HOOKS

QM1
/ 10 PER PACK

Designed for hair rigging baits on self-hooking setups, this revolutionary hook will dramatically reduce fish loss. The short, swept shank and super-sharp, offset, beaked point offer unrivalled penetration and perfect hook holds. The PTFE coating prolongs durability, while the large eye allows use with the thicker lines that are associated with modern fishing styles. A range of sizes from 18 up to 10, means there is a QM1 to suit all situations, hook baits and fish.

CODE	DISCRIPTION
GQ10	QM1 Hook - Size 10
GQ12	QM1 Hook - Size 12
GQ14	QM1 Hook - Size 14
GQ16	QM1 Hook - Size 16
GQ18	QM1 Hook - Size 18

SUPER LWG
/ 10 PER PACK

A premium version of the proven LWG hook. The Super LWG pattern comes with a durable PTFE coating, which takes the hook to a whole new level of sharpness and strength. A strong all-round hook that is ideal for pole, float and feeder fishing. Super sharp 'Wasabi' point is uniquely shaped for maximum durability and perfect hook holds.

GMW20	MWG Hook - Size 20

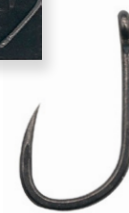

MWGB BARBED

/ 10 PER PACK

The micro barbed version of the MWG has quickly become a firm favorite with specimen and pleasure anglers, as well as anglers on the European match circuit. It has also been adopted by some of the UK's best specimen hunters, targeting tench and most notably, big barbel. The strongly forged wire and eye wateringly sharp Wasabi point combine to produce a hook that can be relied on to land that coveted specimen.

CODE	DISCRIPTION

LIGHT WIDE GAPE FEEDER /
/ 10 PER PACK

With the resurgence in popularity of angling on natural waters, Guru have been working to develop the perfect hook for more demanding situations where presentation is still key. The end result is the LWGF hook the Light Wide Gape Feeder. Developed for tackling big lakes, reservoirs, rivers and canals in the UK and Europe, it's the perfect pattern for bream, skimmers, hybrids, chub, perch, tench, smaller carp and similar species. It's also a versatile performer and can be used on a feeder or bomb rig, or on the pole. Available in sizes 10-20 in barbed format only.

GLWGF20	Light Wide Gape Feeder Hook Size 20

LWG FEEDER SPECIAL
/ 10 PER PACK

The original Feeder Special spade-end pattern has been super popular over the years, and naturally public demand and ideas from our match team have helped us develop an eyed version of this pattern! The main use of this hook of course is for hair-rigging baits. When hair rigging, anglers are often targeting bigger fish, so we've stepped-up the wire gauge of these hooks slightly compared to the spade versions, adding more strength to it. The wide gape, in-turned beaked point, and super sharp/durable black nickel finish makes the hook ideal for ledgering and feeder fishing offering ultimate fish-hooking potential, prolonged sharpness and incredible strength. This latest eyed version is ideal for hair-rigging all kinds of baits, ideally worms and corn when bream fishing, but equally at home with a hair rigged band for pellets in a river situation, or even a hair-rigged bayonet for bream etc on big naturals. With sizes from a 10 down to a 20, possibilities are endless!

NEW 2023

LWGF XS
/ 10 PER PACK

Our Feeder Special hooks are a favourite among natural-venue anglers across the whole of Europe, and adding another layer to this popular pattern to make it even more versatile has seen us develop the EXTRA STRONG XS versions in both Eyed and Spade. The added strength of these patterns makes them perfect for demanding bagging or big-fish situations, with increased wire thickness really enhancing the power these hooks have for both pole and rod-and-line work. The shape of this hook featuring a wide gape with a 'beaked' point suits them to wide variety of baits - maggots, worms, corn, meat and more. Of course, the Spade version is more suited to putting baits on the hook itself, while the Eyed version is superb for hair rigging or banding with baits like wafers, pellets, worms, meat and corn. The black nickel finish on the hook means these hooks retain ultimate sharpness and durability, something that all our natural venue hooks are renowned for!

F1 PELLET HOOK / 10 PER PACK

The F1 Pellet hook has been designed for targeting the F1 carp, a fish found in many commercial fisheries. They're strong, yet relatively fine in the wire, which makes them able to land even quite large carp on the pole. They feature a beaked point for extra secure hook holds and an oversized spade, which allows them to be used with thicker line, for robust bagging situations.

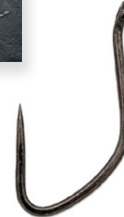

CODE	DISCRIPTION
GF1P14	F1 Pellet Hook - Size 14
GF1P16	F1 Pellet Hook - Size 16
GF1P18	F1 Pellet Hook - Size 18
GF1P20	F1 Pellet Hook - Size 20
GF1P22	F1 Pellet Hook - Size 22

F1 MAGGOT / 10 PER PACK

This is the new Guru F1 Maggot Hook, and is the perfect shape for smaller baits such as maggots, casters, pinkies, or similar. It has a thin wire so as not to damage the bait, and a super fine, straight point, with the narrow gape meaning the bait sits neatly on the bend. Like the F1 Pellet Hook, it is PTFE coated, barbless and has a neat spade end, with a range of sizes from 14 to 22 covering everything from fishing on commercials for F1s right down to snatching bits on a canal in winter.

