cheek piece).

Every possibility covered with minimum stock!

A new modular concept to satisfy every hunter's personal technical and aesthetic choices.

MARAL 4X: A NEW BUSINESS APPROACH

With the Maral 4x, the final configuration comes down to you.

We supply the key components - receiver/barrel assembly, stock/forearm kit, magazine and accessories - and you assemble the gun according to the customer's wishes.

- **RECEIVER/BARREL**: the receiver is delivered in a cardboard box or ABS case, depending on the model. The user manual is included with the receiver.
- STOCK/FORE-END KIT: the stock and fore-end are always sold together as a kit to ensure matching wood grades. These parts are supplied in a cardboard box along with the assembly notice.
- MAGAZINE: the Maral 4x is delivered with a magazine that complies with the applicable laws in your country.
- ACCESSORIES: open sights, extra magazine, recoil pads and bolt handle knobs for your customers to customise their guns as they wish.

The parts take less than 5 minutes to assemble.

THE 4X RANGE – A TREMENDOUS OPPORTUNITY FOR GUN STORESS

Normally, a store that wants to increase sales has to increase its stock, and that means taking a big risk.

The Maral 4X removes this risk. With just a minimum stock of parts, you can increase your product offer considerably.

With solutions that are better matched to your customers' expectations, your sales should grow automatically.

Parts availability from our side also improves, so we can deal with your requests quicker.

MODULAR. CUSTOMISABLE AND AVAILABLE. ALL IN ONE

You build the legend around our products.

What has made the Maral a reference for many hunters is you.

We want to continue supporting your sales by bringing you innovative products that go beyond your expectations. This is how the **MARAL 4x range** came to be. How did we do it? We took a new look at our current products, expanded the range and made sure that we improved availability.

A new generation of MARAL, we have developed five areas that give our customers a new shooting experience.

IMPROVED ACCURACY

The MARAL 4x are even more accurate than their predecessors, and they were already renowned for their excellence. This feat was made possible by a barrel thread assembly. But that's not all! The receiver-to-barrel connection is also more solid. The bearing surfaces and the thickness of the wood have been increased to give greater accuracy without endangering the integrity of the stock.

2 SUPERLATIVE HAND COCKING SYSTEM

The hand cocking system travels 25% less for greater shooting comfort. The knob is also larger for easier handling. The Browning hand cocking system now also comes as standard on all Maral 4x.

3 STANDARDISED BARRELS

The 4x range was developed for modular comfort and ease of customisation.

Manufacturers know that any modular system requires a common base. This is why all the barrels on the new MARAL 4x are fluted and threaded. We've also taken a look at the sights and included a modular barrel-mounted sighting system that can be re-configured in seconds. The barrel is also pre-drilled for a battue rib or a Kite Optics K1 Reflex red dot sight.

A STOCK FOR EACH SHOULDER

In the 2023 catalogue, you will find two wooden stock references: a grade 2 & 3 ambidextrous pistol stock and a Bavarian stock for right-handers in grade 2, 3 or 4. Products will soon be expanded to give every hunter the right stock for them.

Code Description					
112A30003	MODULAR SIGHT - TRACKER KIT				

THE MOST EFFECTIVE STRAIGHT-PULL ACTION RIFLE: SURER, MORE ERGONOMIC, FASTER

The new Maral Reflex handles naturally, and with its near-perfect ergonomics, it has much to offer. It features a point of aim 6mm lower than the lowest red dot on the market. An adjustable stock is unnecessary. Its perfect field of view on and around the moving target offer guaranteed shot capability.

QUICK RELOADING SYSTEM

The servo bolt return system combines maximum safety, speed and efficiency.
Thanks to the time gained in the reloading phase, shooters can concentrate on their shooting.

SAFETY GUARANTEED

- Hand cocking system.
 Breech contained inside its casing:
 no inconvenience when reloadingr.
 Seven-lug bolt: a bolt renowned for its sturdiness,
- which guarantees exceptional safety and accuracy.

THE LOWEST MOUNTED SIGHT ON THE MARKET

- Low and forward mounted for a fast and instinctive aim.
- Perfect alignment without a comb.

OPTIMUM ERGONOMICS

- Handles naturally.
- Easily adjustable red-dot brightness. • Integrates elegantly with the gun.

TRIGGER SYSTEM IS CRISPER, SHORTER AND INCREDIBLY DIRECT

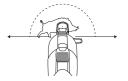

When you want absolute precision the trigger system is crisper, shorter and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

K1: MAXIMUM FIELD OF VIE

The Kite K1 was developed to render the edge of the sight practically invisible, to make fast target acquisition easier and provide maximum field of view.

All Browning rifles are designed and tested to fire both leaded and unleaded ammunition.

INTERCHANGEABLE BUTT-PLATE

MARAL rifles are fitted with interchangeable Inflex™ II recoil pads on their butt-plates. Different thicknesses are available: 12mm, 20mm, 25mm or 32mm. These butt-plates enable you to adjust the length of your stock without difficulty.

TRIGGER SYSTEM IS A GLASS-BREAKER

When you want absolute precision, this trigger system is short and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

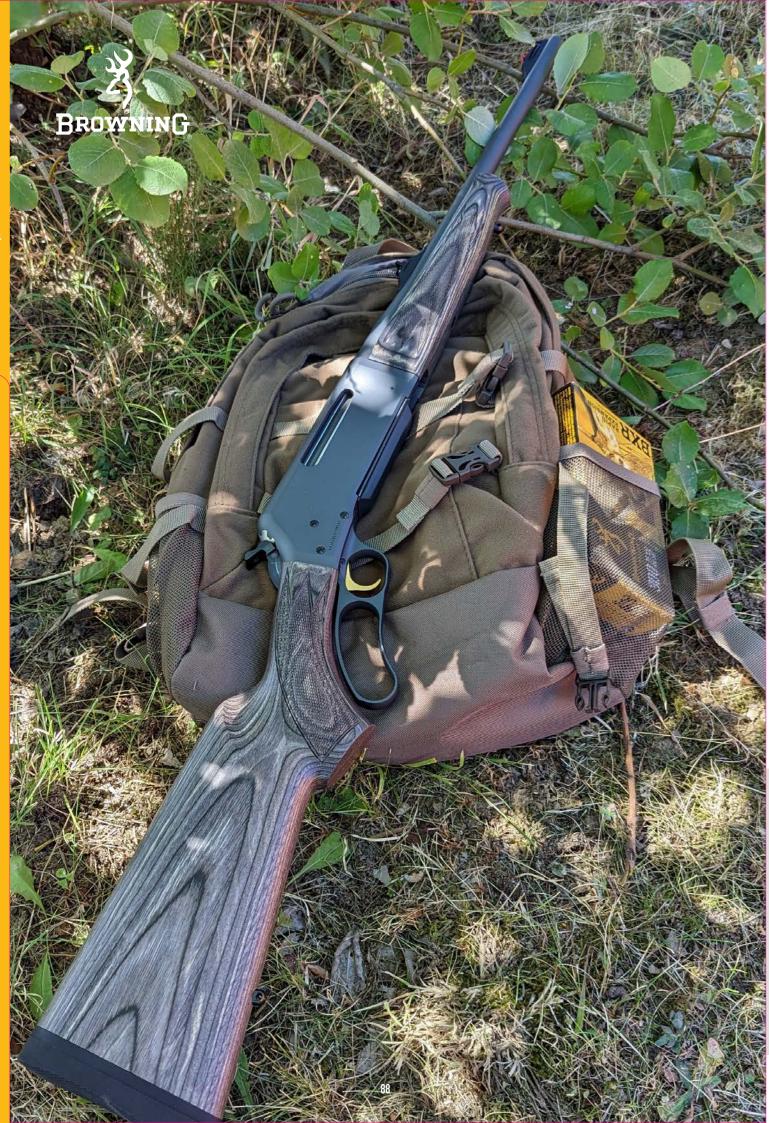

QUICK RELOADING SYSTEM

The servo bolt return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their shooting.

WHY CHOOSE A LAMINATED/GLUED WOOD STOCK?

- The first and foremost advantage of a laminated/glued wood stock is the high density of the material that makes it extremely robust.
- · Laminated/glued stocks are far more resistant to abrasion and humidity.
- \cdot The glue that we use to bond our birch stocks can also withstand water.
- · Whether you're on the range or on a hunt, you don't have to worry about getting your gun out. This is where this stock really excels.
- · The stability of a laminated/glued stock improves the gun's accuracy slightly, and above all its service life.
- The birch wood is dyed in the mass, so you can make it look as good as new just by sanding, without having to re-apply colour.
- \cdot We do not use any substances that are toxic to the environment or the gun user.