CODE	DISCRIPTION
GF1M14	F1 Maggot Hook - Size 14
GF1M16	F1 Maggot Hook - Size 16
GF1M18	F1 Maggot Hook - Size 18
GF1M20	F1 Maggot Hook - Size 20
GF1M22	F1 Maggot Hook - Size 22

F1 EYED / 10 PER PACK

The Guru F1 Eyed hook is lightweight and strong making it ideally suited for hair rigging baits when a delicate approach is required. The out turned eye allows the hook to sit at the perfect angle for pole fishing, which combined with the needle sharp point and wide gape means more bites are converted. Suitable for banding pellets, maggots and casters.

CODE	DISCRIPTION

GF1E16	F1 Eyed - Size 16
GF1E18	F1 Eyed - Size 18
GF1E20	F1 Eyed - Size 20
GF1E22	F1 Eyed - Size 22

KAIZEN / 10 PER PACK

This unique pattern has an offset point and huge gape, which combine to help you hit more bites and lose less fish. It's made from fine, super-strong wire and has an oversized spade, which allows you to target bigger fish!

CODE	DISCRIPTION
GK10	Kaizen Hook - Size 10
GK12	Kaizen Hook - Size 12
GK14	Kaizen Hook - Size 14
GK16	Kaizen Hook - Size 16
GK18	Kaizen Hook - Size 18
GK20	Kaizen Hook - Size 20

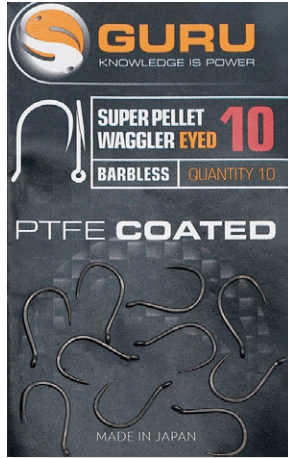

KAIZEN EYED / 10 PER PACK

The Kaizen Eyed is as the name suggests our super popular Kaizen hook with an eye instead of a spade which makes this hook ideal for many different fishing styles. Whether it's to target big carp on the pole or to fish with hair rigged worms on the feeder doesn't matter.

- Eyed version of the mega popular kaizen hook
- Ideal for use with any hair-rigged bait
- Out-turned eye makes this hook ideal for pole fishing and also feeder fishing
- Massively offset point
- PTFE coated
- Very wide gape

SUPER PELLET WAGGLER / 10 PER PACK

The Super Pellet Waggler hook is especially designed for pellet waggler fishing. The model lends itself to be used in combination with hair rigs. Together with the super wide gape, strength, sharpness, coating and the wasabi point is this hook the perfect pellet waggler tool!

- Super version of the mega popular Pellet Waggler hook
- Ideal for use with any hair-rigged bait
- PTFE coating for extra sharpness and strength
- Big wide gape
- Very sharp wasabi point
- Ideal for pole and waggler fishing.

POLE SPECIAL

/ 10 PER PACK

The Pole Special is designed to suit many natural water fishing situations. The fine but super strong wire provides the perfect balance of finesse and strength. Suitable for maggots, casters, pinkies, bloodworm and worms.

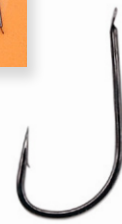

SUPER FINE POLE

/ 10 PER PACK

The Super Fine Pole Hooks is especially designed to target big numbers of silvers and comes really to its right when delicate styles of fishing are required. The long shank in combination with the super sharp point makes this hook unbeatable when a delicate approach is required.

- Micro barbed, spade end hook
- Ideally suited for natural waters
- Super fine wire, black nickel finish
- Brilliant hook for targeting large numbers of small fish
- Long shank helps with quick unhooking
- Ideal for use with maggots, casters, squatts, pinkies, bloodworms and joker

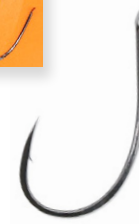

MATCH SPECIAL BARBED

/ 10 PER PACK

The Match Special hook features a really aggressive shape which makes this hook ideal for feeder fishing. The Aggressive shape in combination with the black nickel finish, long shank and fine wire make this pattern incredibly versatile and truly all round.

- Micro barbed, spade end hook
- Ideally suited for natural waters
- Fine wire, black nickel finish
- Long shank helps with quick unhooking
- Wide gape lends this hook to being used with many baits
- Ideal for use with maggots, casters, pinkies, bloodworms and worms

KURANKU BARBED

/ 10 PER PACK

This is a new hook pattern and style of hook that is designed for natural-style venues where a barbed hook is needed. The unique crank-style shape to the hook, combined with its durable black nickel material, means it maintains a lot of strength while having a fine-wire diameter to make the hook lightweight. This is vital when targeting bream, skimmers and other silverfish, when a lightweight hook pattern gets anglers a lot more bites from finicky fish. The wide gape and offset point give the hook ultimate hooking potential and a firm hold on fish, and being forged, the hook has ultimate strength for its fine wire diameter. The fine/light nature of the hook makes it perfect for a range of baits, in particular maggots, pinkies, bloodworm, redworms, casters and smaller pieces of dendro-baena. Perfect on natural venues and sure to be a big hit on the continent.

FEEDERS

X-SAFE SYSTEM COMPATIBLE

METHOD FEEDER X-SAFE SYSTEM

1 PER PACK

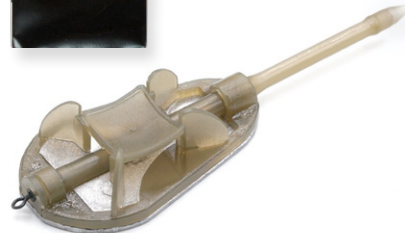

A revolutionary advancement in design has brought Guru Method Feeders to the forefront of the market. The unique X-Safe System does away with fixed tether-style elasticated setups to offer all the benefits of elastic in a system as safe as a free-sliding inline. The central platform provides optimum positioning of the hook bait.

CODE	DISCRIPTION
GLMX45	45g Large Method Feeder (X-Safe System)
GLMX	28g Large Method Feeder (X-Safe System)
GSMX36	36g Small Method Feeder (X-Safe System)
GSMX	24g Small Method Feeder (X-Safe System)

METHOD FEEDER IN-LINE

1 PER PACK

Guru's In-Line Feeder system gives you all the benefits of this revolutionary feeder design, without the elastic. Tapered in shape with weight-forward loading, the In-Line Method Feeders fly long and true. Subtly coloured frames and tubes ensure maximum camouflage on the lake bed.

CODE	DISCRIPTION
GLMI45	45g Large Method Feeder (In-Line System)

The Hybrid Pellet Feeder offers a compact design yet has substantial weight, which makes it perfect for feeding small amounts of bait at different ranges. The new wider, open front makes loading and bait release super-efficient. The feeder is also compatible with the X-Safe system, and is finished in hardwearing camo paint for perfect disguise on the lake bed.

X-SAFE SYSTEM COMPATIBLE

MAGGOTFEEDER

1 PER PACK

The Maggot feeder is especially designed to be used with live maggots. The compact and slim design allows you to load the feeder nice and evenly by just opening the cap on the end of the feeder. The Maggot feeder is incredibly versatile and can be used as an inline feeder, but can also be fished with our X-Safe stems or it can be attached by a standard swivel connection.

- Aerodynamic weight forward design
- Enables anglers to be extra accurate
- Strategically placed holes for optimal bait release
- Quick load lid easily clips open and closed
- The low profile makes the feeder discrete
- Holds the bottom effectively in flow
- Rigid base with micro studs helps the feeder grip on slopes
- Can be used inline, clipped on with the swivel attachment, or with the X-Safe system
- Suitable with other baits, not just maggots like casters and hemp, micro pellets or chopped worm

X-CHANGE DISTANCE FEEDER

The X-Change Feeders have revolutionized an anglers ability to change the weight on a feeder. The interchangeable weight system allows you to change the weight of the feeder instantly, together with the weight forward design to maximize casting distance. Available in Extra Small, Small, Medium and Large, in cage or solid body design the smooth internal profile allows bait to release efficiently and the line attachment avoids tangles and damage to main line. All weights are compatible with the full range of X-Change Distance Feeders.

PARTICLE CAP

The Particle Cap is designed as a cap that can be clicked on the X-Change Bait Up feeders. This cap allows you to use less ground bait and more particles or live bait.

- Click on cap for the top of x-change bait up feeders
- Cap closes off the top of the feeder
- Allows more particles to be fed with minimal ground bait
- Vented for easier retrieve and bait release
- Cap is removeable once fitted
- 2 caps per pack

WINDOW FEEDER

2 PER PACK

Window feeders have really come to the forefront of feeder fishing in recent years across the whole of Europe. With several on the market, we've been keen to tweak, adapt and try to produce the most versatile and up-to-date Window Feeder. The Window feeder is especially designed to use with loads of live baits and particles with just a minimal amount of ground bait.

- Ultimate aerodynamic feeder, weight forward, allowing anglers to cast distances that are impossible to reach with any other feeder design
- Incredibly accurate for casting, even in extremely poor conditions and high winds
- Unique X-change weight system allows the weights of the feeders to be changed quickly and easily, giving anglers ultimate versatility and efficiency changing the weight without unclipping the whole feeder
- Allows anglers to carry less feeders thanks to versatility
- Size range caters for all eventualities
- Window area designed to be the optimum size to hold-in bait on a cast, but for bait release
- Small front lip on the feeder helps bait grip in the feeder on the cast and in deep water
- Strategically placed holes for optimum bait release
- Extra durable, large swivel eye attachment on the top of the feeder
- Super tough material, durable and long lasting in all terrain

CAGED WINDOW FEEDER / 2 PER PACK

Designed for accurately feeding particles and ground bait at all distances, the 'open cage' design of this feeder also offers rapid bait release over the standard X-Change Window Feeder. The weight-forward bullet cuts through the air in even the most turbulent and windy conditions, helping anglers achieve ultimate accuracy at the extreme distance. Suitable for use with a wide range of particle baits such as casters, maggots, chopped worms, hemp and pellets. These feeders leave an attractive trail of bait as they fall through the water due to the open cage design, before depositing the main load of bait quickly over a controlled area on the bottom. The X-Change weight system makes it extremely versatile as the casting weight can be fine-tuned quickly and easily during your session in a matter of seconds.

- X-Change Weight System allows the weight to be quickly and easily adjusted
- Weight forward, tapered design for increased distance and accuracy
- The 'Open Cage' design offers a very quick and attractive bait release
- Unique design is great in both deep and shallow venues
- Available in five sizes XS, S, M, L and Bait-Up
- Large open cage panels offer a vast range of baiting and feeding options
- Discreet Guru Camo Finish
- Can be used with the Guru Micro Lead Clip System

READY RIGS

BAYONET

10 CM 38 CM

4" 15"

SMWG BAYONET READY RIG / 8 PER PACK

NEW 2023

The SMWG Bayonet Ready Rigs are the perfect hooklength option for hair rigging hookbaits like wafers, boilies, and pop-ups. The SMWG rig features a Guru Bayonet at the end of the hair rig. This is intended to be pushed into your chosen hookbait. You'll also notice a tiny piece of 0.3mm Micro silicone on the shank of the hook and hair rig which is there to keep the hookbait in place and make sure the rig is working perfectly. These Ready Rigs work exceptionally well when you're fishing the Hybrid/Method feeder for carp and F1's with wafter hookbaits. The loop in the end of the Bayonet enables semi-buoyant wafers to sit upright off the bottom and work as intended. This version features the extremely popular SMWG hook, which is PTFE coated, giving a super-sharp, longer lasting point.