NO MORE MISSED TARGETS!

The X-Bolt Composite Black comes with a new oversized hex bolt handle, which can be modified (optional). It features an M14x1 threaded barrel that makes sound moderators and muzzle brakes simple to fit. The thread is protected by a flush-fitting thread protector. An additional 7 mm insert is supplied with the rifle for easier shouldering and lower recoil.

U

INFLEX™ RECOIL PAD

This superbly flexible recoil pad gives the best possible recoil absorption for a rifle. It is designed and made from exclusive materials to direct the recoil forces downwards, moving the stock away from the face for less kickback and muzzle jump.

2

THE X-BOLT RANGE FEATURES A SHORT, CRISP AND DIRECT TRIGGER ACTION

Its trigger pull gives you a triple guarantee:
• Zero take-up.

Minimum hammer sear break.
 Limited overtravel.

BOLT RELEASE BUTTON

The bolt release button works with the safety and can be used to remove a round from the chamber without danger.

ROTARY MAGAZINE

Made from an ultra-tough lightweight polymer to provide exclusive protection for the bullet tip.

INTEGRATED MOUNTING SYSTEM

The integrated scope mount has four screws on each base for greater stability and accuracy.

EXTREME ACCURACY

A floating barrel is vital for flawless accuracy. The barrel on the X-Bolt gives this because it is double-bedded, so the barrel-receiver assembly is positioned on the fore-end at two points, front and back.

All Browning rifles are designed and tested to fire both leaded and unleaded ammunition.

ULTRA LIGHT, ULTRA RIGID, ULTRA PRECISE

Your high standards are your greatest attribute. You won't accept failure. You need a gun that reflects who you are: efficient, accurate and focused on results. The X-Bolt Pro Carbon 2 is designed for you. It handles with featherweight ease so that you can take your active hunting experience to a new level. The rigidity of the stock gives you even greater accuracy. The X-Bolt Pro Carbon 2 is now available in 300 WM, 270WSM and 7RM calibres.

CARBON-FIBRE STOCK

The X-Bolt Pro Carbon 2 is:

- Ultra-ligh.
- Ultra-rigid for uniform recoil distribution. • Ultra-solid, compression-moulded carbon-fibre construction with a high-density foam core.

FLUTED BOLT AND BOLT HANDLE

The externally fluted bolt and bolt handle provide smoother action for a rapid shot.

CERAKOTE "TUNGSTEN" FINISH

The X-Bolt Pro is Cerakote finished on all its metal components (including the optics)
and on the magazine floor plate. The result is better resistance against any type of friction, abrasion and corrosion.

INTEGRATED MOUNTING SYSTEM

The integrated scope-mounting system has four screws per fixing point. Therefore it is more stable and provides greater accuracy.

DOUBLE BEDDING

A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

HIGH-PRECISION BARREL

The fluted barrel on the X-Bolt Pro ensures it stays cool and reduces weight. The barrel lapping process polishes away any traces of machining work, improving accuracy and reducing fouling.

All Browning rifles are designed and tested to fire both leaded and unleaded ammunition.

COME AND EXPERIENCE UNIQUE MOMENTS.

You want unique experiences. You are unique, and so is your gun. With the new generation of A-Bolt 3, you can customise your gun to reflect who you are. The A-Bolt 3+ is just as fearsomely accurate and versatile as ever, is easy to handle and just as easy to personalise.

DETACHABLE CHEEK PIECE

The cheek piece of the A-Bolt3+ can be replaced. We sell cheek pieces in a range of colours. The stock is also pre-drilled to receive an adjustable cheek piece.

WIDE AND FLAT FORE-END

A fore-end is available in a very wide version to provide an excellent grip, giving you the advantage on a driven hunt, where every moment counts. It is also flat to give you better stability when your a-Bolt3+ is resting on your bag or your elevated hide. Available in different colours.

REPLACEABLE BOLT HANDLE KNOB

The bolt handle knob is easy to replace. A wide range of knobs are available to buy.

60° OPENING

The breech opens to 60° for fast cocking action with any size of scope in any position.

HIGH-CAPACITY DROP-BOX MAGAZINE

The 5 rounds in the 243Win, 308Win and 30-06Spr magazines give you a margin of error. The magazine capacity for the 300WM calibre is 3 rounds.

All Browning rifles are designed and tested to fire both leaded and unleaded ammunition.

In an ever faster moving world, you need to react in any situation. Whether you're a hunter or a sports shooter, one thing you are is dedicated. You want to be able to explore every aspect of your passion while always aiming for the same level of excellence.

The Standard Invector, Invector+ and Invector DS chokes help you get the best out of your Browning gun. They can be changed in seconds, and let you aim for excellence in any situation.

CHOKES STANDARD INVECTOR

CHOKES INVECTOR +

CHOKES INVECTOR DS

3 IMPORTANT NOTICE

Standard Invector, Invector+ and Invector DS chokes cannot be swapped with each other.

Refer to the marking on the barrel to find a suitable choke for your gun.

106

INVECTOR STANDARD

The Standard Invector chokes are the first generation of Browning chokes. They offer consistent shot density for both hunters and shooters. Standard Invector chokes are made for use on non Back-Bored barrels. They are more durable than the market average and particularly resistant to steel shot. These chokes are designed to prevent gases mixing between them and the barrel, and so limit fouling.

INVECTOR DS

The Invector DS chokes are the latest generation of chokes from Browning. They offer consistent shot density for both hunters and shooters. They are made for use on Back-Bored and Vector Pro barrels. They feature a revolutionary design. They are slender, which means they can be made longer. This increased length tightens the shot more gradually, which aids pattern consistency and density. These chokes are designed to prevent gases mixing between them and the barrel, and so limit fouling. Invector DS chokes are also very resistant to steel shot.

THE PERFECT BALANCE BETWEEN SIZE AND PERFORMANCE

Browning Iridium sound moderators were developed to provide hunters and shooters with the perfect balance between size and performance. You will benefit from a reliable, high performance and accurate product that allows you to keep your movements fluid and simple to use.

ATTENTION: Please note that this product is regulated and can only be sold and/or used in certain countries and/or regions - please comply with the applicable law.

(*) Recommended retail price including VAT. Retailers' prices will be determined on the basis of their own commercial policy. Please note that this product is regulated and can only be sold and/or used in certain countries and/or regions - please comply with the applicable law.

SOUND MODERATOR

THE PERFECT BALANCE

BENEFITS OF IRIDIUM® MODERATORS

- Minimum noise level
- Great recoil reduction
- Improved accuracy
- Over-barrel design for better balance/stability
- Eliminated muzzle flash
- Simple use

IR 30

-30 dBc | 232 mm | 369 gr | Ø 47,5 mm

IR 34

-34 dBc | 269 mm | 455 gr | Ø 47,5 mm

NOISE TO SIZE RATIO

For Browning IRIDIUM, noise to size ratio is a key point in all product developments.

But as we are all hunters and shooters, we know what

«Maximize the confort and the swing in order to get the best result.»

ULTRA-HIGH PERFORMANCE REMOVABLE MOUNT

A full mount NOMAD consists of a base rail (single, hybrid or multiple) matched to the gun and a top rail (2), that is specific to the scope. The base rails are available in SINGLE, HYBRID or MULTIPLE versions. The multiple is adjustable in windage and elevation, and lets you use the same scope on a second gun.

ONLY ONE ADJUSTMENT. MULTIPLE SCOPES ON MULTIPLE GUNS.

More details on Browning Nomad mounts on www.browning.eu

PRECISE

The patented bolt technique gives perfect attachment, exceptional resistance and constant precision, whatever the scope used.

FAST

Using the thumbwheel attachment, change scopes fast, without running the risk of losing alignment.

VERSATILE

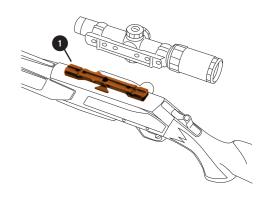

With the NOMAD MULTIPLE base rail, adjustable in windage and altitude, you can now use all your scopes on any gun, without having to adjust your aim before each change.

FIXED MOUNTS

FIXED MOUNTS FOR RIFLES AND SHOTGUN

Our integrated scope mount avoids problems with alignment and eliminates potential loose base-to-ring connections.

The ring A and base B form a single ultra-rigid unit machined from a 7000 series aluminium alloy.

CHOICE OF SCOPE RING HEIGHT

(FOR RIFLES WITHOUT OPEN SIGHTS)

STANDARD (LOW)

ring height for scopes up to a 44mm objective with a standard barrel contour.

INTERMEDIAIRE (MEDIUM)

ring height for scopes up to a 50mm objective with a standard barrel contour.

HIGH RING (HIGH)

height for scopes up to a 56mm objective with a standard barrel contour.

PRODUCTS YOU CAN RELY ON

Browning offers a full range of clothing made to the same high standards as its guns. Our competitive prices and ultra-technical product range have firmly established us as an essential clothing brand for hunters and sport shooters.

←Pre\lent.

Ultra-effective 10K/10K waterproof, breathable and wind-resistant

AIRFLOW

A design and manufacturing process that wicks sweat more effectively even during intense activity.

KEVLAR A fibre that is five times stronger than steel, weight for weight. Dog vests, tracking jackets, your clothes are equipped to face the harshest

Dyneema*

Ultra-tough, super-lightweight fibre. Used in dog safety vests, specially developed to protect against punctures.

-Pre-Vent. Xtrem

Membrane that offers optimum breathability (20K) and outstanding waterproofing action (20K) to keep you permanently dry in any weather and activity.

Armortex™ fabrics are a blend of Kevlar® para-aramid and Polyamid that make for fantastically hard-wearing garments and the perfect barrier against brambles and thorns, while offering maximum protection for hunters.

Incredibly tough and lightweight fibre for clothes that are flexible, light and resilient. When combined with elastane, it creates a tough yet light, flexible and stretchable garment.

PRIMALOFT.

Primaloft fibres offer specialist market-leading, high-performance synthetic insulation solutions guaranteed to give wearers the best possible insulation in cold and wet weather without compromising on weight. Browning products made with Primaloft fibres are perfect for keeping the cold out when you're spending a long time on the peg.

Thinsulate

124

Thinsulate is a top-of-the-range synthetic insulation fibre from market leader 3M that is perfect when you need clothing that is warm, light and thin. Browning clothes made with Thinsulate fibres insulate wearers against the cold, are extremely lightweight and can be easily stuffed into a bag for trouble-

(A) CHOOSING THE RIGHT SIZE OF VEST FOR YOUR DOG

The size of the jacket is proportional to the chest size. The Velcro neck and belly straps are adjustable. Do not overtighten, and choose the right size to avoid hurting your dog.

SAFES

BROWNING PROSTEEL SAFES: AN IMPROVED RANGE OF SAFES BETTER ADAPTED TO YOUR REQUIREMENTS

Our Browning safes have been specially designed to provide secure storage for all your valuables, from hunting guns to handguns, ammunition, jewels and important documents.

Their reinforced build and special forced-entry protection, including the Force Deflector System and 90-minute fire resistance, mean you can leave your belongings behind in any safe of the Browning range with complete peace of mind.

The safes have been improved to offer more storage options, allowing you to rearrange the interior layout the way you want to secure your hunting and recreational guns, ammunition, scopes and any other items of personal value.

Choose an elegant or industrial style, medium- or large-capacity Browning Prosteel safe for guaranteed peace of mind.

Cuts and rips are not the only danger to your dogs! Because Browning always has its ear to the ground and works with those who take care of our faithful companions, we know that cuts and rips are not the only danger our dogs face when they engage with the quarry. This is why we have developed a whole new safety vest to protect your partner against impacts. The PROTECT PRO MAX

Our new Protect Pro MAX is just as lightweight and effective against punctures and tears as our Protect Pro model, and will also protect your hounds against the brunt of the impact from the quarry. With its ultra-absorbent, impact-resistant foam, your packs will be ready to face whatever lies ahead.

THE TUBULAR **RED** DOT FROM KITE OPTICS : RELIABLE, DURABLE, EFFICIENT

LIFETIME

The Kite BT1 has a lifespan of 5 years. Its motion-activated standby and auto-on system help preserve battery life.

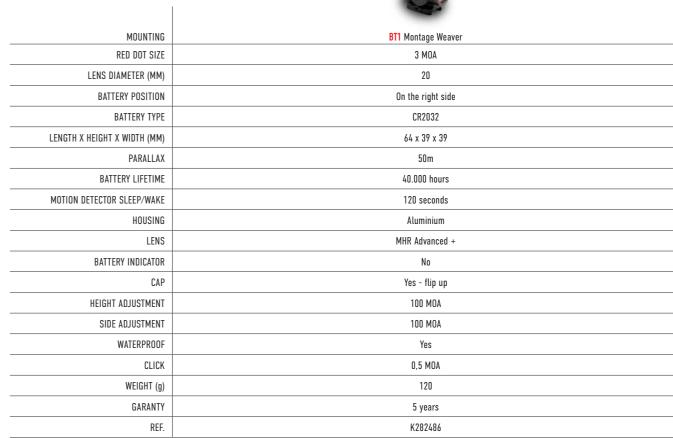

3 MOA RED DOT

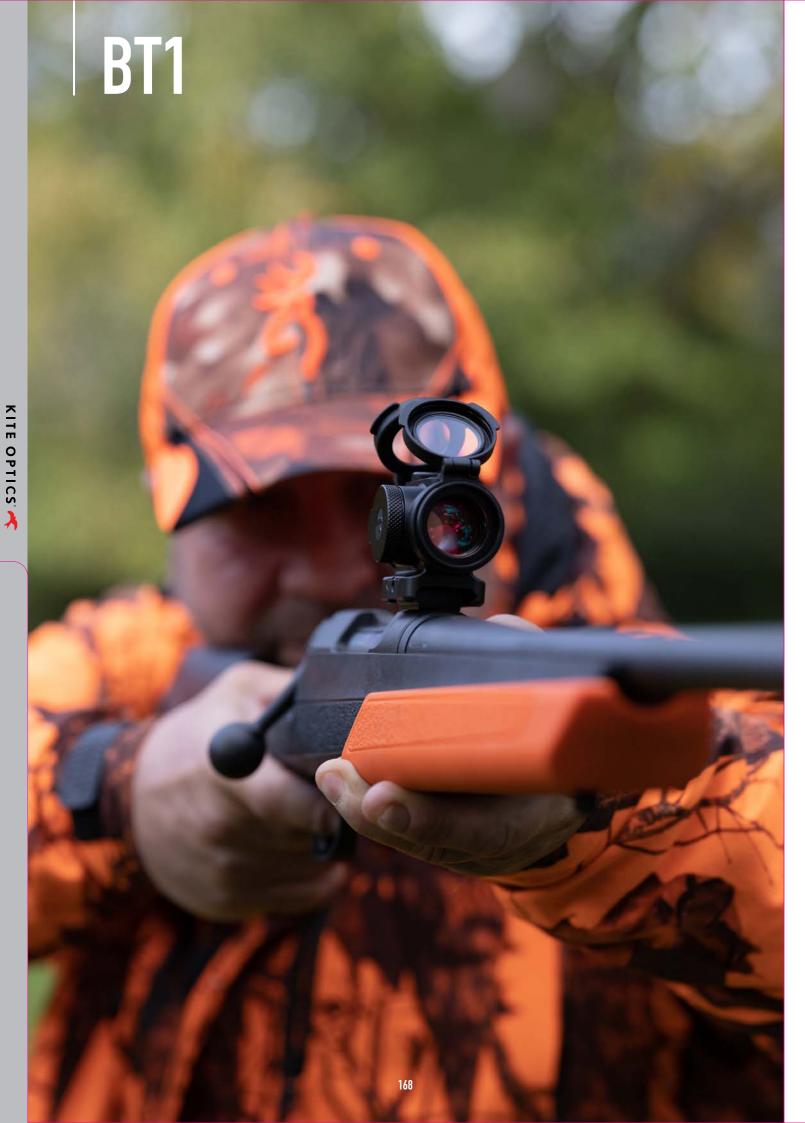

With its 3 MOA red dot and 10-stage intensity, the BT1 has every situation in the field covered.

RUGGED

The high-quality aluminium body, water resistance, specially coated lenses and integrated lens caps mean you can use the BT1 in the worst weather conditions

K1 RANGE A CLEAR AND RELIABLE RED DOT

DESIGN

The Kite K1 is designed to be extremely compact but still easy to handle, even with gloved hands. The attachment system mounts the K1 to all types of gun and base.