SPEED STOP

10 CM 38 CM

4" 15"

SMWG SPEED STOP READY RIG / 8 PER PACK

NEW 2023

The Speed Stop Ready Rig features an optimum hair length which has been purposely developed to perfectly present most popular hookbaits. Finishing off the hair is a Speed Stop in the end which traps the hookbait on to the hair. There is also a tiny piece of 0.3mm Micro silicone on the shank of the hook which is there to keep the hookbait in place and make sure the rig is working perfectly. The process of using the Speed Stop is quick and easy, simply push a Speed Stop Needle in the thicker end of the Speed Stop, then push the thinner end of the Stop through the hookbait, making sure the Stop is fully through the bait and lying flat against it. Then simply remove the Needle and you've got the perfectly presented hookbait ready to go. All SMWG hooks are PTFE coated which significantly improve the hooks durability, sharpness and longevity.

SMWG READY RIG BAIT BANDS / 8 PER PACK

The 4" Super MWG Ready Rig is perfect for Method, Hybrid and Pellet feeder fishing on commercial fisheries. The SMWG 4" Banded Ready Rigs work perfectly with baits like pellets, wafers, boilies and maggots. The 4" length is the ideal length to cover method, hybrid and pellet feeder situations.

In the 10, 12 and 14 sizes we have improved the line diameter options to offer even more choice in these larger sizes.

Each Ready Rig is tied using the highest quality components available to create the best possible Rig. The super strong N-Gauge line is used on each rig, offering supreme strength and durability.

The sizes range from a 16 right through to a 10 and each spool comes supplied with 8 hooks.

SMWG STANDARD HAIR READY RIG / 8 PER PACK

Updated Ready Rigs featuring a standard pre-tied hair-rig on our popular SMWG hooks, ready and perfectly tied! Ideal for a range of baits - corn, meat, soft pellets, wafers, bread and mini boilies etc. Being tied perfectly with a neat piece of silicone to hold the hair rig in place, more and more match anglers are using our Ready Rigs. They have requested the same sizes of hooks but tied to different diameters of line. We are now offering this

versatility within our Ready Rigs. For example, a size 10 SMWG may be used on 0.19mm or 0.22mm N-Gauge depending on the situation, so we offer both! All our Ready Rigs are tied to our popular and reliable N-Gauge line. The 15 inch length is perfect for straight lead or feeder work, and can be cut down if needed to suit. Come supplied on a protected EVA spool that fits straight in the Rig Box.

F1 PELLET POLE RIG / 8 PER PACK

Spade end for perfect presentation when pole fishing

- PTFE coating gives low-glare finish and adds durability
- Tied at a versatile six inches in length
- Tied with renowned N-Gauge hook link material

CODE	DISCRIPTION
GRR055	F1 Pellet Pole Rig 6" Size 14 [0.15mm]
GRR056	F1 Pellet Pole Rig 6" Size 16 [0.13mm]
GRR057	F1 Pellet Pole Rig 6" Size 18 [0.11mm]
GRR058	F1 Pellet Pole Rig 6" Size 20 [0.11mm]
GRR059	F1 Pellet Pole Rig 6" Size 22 [0.11mm]

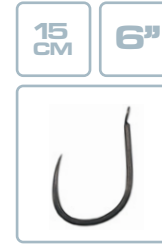

LWGS POLE RIGS / 8 PER PACK

Lightweight, strong hooks that are great for pole fishing

- Spade end for perfect presentation
- Tied at a versatile six inches in length
- Tied with renowned N-Gauge hook link material
- Great for all fish up to match-sized carp

CODE	DISCRIPTION
GRR060	LWGS Pole Rigs 6" Size 12 [0.17mm]
GRR061	LWGS Pole Rigs 6" Size 14 [0.15mm]
GRR062	LWGS Pole Rigs 6" Size 16 [0.13mm]

LINES

N-GAUGE NYLON

N-Gauge is a Japanese premium quality extra strong mono, which is accurately rated in diameter and breaking strain. Designed for feeder hook-lengths and pole rigs for commercial carp and top level competition fishing.

CODE	DISCRIPTION
GNG11	N-Gauge 3lb [0.11mm]
GNG13	N-Gauge 4lb [0.13mm]
GNG15	N-Gauge 5lb [0.15mm]
GNG17	N-Gauge 6lb [0.17mm]
GNG19	N-Gauge 7lb [0.19mm]
GNG22	N-Gauge 9lb [0.22mm]
GNG25	N-Gauge 12lb [0.25mm]

N-GAUGE PRO NYLON

N-Gauge Pro is a Japanese premium quality, extra strong copolymer which is accurately rated in diameter and breaking strain. Designed for pole rigs and hooklengths and all styles of top level competition fishing.

N-Gauge Pro has been produced in a clear colour, to help your hooklength or rig camouflage into as many surroundings as possible. N-Gauge Pro is also very supple, helping you achieve a better presentation.

CODE	DISCRIPTION
GNG08	N-Gauge Pro 1lb [0.08mm]
GNG09	N-Gauge Pro 1.5lb [0.09mm]
GNG10	N-Gauge Pro 2lb [0.10mm]

PULSE-LINE NYLON

Pulse line takes advantage of the latest line technology with low-stretch and high abrasion resistance coupled with great casting and sinking properties to create the ultimate mono main line. Great for both feeder and waggler fishing, Pulse comes on 300m spools with a marker at 150m for accurate re-spooling.