RED DOT

The 2 MOA red dot has 11-stage illumination control to keep it sharp and clearly visible, even in strong sunlight. It can also be fine-tuned, including for longer range shots that can be made without covering too much of the target and with both eyes open.

NEAR-INVISIBLE CONSTRUCTION

The Kite K1 has been developed to render the edge of the sight practically invisible, making fast target acquisition easier and providing maximum field of view.

K6 RANGE LIGHTWEIGHT, FAST, INTUITIVE.

The latest generation of 6x magnification scopes from KITE Optics has benefitted from an all-new design. The K6 scope is lighter and comes with new, smart lighting features. Its elegant and modern styling is the work of one of the most renowned design studios in Europe.

The K6 provides outstanding light transmission and optical performance levels, with an excellent 6x zoom. A perfect match of high-precision components and cutting edge manufacturing and assembly processes. The fine 4A reticle in the extra-wide field of view is lit by a bright, sharp illuminated dot for faster, safer and more accurate target acquisition.

The K6 comes with smart, practical features. The APC (angle power control) system ensures long battery life. The dot is automatically put into sleep mode when the gun is held upright or laid on its side, and comes back on when the gun is moved. It also includes a 3-hour auto-off timer, and a low battery indicator to give you time to replace it with the one in the spare battery compartment and continue hunting with your red dot. All of these features can be disabled if required.

FEATURES

- 1 MHR-coated for accurate detailing and 93% light transmission
- 2 Anodised aluminium tube for secure and reliable mounting
- 3 Easily adjustable turret with return-to-zero ability
- ${\bf 4} \ \ {\bf Ultra} \ hard-wearing \ aluminium \ magnification-adjustment \ ring$
- 5 Argon-filled tube for all-weather use

- 6 Brass tube and turrets for long-lasting, accurate reticle-to-target dial-in
- 7 Spare battery compartment
- 8 Sharp, fine and clear, adjustable illuminated dot
- 9 Ultra-fine 4A1 reticle with auto-off feature, for maximum light transmission and minimum target concealment

K4 RANGE More accurate, more reliable, more durable

The K4 consists of highest quality components, assembeled in a state-of-the-art manufacturing processes. Precision machinery with tolerances up to 4 micron allow this instrument to perform on top level, and stand among the world's most accurate, relibable and durable riflescopes.

The K4 is a feast for the eyes. the elegant yet modern looks of this single tube scope, were brought to life by one of Europe's most reknown design studios. But true impressiveness awaits upon looking through the scope's optical system.

The KITE K4 features an impressive field of view with a thin 4Ai reticle. The image is bright, razorsharp and characterized by a perfectly natural color rendition. The 11-level illuminated red dot is is well defined and clearly visible even in sunny conditions. You will find optimized grip on power wheel and illumination dial, with or without gloves. Allowing fast and accurate traveling through the 4x magnification range, and immediate respons from the illuminated dot.

Exceptional performance combined with elegant design. Let the K4 be your guide.

B6 RANGE LIGHT, FAST, INTUITIVE

The B6 range of scopes is based on sophisticated design and reliability. Both scopes are the perfect solution to each hunter's vital needs.

The 1-6x24 is ideal for driven hunts, with a HD optical system that offers a 40-metre field of view at 1x magnification, and an illuminated dot with boost mode for fast target acquisition in bright sunlight. The versatile 2-12x50 has the same optical system in 6x zoom and KITE OPTICS' MHR Advance coatings for perfectly natural colour renditions and 90% light transmission. Peak performance even in the darkest conditions.

The B6 range meets the needs of the most demanding hunters at a surprisingly reasonable price.

BINO STABILIZED APC

EXTRA LONG FOCUS WHEEL

SMART OBSERVATION

The essential feature of this instrument is, of course, its image-stabilization capability. It provides the same level of optical performance as the KITE PETREL. But when you add instability to the picture, from a shaky hand, breathlessness, blustery wind, driving, etc, these binoculars outperform the best binoculars in the world to give you images and hidden details you won't see from standard models. KITE APC image-stabilized binoculars feature a new technology that corrects the image stability by 2° on the 12x42 and 16x42 models to 3° on the 10x30 and 12x30 models, equal to 5.3 metres at a range of 100 metres, or 53 metres at 1,000 metres. That's 6 times more than other image-stabilized binoculars - giving you perfectly stable images in an unsteady hand, or on a moving vehicle or boat. Try them and see!

LYNX HD+

VOTED BEST GENERAL WILDLIFE OBSERVATION BINOCULARS IN 2020

The KITE LYNX HD+ range gives you an outstanding «wide angle» view for better observation and faster identification, as well as a more comfortable viewing experience and higher image quality.

The ground-breaking optical system created by Kite Optics is designed to suit the LYNX HD+ range of binoculars to any conditions. Its extra-wide field of view lets you see items quicker at long range, and pick out greater details at shorter ranges or in denser settings such as forests and enclosed areas.

MIROKU

HUNTING & SHOOTING - OVER-AND-UNDER

MIROKU, JAPANESE TECHNOLOGY

Having been making Hunting Guns since 1893, Miroku not only benefits from a great gun-making experience, but also from the Japanese tradition of precision work with steel and wood. Because of this heritage, the Miroku guns are technically perfect and pleasing to the eye.

GUARANTEE OF PERFECTION

Before leaving the factory, all Miroku shotguns sold in Europe have to pass a stringent accuracy and reliability test involving the use of an electronic pattern plate, as well as the CIP (International Gunpowder Committee) tests which are renown for their rigorous standards.

MIROKU

HUNTING & SHOOTING - OVER-AND-UNDER

ATTENTION TO DETAIL

For strength, action and barrels are made from selected chomemolybdenum alloyed steels.

All Miroku shoguns have actions forged from a single piece of steel thereby guaranteeing fundamental structural integrity. The nitride finish on the action and the blueing of the barrels increase their resistance to wear, corrosion and other signs of ageing. Each load-bearing part also undergoes a thermal treatment which further enhances the gun's durability.

Miroku barrels are internally chromed, except in the choke area, which allows the owner to adjust the choke as required. Standard models have an «old silver» finish and all are engraved, whilst the higher «luxury» Grades have profuse hand-finished engraving, continuing a centuries-old tradition.

For all Miroku shotguns, quality is constant, their strength is legendary and they are safe in operation. In the hand, their balance is perfect, and as one has come to expect from Miroku, the finish is impeccable.

YOUR GUN IS MUCH MORE THAN A TOOL.

It is the expression of your deepest wishes and who you are.

Nothing but the best pleases you. When you saw the Miroku MK11 Side Plated, you knew straight away that this over-and-under is made for you. This fine gun combines an ultra-low action frame with the renowned inertia operated system of the Browning B525.

The engraved hunting scenes are like the wood: magnificent.

DESCRIPTION MIROKU MK11

· Stock

MIRORU

- Grade 4 walnut
- Pistol grip and splinter hunting fore-end
- · Action frame
 - Steel
 - Grey finish (nitride coated)
 - Ultra-deep engraving, pheasants and partridge
- Barrels
 - -Blued barrels
 - 6 mm solid top rib
 - Silver front sight

- · Shooting comfort & Performance:
 - 5 Invector+ chokes
 - Black Pachmayr recoil pad
- · Packaging :
 - Black Opaline carry case
- · Gauge :
 - 12/76mm

MROKU OVER-AND-UNDER MK11

THE MIROKU MK11: AN INNOVATIVE AND ELEGANT NEW PLATFORM.

The Miroku MK11 is like a fine hand-crafted jewel that you never tire of admiring.

First of all, this side-plated shotgun is an absolute treat for the eyes. The engraved pheasants and partridges are particularly deep, giving life and dimension to the motifs. Add in the high standard of hand-checkered wood, the teardrops and the lovingly crafted finishes, and you have a gun that sets new standards of elegance.

But the MK11 Side Plated is more than just a work of art: it's a technological revolution, offering an unprecedented combination of two important components - an ultra-low action frame and an inertia operated system. The ultra-low action frame gives a much faster aim and better recoil absorption, while the inertia system, which is also a feature of the Browning B525, is unfailingly reliable and lowers the final price of the gun.

The Miroku MK11 Side Plated is certain to make a name for itself among fine-gun enthusiasts!

WINCHESTER

WINCHESTER® is not just a brand; it is an iconic name in the world of shooting and hunting.

WINCHESTER® lever action rifles and ammunition have become the stuff of legend.

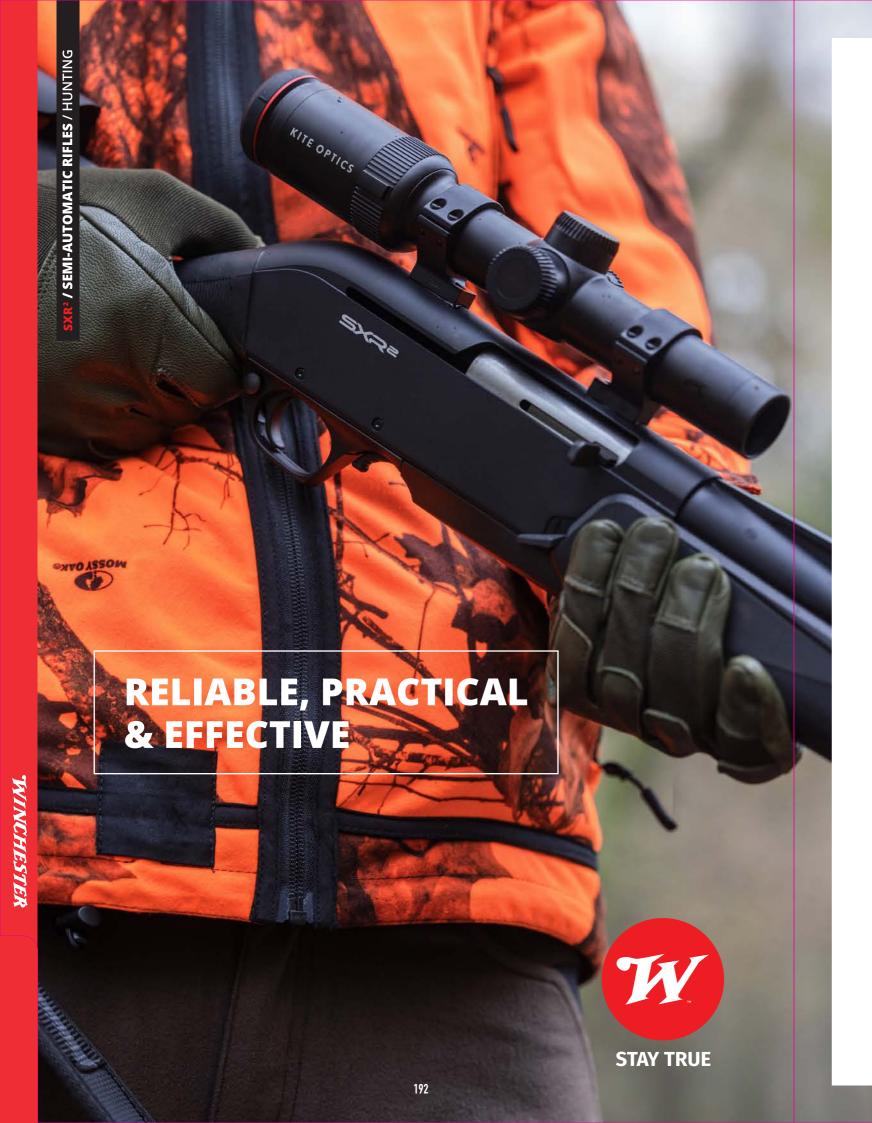

This deep-rooted innovative energy has been a driving force behind WINCHESTER® for over 150 years, inspiring us to create the products that have taken the industry forward.

Season after season, WINCHESTER® products make every hunt and shooting session around the world fun and thrilling.

WINCHESTER® has developed a new collection of equipment, accessories and safes to bring you a more intense experience.

The age of the cowboy has gone, but the pioneers' spirit of adventure lives on!

This semi-automatic rifle is a reference point for reliability in the hunting world

unting is about trust: trust in yourself and your equipment. This is why the WINCHESTER® semi-automatic rifle has become the benchmark for driven-hunt enthusiasts. With the new SXR², WINCHESTER® brings you a rifle that is faster, more reliable and more effective.

The comfort and ergonomics have been further refined. The multiple customisation options and new WINCHESTER® accessories maintain peak shooting comfort.

The integrated slide catch control keeps the breech open when your rifle is empty, making it safer and also easier to load and unload.

This gun is designed to give the best performance with all types of ammunition. Lead-free ammunition guarantees that your gun will remain effective and give you many long years of service.

The bolt is locked into the barrel by 7 lugs. This unique locking system ensures excellent shot accuracy, means you can fire magnum cartridges, and also guarantees greater safety.

WINCHESTER® GAS

AUTO LOADING SYSTEM

The loading-cycle regulation system ensures perfect operation with all types of rounds, even with magnum calibres.

The new WINCHESTER \$ SXR² includes a series of distinctive ergonomic improvements for greater shooting comfort:

- The straighter grip and ambidextrous palm swell give you a stock that handles exceptionally well.
- The smooth, flowing contours of the fore-end guarantee a firm grip in any conditions.
- The cocking handle has been enlarged for easy operation, even with gloved hands.
- The Inflex II recoil pad noticeably reduces recoil for greater comfort and an easier followup shot
- The integrated slide catch keeps the breech open when the gun is unloaded for greater safety; it also makes loading and unloading so much easier.

SIGHTS

Shot accuracy is one of your priorities. Our engineers have devised new sights with an ultrabright LPA-type fibre optic at the front for even faster aiming. The sights can be adjusted quickly and easily using a 1.5 mm Allen key.

SXR²

NEW FEATURES

STOCK

- PISTOL GRIP: redesigned to give you the perfect grip, including with heavy recoil calibres.
- AMBIDEXTROUS PALM SUPPORT
- CHECKERING: fresh and dynamic new style checkering for a firmer hold.
- INFLEX II RECOIL PAD: the SXR2 comes with the Inflex II recoil pad, which is outstandingly flexible and absorbs recoil like no other. A 7 mm insert and 25 mm and 30 mm Inflex II recoil pads are available as accessories.
- STOCK INSERTS: for vertical and lateral stock adjustment.
- ADJUSTABLE CHEEK PIECE: an adjustable cheek piece from Kalix is available to buy and fit to the composite stocks.
- COMPOSITE STOCK: in a change from the SXR, the SXR² is available in a composite version.

2 FORE-END:

WINCHESTER

- \bullet FORE-END: 10% more tapering to ensure total control of the gun.
- CHECKERING: fresh and dynamic new style checkering for a tighter hold.

BOLT:

- SLIDE CATCH: with the new slide catch, you can keep the breech open so that you and your fellow hunters around you can see that your gun is not loaded. This new feature also makes loading and unloading more comfortable.
- OVERSIZED BOLT HANDLE: easy to handle, even with gloves on.

ORGANES DE VISÉE

- ORGANES DE VISÉE OUVERTE: nouvelle mire et hausse pour une acquisition de cible immédiate.
- RAILS ET ANNEAUX DE MONTAGE: compatible avec des anneaux fixes ou avec le système Browning NOMAD.
- KITE OPTICS K1 REFLEX: compatible avec le système Kite Optics K1 Refl ex, vous permettant de placer votre point rouge K1 dans une position ultra-basse, favorisant une prise de visée instinctive.

194

All Winchester rifles are designed and tested for lead and lead-free ammunition.

WINCHESTER® XPR™: the straight-shooting accurate rifle •••

You've been waiting months for this moment. A wheat field, bordered by thick forest, stretches around you. The reddening sun slowly sinks behind a hill.

All you can hear is the rustling of leaves. All of a sudden, the sound of a crow cawing. It's the signal.

Looking through your scope, you can see a lone boar at 150 metres. Half-hidden in the undergrowth, it pauses. Is it time to move out into the open yet? It decides to risk it. Your finger strokes the M.O.A.™ Trigger System on your XPR™. It's a great shot. The boar drops instantly. Adrenalin levels return to normal.

This gun is designed to give the best performance with all types of ammunition

Lead-free ammunition guarantees that your gun will remain effective and give you many long years of service.

XPR™ M.O.A.™ TRIGGER SYSTEM

The XPR™ has a major advantage that makes it an extremely accurate rifle: its M.O.A.™ Trigger System. The trigger was originally developed for the WINCHESTER® Company's legendary M70™, and uses a system of pivoting levers that release the firing pin cleanly and at great speed for maximum accuracy. The result is triplezero performance: zero take-up, zero creep, zero overtravel.