CODE	DISCRIPTION
GPUL3	Pulse-Line 3lb [0.16mm] 300m
GPUL4	Pulse-Line 4lb [0.18mm] 300m
GPUL5	Pulse-Line 5lb [0.21mm] 300m
GPUL6	Pulse-Line 6lb [0.22mm] 300m
GPUL8	Pulse-Line 8lb [0.25mm] 300m
GPUL10	Pulse-Line 10lb [0.28mm] 300m

PULSE PRO NYLON

Pulse Pro is a super-high quality line, developed using the latest technology to be ultra low-stretch and high-performance. The line is a fine diameter to aid casting distance, but has exceptional strength.

- Super high-performance modern line
- Extra low stretch for enhanced bite detection
- Fine diameter but very high strength
- Smooth nature, for easy casting and distance
- Incredible abrasion resistance
- Natural green colour is very subtle
- Line marker sticker at 150m on the 300m spool
- Long lasting line retains all qualities for a long period

CODE	DISCRIPTION
GPRO05	Pulse Pro 5.3lb 0.18mm
GPRO06	Pulse Pro 6.1lb 0.20mm
GPRO08	Pulse Pro 8.8lb 0.24mm
GPRO10	Pulse Pro 10.2lb 0.27mm

NEW 2023

N-GAUGE SUPERNATURAL

N-Gauge Supernatural is a premium top-end monofilament, developed for pole rig and hooklength material. The key asset of this clear-coloured line is the diameter to breaking strain ratio, it is incredibly strong while retaining a thin diameter – vital traits of a modern-day mono. Another important characteristic we aimed to achieve with this fishing line was to create a trait for it to be 'gripping' and 'non-slip' in its nature. This really lends Supernatural to knot tying and spade-end hooks in particular. This is the biggest difference between Supernatural and our original and popular 'N-Gauge' that has slightly different characteristics been a copolymer line. Supernatural also has very little stretch and is highly resistant to abrasion, making it perfect for catching lots of fish in demanding situations. To maintain the super high quality we've ensured the line it level-wound onto the spool, and provided it on 150m spools, ensuring the line leaves the spool in its perfect form. Highly accurate diameters and breaking strains suit this line to the most precise and particular anglers.

CODE	DISCRIPTION
GNSN08	Super Natural Clear 0.08mm
GNSN10	Super Natural Clear 0.10mm
GNSN12	Super Natural Clear 0.12mm
GNSN14	Super Natural Clear 0.14mm
GNSN16	Super Natural Clear 0.16mm
GNSN18	Super Natural Clear 0.18mm
GNSN20	Super Natural Clear 0.20mm
GNSN23	Super Natural Clear 0.23mm
GNSN26	Super Natural Clear 0.26mm

PURE FLUOROCARBON

This high spec fluorocarbon is virtually invisible in water, has excellent knot strength and an extremely low diameter. Use for tying hooklengths or as a pole line to give your presentation the highest level of subtlety and finesse. The larger diameter Pure is perfect for fast sinking leaders.

CODE	DISCRIPTION
GFC08	PURE Fluorocarbon 0.08mm
GFC10	PURE Fluorocarbon 0.10mm
GFC12	PURE Fluorocarbon 0.12mm
GFC14	PURE Fluorocarbon 0.14mm

GFC25	PURE Fluorocarbon 0.25mm
GFC30	PURE Fluorocarbon 0.30mm

NEW 2022

DRAG-LINE NYLON -1000M

Drag-line is an extra strong, super abrasion-resistant monofilament reel line designed specifically to cope with the demands of modern tactics and heavy-duty fishing. Not only is it extra tough, Drag-line is also supple for easier casting. High knot strength gives you maximum confidence when casting heavy feeders and fishing close to islands and snags! Drag-line is accurately rated in diameter, so you know you're getting exactly what you need. It also has low visibility once underwater, making it the ultimate choice when you need to combine strength and stealth to catch big, hard-fighting fish from pressured waters.

- Super strong abrasion-resistant
- Supple
- Low visibility
- Maximum stretch
- Supplied on bulk spools of 1000m

CODE	DISCRIPTION
GDR10	Guru Drag-Line 10lb/0.30mm 1000m
GDR4	Guru Drag-Line 4lb/0.20mm 1000m
GDR6	Guru Drag-Line 6lb/0.25mm 1000m
GDR8	Guru Drag-Line 8lb/0.28mm 1000m

PULSE-8 BRAID

Pulse8 is a top quality eight carrier braid main line - eight carrier means it's produced using eight tightly woven fine strands, rather than the more usual four, creating a supple, ultra thin, super strong braid. Perfect for feeder or bomb fishing when feel and direct contact is vital, it's the ultimate distance casting braid too.

CODE	DISCRIPTION
GPULB8	Pulse-8 Braid [0.8mm] 150m
GPULB10	Pulse-8 Braid [0.10mm] 150m
GPULB12	Pulse-8 Braid [0.12mm] 150m

SHIELD SHOCKLEADER

Shield is a purpose designed shock absorbing leader. Use Shield for distance casting with low diameter lines or braids with heavier leads and feeders.