TWO-POSITION

SAFETY

The XPR™ has a dual safety system that consists of a conventional on/off mechanism and a bolt safety feature. The bolt release button 2 positioned in front of the conventional safety button 1 lets you load or unload with the gun on safe, i.e. with the traditional safety button in the on position. For even greater safety while hunting, you can see at a glance whether the firing pin is cocked or not by the

cocking indicator on the bolt head 3.

CUSTOMIZE YOUR XPR! DETAILS PAGE 229

ou've been aware of the fox for a week now. Every day, at the same time, you watch him I prowling around at the edge of the wood. Unsuspecting, he sniffs around peacefully. He has no way of knowing you've just got an $M70^{\circ}$.

Taking up position, perched in an old oak tree, you load your M70[™]. You close the breech smoothly. You closely scan the edge of the forest with your binoculars. This is his usual time. He won't be long now. When the moment comes, he won't stand a chance.

This gun is designed to give the best performance with all types of ammunition. Lead-free ammunition guarantees that your gun will remain effective and give you many long years of service.

TRIGGER SYSTEM

The M.O.A.™ trigger adds to the outstanding accuracy of the legendary M70™. The system uses pivoting levers that release the pin cleanly and quickly for maximum accuracy and triple-zero performance: zero take-up, zero creep, zero overtravel.

CONTROLLED ROUND FEED

(CRF) BOLT

The large claw extractor slides smoothly and contacts a significantly larger area of the cartridge base than a classic extractor. The cartridge is perfectly controlled between leaving the magazine and being chambered. This proven concept allows the extraction of an unfired cartridge even if it has not been completely introduced into the chamber.

WINCHESTER

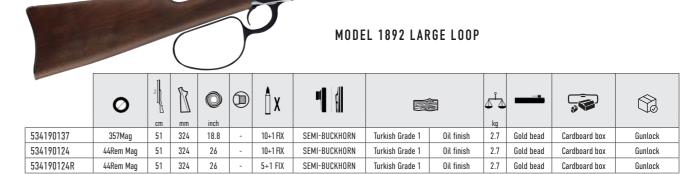

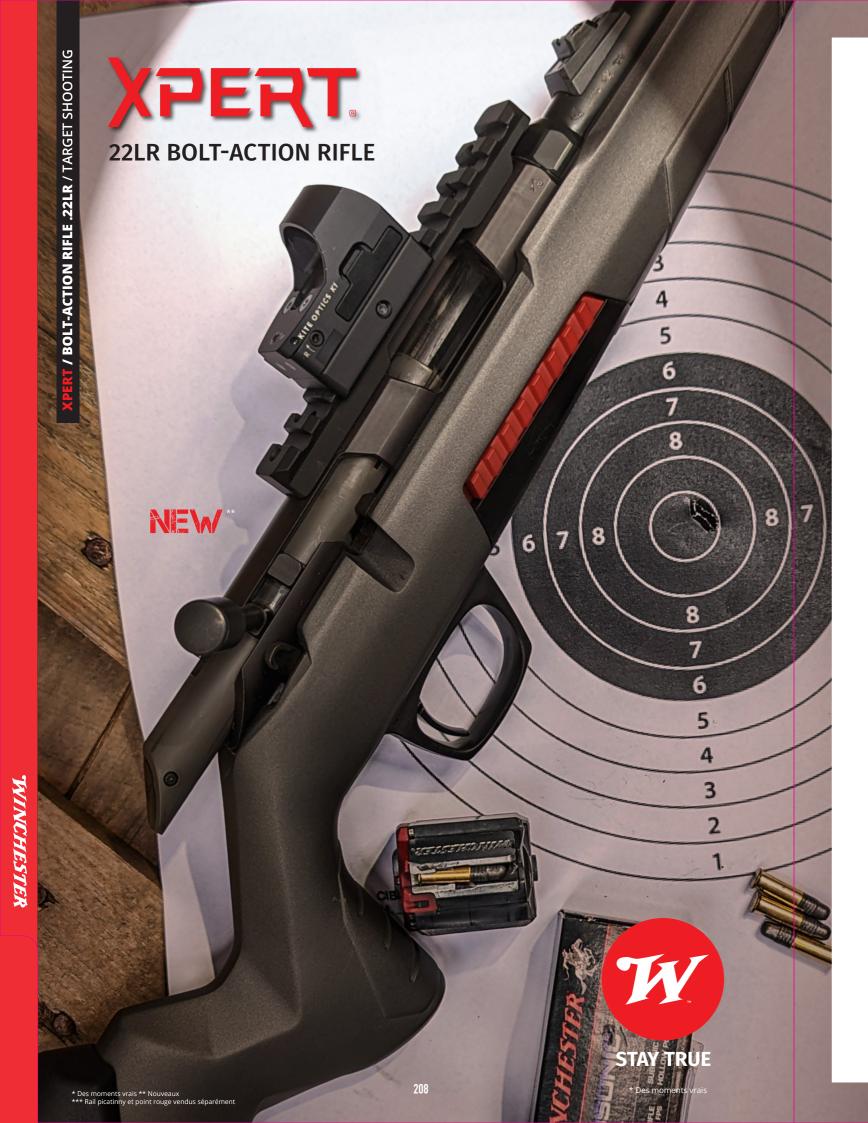

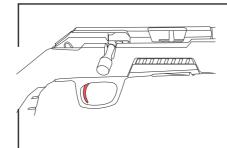

Light, sturdy, accurate

WINCHESTER has been making rimfire rifles for over a century.

The new Xpert® takes the rimfire rifle to a whole new level of accuracy and performance. The light, sturdy and accurate Xpert® reflects the fundamental values of WINCHESTER: reliable, effective and practical products you can trust.

KEY BENEFITS

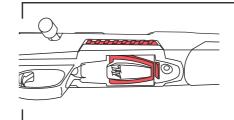

- Outstanding accuracy
- Bentz-style semi-match grade chamber
- Nitride finish for a smooth breech action
- Compatible with 10/22® magazines for intensive shooting sessions
- Wide range of accessories (optional items) for customising and adapting your rifle
- Threaded to fit a sound moderator
- · Lightweight, ergonomic stock

ADJUSTABLE MOA TRIGGER GROUP

Precision Rimfire MOA trigger with a three-lever design that guarantees triple-zero performance: zero take-up, zero creep, zero overtravel, for a crisp and quick pin release.

Adjustable trigger weight.

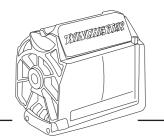

ERGONOMIC

The magazine release system can be operated using either hand and is easily accessed via the 2 side release tabs or by the tab directly under the magazine. The magazine drops into your hand!

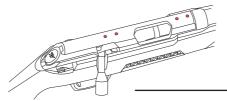

The cross is skeletonised to reduce the weight and shouldering is as perfect as ever.

ROTARY MAGAZINE

Detachable 10-round rotary magazine. Compatible with 10/22® magazines. Easy to load and unload.

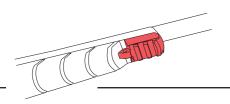

ACCESSORIES

A number of optional accessories are available.

- Scope and ring mounting systemAdjustable cheek pieceInterchangeable recoil pad.

PICATINNY RAIL

WINCHESTER

A Picatinny rail is placed ahead of the fore-end for you to add a bipod, strap attachment, torch or any other accessory to your rifle.

A rail cover protects your hands when no accessories are attached.

THREADED BARREL

The barrel has a ½"x20 UNF muzzle thread for mounting a sound moderator. A removable thread protector safeguards against damage when a sound moderator is not fitted. The muzzle is chamfered to protect the rifling and guarantee perfect accuracy every time.

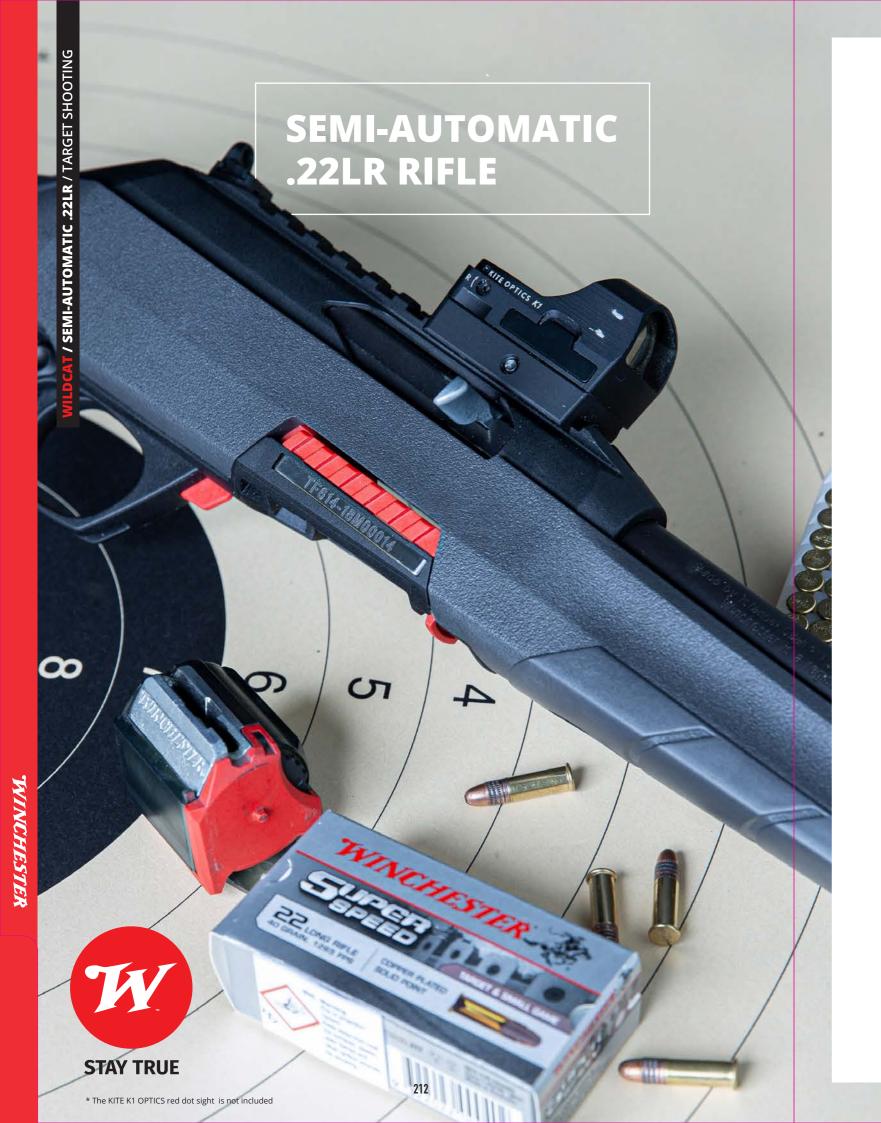

CUSTOMIZE YOUR XPERT!

DETAILS PAGE 230

All Winchester rifles are designed and tested for lead and lead-free ammunition.

¹¹ Enjoyable, effective and accurate

The seductive style and technical sophistication of the new Wildcat[™] herald a new era. The Wildcat[™] semi-automatic rifle is the perfect embodiment of the WINCHESTER[®] spirit: effective and reliable, yet extremely simple to use and maintain.

The entire action, for example, can be removed with the bolt and trigger group by pressing the button at the rear of the receiver. Now, cleaning is a breeze - simply insert the brush at the breech end of the 16 or 18-inch* threaded barrel.

The 10-round rotary magazine is easy to release for both right-handers and left-handers. The stock is skeletonised to reduce weight, and ambidextrous for easy and perfect shouldering every time.

The Picatinny rails on the receiver and the underside of the fore-end offer a quick mounting option for a scope and for accessories that give the rifle your own personal touch.

Wildcat™, fun to shoot!

This gun is designed to give the best performance with all types of ammunition. Lead-free ammunition guarantees that your gun will remain effective and give you many long years of service.

REMOVABLE ACTION

The lower receiver assembly can be removed from the upper section along with the bolt and trigger group with a simple press of the button located at the back of the receiver. No tools required! The manual safety button can easily be reversed for problem-free use by right- and left-handed shooters.

STOCK

The streamlined design and pistol grip of the ambidextrous stock make it outstandingly ergonomic. The moulded polymer build and matt finish ensure it can withstand the harshest conditions.

MAGAZINE

The easily accessible magazine release system can be

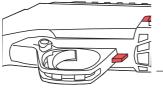

1 ROTARY

WINCHESTER

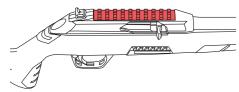

operated by either hand.
The magazine drops right into your hand. The magazine

can be changed quickly so you can get straight back to shooting!

The slide lock button is located at the front of the trigger guard. The mechanism can be locked open for maximum safety during storage and transport.

3 & 4 PICATINNY RAILS

The integrated top rail on the upper receiver provides an easy scope attachment option. A second Picatinny rail is fitted at the front of the fore-end for you to add a bipod, sling attachment, torch or other accessory to your rifle. A cover protects your hands when the rail is free of accessories.

All Winchester rifles are designed and tested for lead and lead-free ammunition.

Having spent a lot of time with the new SX4[™], its efficiency and aim are beyond compare π

Nothing compares to roaming across fields with your dog and your SX4™. The hard work will bring its reward as you cook, eat and enjoy what you bring home with your family.

Suddenly, your faithful friend is rooted to the spot: he's just flushed a brace of hare or partridges. You shoulder your gun. The rib and the fibre optic let you home straight in on the first of them. You shoot. With the Active Valve system, recoil is not an issue and the second hare is in your sights in an instant. You fire again. It's a long-range shot, but with your Back-Bored™ barrel, it's in the bag.

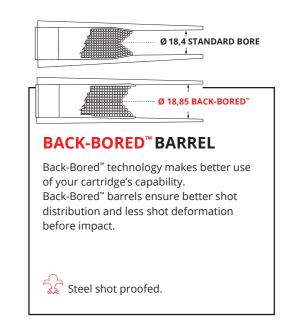

SYSTEM

This gun is designed to give the best performance with all types of

Lead-free ammunition guarantees that your gun will remain effective and give you many long years of service.

The SX4™ is redesigned to be the most reliable and the fastest semi-automatic shotgun with the least possible recoil. It operates as simply as possible through the use of a gas piston with an 'Active Valve' that adjusts automatically so you can use a wide range of different loads.

SX4[™] LEFT HAND

THE SX4 SEMI-AUTO IS THE FASTEST SHOTGUN IN THE WORLD, TO THE DELIGHT OF HUNTERS AND SHOOTERS WHO SEEK PERFORMANCE.

ow the SX4[™] 12-gauge is available in a left-hand version so everyone can enjoy its outstanding qualities to the full.

Every aspect of the SX4[™] has been revised to give left-handed shooters the best ergonomics with the finest shooting comfort. It features a specially designed stock and ejects the shells to the left.

The SX4™ left hand is available in black composite, wood and camo.

RANIERO TESTA

WORLD RECORD

Famous Italian shooter and multiple world-record holder Raniero Testa shares his secrets about being a champion and ardent hunter.

There's the Raniero with the rockstar appeal who pulls in the crowds to each of his shows. He broke his latest world record in January 2021 when he shot 17 hand-thrown clays in 2.08 seconds with his SX4™. Then there's the Raniero who enjoys the peace and quiet and being in touch with nature when out hunting. "My most memorable time hunting is on my home island of Ponza," he explains. "It's a unique place, where you need special permission to hunt. I wait for the migrating birds to fly by, looking out across the Tyrrhenian Sea, off the coast of Naples. There's no other experience I can compare it to."

Which leads to the question: how does one of the top sports shooters in the world pursue his passion for hunting? "They're two totally different things. Hunting is a lifestyle, not a sport," he states. "The most important thing to bear in mind when hunting is respect. We're there to maintain a natural balance, not to shoot. Respect for the game and safety come first."

The speed and reliability of the SXP™
make it a formidable gun
for competitive shooting

The stock firmly shouldered, you make your way to your stand. The rotating bolt gives you full confidence in your SXP $^{\text{\tiny{M}}}$.

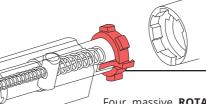

You are king of the game. A target appears; you squeeze the trigger. A perfectly consistent pattern of lead knocks it down. The 18.85 mm Back-Bored[™] barrel system proves its worth once again. With its minimum recoil, you can chamber a new round instantly. Another shot, another target down.

When the shooting is over, it only takes a few seconds to remove the drop-down trigger assembly. Maintenance is as simple and intuitive as firing.