CODE	DISCRIPTION
GSSL1	Shield Shockleader Line 8lb 0.28mm 100M
GSSL2	Shield Shockleader Line 10lb 0.3mm 100M
GSSL3	Shield Shockleader Line 12lb 0.33mm 100M

NEW 2023

X-CHANGE BAIT UP BRAID

Guru X-Change Bait Up Braid is a braided mainline designed for baiting up your swim effortlessly when fishing at medium to long range. The 30lb tensile breaking strain braid has an incredibly low diameter of just 0.16mm, this will allow a Bait Up Feeder or spod to be cast at long range with pinpoint accuracy. Bait Up Braid is very durable, it has excellent knot strength and can be used straight through to the Bait Up Feeder or spod however we do recommend using a heavier leader to prevent crack-offs, when fishing at long distances. Keeping the braid damp whilst in use will also help to prevent frap-ups around your rod rings. The Hi-Vis fluoro Guru orange colour not only makes it very visible when in use, but also helps to scare birdlife from your swim.

- 150m spool
- High performance braided line
- Super strong low diameter braid
- High visibility
- Smooth casting
- Good knot strength
- Durable
- Can be used direct to the Bait Up Feeder
- 30lb (tensile) - 0.16mm diameter

CODE	DISCRIPTION
GSPB	X-Change Bait Up Braid

ACCESSORIES

POLE POTS

We've designed a range of pole pots, from scratch, to address the shortcomings of the ones we had to use previously! Our range includes small, medium and large pots. The small ones have special sprinkle lids for quick-and-easy loading. One of the small pots has specially configured holes in it, to allow easy baiting with pellets and other soft baits, and one without holes for use with maggots. The medium and large pots come with two lid choices in a pack, one with a narrow lip for use with maggots and meat, and one with a wider lip, which is perfect for drip-feeding pellets. The pots are made from superlight, two-tone plastic, which makes for easy shipping and won't spook fish! Finally, the clever, X-Soft fitting will accept a range of top kits, of different diameters, without damaging the pole.

CODE	DISCRIPTION
GPPL	Pole Pot Large - 2 per pack
GPPM	Pole Pot Medium - 2 per pack
GPPP	Pole Pot Paste - 2 per pack
GPPS	Pole Pot Small - 2 per pack
GPPX	Pole Pot XL - 1 per pack
GPPXS	Pole Pot Extra Small - 2 per pack

RAPID RELEASE POLE CUPS / 3 PER PACK

Rapid release Pole Cups feature 3x pole cups and 1x pole connector, the vented cups to stop bait sticking and the flat front aids scooping through bait. These super quick release cups are perfect for groundbait, maggots, pellets and all other baits. We recommend the pole connector is fitted internally for extra strength.

CODE	DISCRIPTION
GRRC	Rapid Release Pole Cups

SPRINKLE LIDS

2 PER PACK

Due to the popularity of the sprinkle lid featured on the small pole pots we have created sprinkle lids for both the medium and large pots which can be purchased separately. They are suitable for fishing with maggots or pellets and enable you to easily load your bait without removing the lid.

CODE	DISCRIPTION
GSLL	Sprinkle Lids Large
GSLM	Sprinkle Lids Medium

POLE ELASTIC CONNECTOR / 5 PER PACK

Guru Pole Elastic Connectors give the perfect elastic to rig connection and are ideal for all types of pole elastic. The coated braid 'kicks' the pole rig away from the pole tip to eliminate tangles. Internal bore of the bead locks elastic knot securely in place and the bead also doubles as the perfect puller bead. Five beads to coated braid per pack come in sizes small, medium and large.

CODE	DISCRIPTION
GECL	Elastic Connector Large
GECM	Elastic Connector Medium
GECS	Elastic Connector Small
GECXS	Elastic Connector Extra Small

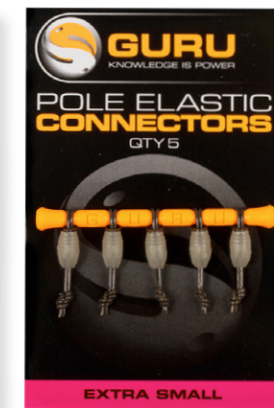

PLUMMETS

2 PER PACK

Guru Inline Plummets feature a unique design for unrivalled accuracy when feature and depth finding. The plummets are designed so the line goes straight through the middle of the plummets axis, allowing anglers to find the depth with millimetre accuracy.

CODE	DISCRIPTION
GPL10	Plummets 10g
GPL20	Plummets 20g
GPL30	Plummets 30g
GPL45	Plummets 45g
GPL60	Plummets 60g

REAPER POLE SOCK / 1 PER PACK

The Reaper Pole Section Retainer is the ultimate in pole section storage. Unique in possessing three separate pole retaining options - two pole socks and a middle, 'tulip' grip. It will house anything from a no4 section up to a 16m section. Pole Socks are both set at the optimum depth for easy storage of sections and the frame is coated in pole-friendly EVA foam.

CODE	DISCRIPTION
GRPS	Reaper Pole Sock

BACK TO CONTENTS

TERMINAL TACKLE

BAITING NEEDLE / 1 PER PACK

The concealed barb and fine tapered point prevents damage to delicate baits, while the flared handle allows pressure to be applied easily.

CODE	DISCRIPTION
GBN	Baiting Needle

SPEEDMESH NEEDLE / 1 PER PACK

Designed for threading hooklengths through PVA bags or sticks. The gate-latch mechanism allows the hooklength loop to be positioned inside the clasp and pulled through PVA sticks.

CODE	DISCRIPTION
GSN	Speedmesh Needle

BAIT DRILL / 1 PER PACK

The Guru bait drill has been designed to make drilling hard baits, like pellets and tough boilies, child's play. Rather than twisting the handle of the drill, the team designed a drill that allows the bait itself to be twisted onto the bit.

CODE	DISCRIPTION
GBD	Bait Drill

TERMINAL TACKLE

SPEEDSTOPS WITH NEEDLE / 1 PER PACK

The Speedstop system allows ultra-quick mounting of drilled pellets, soft pellets, corn luncheon meat, boilies and worms onto the hair rig.

CODE	DISCRIPTION
GSSN	Speedstops with Needle

SPEEDSTOPS / 36 PER PACK

Guru Speed Stops cut down baiting time, removing the need for bait stops. The speed stops are tied directly to the hair rig and are of a low diameter, preventing damage to baits. Ideal for drilled pellets, soft pellets, meat, corn, boilies and worms.

CODE	DISCRIPTION
GSS	Speedstops

RIG SCISSORS / 1 PER PACK

Featuring fluorescent coloured handles making them easy to locate in your rig box. Stainless steel blades ensure they'll stand the test for time.

CODE	DISCRIPTION
GRS	Rig Scissors

DISGORGERS / 1 PER PACK

The QM1 is the shorter disgorger, and it has been designed for all-round work, with hook patterns like the effective QM1 in mind. The Conti is a longer disgorger, that has been designed for use when feeder fishing with longer hook links, where deeper hook holds might be encountered, especially with

CODE	DISCRIPTION
GD1	Conti Disgorger
GD2	QM1 Disgorger

ream. Both patterns feature a specially designed head is rounded to minimise damage and allows you to pop the hook out easily and safely. Both are made from robust plastic, with a super-strong cross-shaped cross section.

PELLET CONES / 3 PER PACK

This pack includes three cones, plus a super-fine baiting needle. Guru Pellet Cones are the ultimate way to present a small, compact pile of feed around your hook bait. This tangle-free presentation is ideal for use with small softened feed pellets as well as groundbait.

CODE	DISCRIPTION
GPC	Pellet Cone (3 sizes per pack)

PELLET PLIERS

/ 1 PER PACK

Designed to make the fiddly process of banding your bait effortless, you simply place a bait band over the nibs at the end of the pliers and squeeze the easy-grip handles until the band is stretched wide enough to accept your chosen bait. Once in position, release the pressure from the handles to leave the band gripping the bait. Can be used with any size bait bands, 2mm plus, and any sort of bait.

CODE	DISCRIPTION
GPP	Pellet Pliers

SPEED BANDER

/ 1 PER PACK

Designed in conjunction with Andy Bennett, the Speed Bander makes easy work of banding baits such as maggots, casters or pellets. A simple and effective way of hair-rigging baits into a band in quick succession. The head of the speed bander has a protruding tooth, this is used to slip the band over. The head of the speed bander also has a hole to place the bait in position, ready to pull your band over the tooth of the speed bander and onto your bait. The tooth helps not only to protect delicate baits from bursting, but also help the band sit centrally on your bait, optimising presentation. Constructed with robust plastic.

CODE	DISCRIPTION
GUR002	Guru Speed Bander

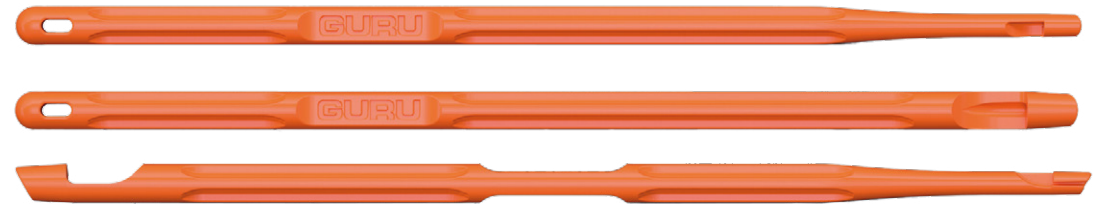

FINE DISGORGER

/ 1 PER PACK

Designed for use on smaller, finer hooks and removing the hook safely from the fish's mouth. This traditional style disgorger allows the line to run through the recess, following down to the hook and with gentle pressure the hook will pop out safely. A hole in the top the disgorger to suit the anglers who like to wear them on lanyards. Constructed with robust plastic and a strong cross section.

CODE	DISCRIPTION
GD3	Guru Fine Disgorger
GD4	Guru Medium Disgorger
GD5	Guru Double Disgorger

MEDIUM DISGORGER

/ 1 PER PACK

Designed for use on bigger, thicker hooks and removing the hook safely from the fish's mouth. This traditional style disgorger allows the line to run through the recess, following down to the hook and with gentle pressure the hook will pop out safely. A hole in the top the disgorger to suit the anglers who like to wear them on lanyards. Constructed with robust plastic and a strong cross section.

DOUBLE DISGORGER

/ 1 PER PACK

Designed for use on both small, fine wire hooks on the thin end, and to be used on bigger, thicker wire hooks on the thicker end of the disgorger. A versatile disgorger which can be used in an array of different fishing situations when targeting big or small fish. This traditional style disgorger allows the line to run through the recess, following down to the hook and with gentle pressure the hook will pop out safely. Constructed with robust plastic and a strong cross section.

MICRO HAIR STOPS

3 PER PACK

Mixed packs of brown, red and yellow stops allow the angler to match the colour to the chosen hook bait, giving you the edge when targeting wary fish.

CODE	DISCRIPTION
GHS	Micro Hair Stops (Red, Brown, Yellow)

BAIT BANDS / 100 PER PACK

Guru Bait Bands allow you to fish hard hook baits with confidence. When attached to a hair rig they enable you to present hard pellets.