This gun is designed to give the best performance with all types of ammunition

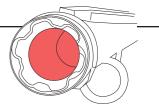

Lead-free ammunition guarantees that your gun will remain effective and give you many long years of service.

Four massive ROTARY
BOLT LUGS provide

support, strength and solid lockup in the barrel. As it recoils, the mass of your body slows the rearward travel of the shotgun, while the inertial motion of the bolt, slide and forearm continue cycling the action to give you a head start ejecting the fired shell.

Robust steel dual-action guide bars eliminate the twisting and binding that waste time and energy when cycling the

Hard chrome ensures highly ruggedized surfaces and better protection against corrosion. The **CHROME-PLATED** bore and chamber make our SXP™ shotguns completely safe for firing steel and other high-density shot.

MUZZLE BRAKES

The T1 muzzle brake softens recoil by up to 30%.

It has been specially developed for use with .308 Win, .30-06 Spr, .300 WM and smaller calibres.

We strongly recommend the use of hearing protection.

Winchester Xtra Pro Rain

Hunt in the dry! The Winchester Xtra Pro Rain clothing range is the best rain protection you can get.

Winchester Xtra Pro Wind

The Xtra Pro Wind membrane stops wind getting in through your Winchester clothes.

Winchester Xtra Pro Resist

With Xtra Pro Resist technology, you can hunt without worrying about thorns, brambles and nature's other little barbs scratching you or your clothes.

Winchester Xtra Pro Cold

During long days on the peg, the cold can spoil your comfort and performance. The superb insulation in the Xtra Pro Cold garments from Winchester offers great protection against the cold.

Winchester Xtra Pro Light

Start the day with a spring in your step. Winchester's Xtra Pro Light clothing combines light weight and technical performance whenever you are hunting on the move.

Winchester Xtra Pro Strech

Hunting is freedom. Freedom of movement more than anything. Winchester's Xtra Pro Stretch clothing lets you move with total ease.

Winchester Xtra Pro Breathable

The Xtra Pro Breathable clothes from Winchester are breathable for maximum comfort when hunting on the move.

Winchester Xtra Pro Hi-Viz

Be seen, be safe. Winchester's Xtra Pro Hi-Viz clothing is certified and highly visible for maximum safety.

LOOKING AHEAD TO LEAD-FREE

In its mission to develop new lead-free products, Winchester is living up to its role as a market leader by bringing you a range of solutions that feature alternative materials for your rifle and shotgun shooting activities.

At a time when new legislation in Europe is focusing interest on lead-free ammunition, Winchester is meeting the strictest demands for quality and performance, and is here to help you negotiate every step on your way to the lead-free new world.

WHEN AND ON WHAT BASIS WILL THE LEAD BAN COME INTO FORCE?

HUNTING CARTRIDGES

For wetland areas, the ban has been voted and will apply in <u>February 2023</u>. For other uses, the effective date of the ban is still under discussion.

RIFLE AMMUNITION

The date this ban will come into effect is still under discussion. This ban is not expected to apply **before late 2025**, but so far no date has been set or final decision made.

WINCHESTER HAS BEEN THE PREFERRED PARTNER FOR MILLIONS OF HUNTERS AND SHOOTERS FOR OVER 150 YEARS. WINCHESTER BUILDS ON THIS SOLID BOND AND SHARED EXPERIENCE TO DESIGN AMMUNITION THAT DELIVERS THE BEST PERFORMANCE AND TO MEET ALL YOUR SPECIFIC REQUIREMENTS.

GAME BIRDS

If you're after pheasant, partridge or hare, we have a cartridge specially designed for you and which delivers the quality you demand.

EXTRA DUO FAISAN:

TWO SIZES OF SHOT FOR PERFECT PATTERNING

PEST BIRDS

You're fixated on that breathtaking, magical moment when the wood pigeons fly overhead. It's such a fleeting moment that success is the only option

ZZ PIGEON:

VELOCITY AND POWER FOR LONG-RANGE SHOTS

SMALL WOODLAND GAME

The woodcock is queen of the woods for many hunters, including you. These cartridges combine two shot sizes to give you improved patterns for close-range shooting in dense cover.

EXTRA DUO BÉCASSE :

TWO SIZES OF SHOT FOR PERFECT PATTERNING

WATERFOWL & WETLANDS

You've trudged out across the marsh and waited patiently for the ducks to flight. When the action comes, you want a cartridge that never lets you down. A cartridge that is fast and lethal.

ZZ CANARD:

WINCHESTER®'S FASTEST STEEL SHOT CARTRIDGE

WHICH STEEL SHOTSHELL FOR YOUR SHOTGUN?

KNOM ?

Every WINCHESTER® shotgun with an interchangeable choke is steel shot

proofed and has a "fleur-de-lys" 🚼 stamped on the barrel.

They can fire all steel shotshells, from standard to high-performance. Only "standard" steel shotshells can be fired from shotguns that are "standard" proofed to 930 bars.

For more information on steel shot and the rules governing their use, visit winchestereurope.eu/steel

MEDIUM GAME

The thin bones, thin hide and limited tissue density of light game (roe deer, mouflon, fallow deer) require bullets that expand rapidly on impact.

When choosing WINCHESTER®, go for the versatile Power Point® or the innovative Ballistic Silvertip®.

See pages 74 and 75 for product information.

MEDIUM TO HEAVY GAME

The heavy bones, thick hide and dense tissue of medium to heavy game (boar, fawn, doe) require bullets that strike a balance between expansion and mass retention.

When choosing WINCHESTER®, go for the exclusive Extreme Point™ in lead or the all-new, all-copper Extreme Point™.

See pages 76 and 77 for product information.

PAINAGE				

HEAVY GAME

The heavy bones, very thick hide and extremely dense tissue of heavy game (large boar, stag, elk) require bullets with high mass retention for deep penetration.

When choosing WINCHESTER®, go for the technical effectiveness of the Power Max® or the performance of the Accubond®.

See pages 78 and 79 for product information.

VARMINTS

The very fine bones and hide and low tissue density of varmints (fox, stone marten) require bullets that expand immediately on impact. When choosing WINCHESTER®, go for the snappy Varmint-X® or the velocity of the Varmint-X® Lead-free.

-FEATURED PRODUCTS-

SPEC OPS ELITE HP5 (SPEC

BTC-8E-HP5

The Spec Ops Elite HP5 features the highest quality 24 MP image resolution on the market today. The invisible, adjustable power "Night Vision" IR illumination reaches out to 100 ft., thanks to the new RADIANT 5 Night Illumination Technology. The new Spec Ops Elite HP5 camera also features an incredible 1920 x 1080 Full HD video processor, capable of producing stunning video footage of your game that can be easily viewed on a computer or big screen TV. Additional features include a 2" color view screen and Smart IR Video, which continues to record video footage while game is moving in front of the camera. SD Card Management options allow you to overwrite older images on the SD card if the memory is full. This camera is perfect for surveillance of game animals that are easily spooked, as well as a great security camera around your home or hunting property.

DARK OPS PRO DCL

The Dark Ops Pro DCL has the most robust feature set in our Dark Ops camera series. These cameras feature an Infrared Illumination System to increase picture quality and range at night like never before. The Invisible IR Illumination ensures game or trespassers on your property do not detect the camera while it is capturing images or videos. The Dark Ops Pro DCL features "Dual Camera Lens Technology". This feature incorporates a custom tuned daytime camera lens to produce razor sharp daytime images, while the dedicated night camera lens takes incredibly clear nighttime photos. This camera packs all the performance you would expect with 26MP picture quality, 1080p Full HD video with sound, lightning fast 0.15 second trigger speeds, and superior battery life. Additional features include SD card management options and Smart IR video to keep recording game during the daytime. The Dark Ops Pro DCL is compatible with up to 512GB SD cards.

DARK OPS FHD DARK OPS HO

The Dark Ops Full HD cameras from Browning feature an upgraded image processor that produces amazing 1080p Full HD videos of game on your property. The new Dark Ops Full HD also features the all new Radiant 4 Night IR Illumination, in a wavelength that is invisible, and can not be detected by animals or humans. The invisible illumination makes this a perfect camera for camera shy bucks, or for use in a security application on your property. Other features include lightning fast 0.135 - 0.7 second adjustable trigger speeds and adjustable IR Illumination with Long Range and Economy modes, to custom tailor your camera for open fields or wooded areas. The Dark Ops Full HD also features a battery meter that is compatible with Alkaline, Rechargeable and Lithium batteries.