CODE	DISCRIPTION
G2BB	2mm bait bands
GBB	Micro Bait Bands

MICRO SHOT

Produced for Guru by ZLT, we can ensure consistent quality with shot being evenly cut so they sit neatly on the line enabling perfect presentation. The shot can be placed onto line and easily moved without worry of damaging or weakening the line. The packaging sits neatly in a tackle box, and features a clip open lid attached to the main tub.

CODE	DISCRIPTION
GMSR10	Micro Shot size 10
GMSR11	Micro Shot size 11
GMSR12	Micro Shot size 12
GMSR8	Micro Shot size 8
GMSR9	Micro Shot size 9
GMCR13	Micro Cubes Size 13

MICRO CUBES

Micro shot in cube form, creating a very durable, super soft, line friendly shot. Can be placed on even the thickest diameter lines, sliding easily without damaging the line. Supplied in an easy to use and store compact container in sizes 8, 9, 10, 11 & 12 allows them to be used with heavy lines.

CODE	DISCRIPTION

GMCR10	Micro Cubes Size 10
GMCR11	Micro Cubes Size 11
GMCR12	Micro Cubes Size 12
GMCR13	Micro Cubes Size 13

TUNGSTEN OLIVETTE

The Guru Olivettes have been designed for use on pole fishing rigs, providing the weight of the floats bulk capacity in a single, neat, and condensed weight. Using a super dense tungsten material has enabled us to create extra small, but extremely dense weights that are significantly smaller than many other Olivettes on the market. This offers significantly less resistance than larger Olivettes, better presentation and is more discrete on the rig. We've intentionally dulled down the appearance of these Olivettes, minimising spooking fish in clear water. Rather than placing large amounts of shot on the line, which could damage mainline material the Guru Olivettes feature a soft protective central silicone sleeve that reduces any potential line damage, keeping the mainline in perfect condition. This in-line design means the Olivettes sit completely straight on the line which not only provides a tangle-free bulk weight, but it also offers optimum presentation. This design also means it's impossible for the Olivette to ping-off the line if it encounters a snag, or a lost fish. We've strategically produced the Olivettes in .25g increments, which allows you to pick the correct Olivette weight to suit the size of pole float you're using, plus locking shot above and below the Olivette, along with required droppers to perfectly shot the rig.

CODE	DISCRIPTION
GOT001	Tungsten Olivette 0.50g
GOT002	Tungsten Olivette 0.75g
GOT003	Tungsten Olivette 1.00g
GOT004	Tungsten Olivette 1.25g
GOT005	Tungsten Olivette 1.75g
GOT006	Tungsten Olivette 2.25g
GOT007	Tungsten Olivette 2.75g
GOT008	Tungsten Olivette 3.00g

PVA SPEEDMESH SYSTEM

1 PER PACK

A super-fast-melt PVA mesh system designed to be used with a vast array of baits that melts without any residue. The system comes with an ergonomically shaped scoop-top tube, which ensures easy loading of any bait and a plunger to tightly compact smaller particle baits.

- 7m PVA
- Including plunger

PVA SPEEDMESH SYSTEM

1 PER PACK

A super-fast-melt PVA mesh system designed to be used with a vast array of baits that melts without any residue.

- 5m PVA

CODE	DISCRIPTION
GSMS	PVA Speedmesh System (7m)
GSMR	PVA Speedmesh Refil (5m)

BAIT BAYONETS

/ 20 PER PACK

Bayonets make baiting super fast and are ideal for boilies, soft pellets, meat and artificial baits. The unique design helps grip the bait, and the large eye allows them to be used with heavy lines.

CODE	DISCRIPTION
GBYT	Bait Bayonets

PUNCH BOX / 1 PER PACK

The Punch Box perfect solution to the problem of keeping bread and meat baits fresh along with an effective way of punching out hook baits.

CODE	DISCRIPTION
GPB	Punch Box

HELI SWIVEL

The Heli Swivel is designed to create a tangle free connection between your mainline and hook length. This swivel also enables you to easily change hook lengths.

- Diamond eyed swivels for quick changing of hook lengths
- Small cap that slides over rotating hair pin to keep hook length in place
- Ideal swivel to avoid hook length getting tangled up

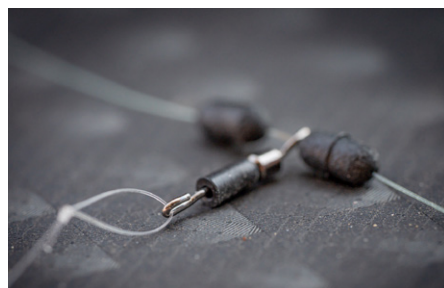

CODE	DISCRIPTION
GHS01	Heli Swivel Small
GHS02	Heli Swivel Medium
GHS03	Heli Swivel Large

PUNCH SET / 1 SET PER PACK

The Punch Set contains one of each size Push Punch (6mm, 8mm, 10mm and 12mm). The Push Punches have been custom designed to release bait with minimal effort.

CODE	DISCRIPTION
GPS	Punch Set

FEEDER LINKS / 3 PER PACK

Designed to give a paternoster style drop between the feeder and mainline, while still ensuring a free-running rig. Complies with official FIP Sed International free-running rig rules.

- Three sizes available: 2inch, 2.5inch and 3inch
- Extra strong link material, secured with the strongest crimps available
- Whole link protected by shrink tubing, adding strength, covering-up tag ends, and leading to completely tangle-free setup
- The stiff link acts as a boom, again adding to the tangle-free feature
- Attached to line via unique two-way discrete bead for free and smooth running rigs
- Self-lubricated bead means no line damage
- Strong but small snap link swivel for easy and quick changes
- Ideal for keeping rig and line out of silt on soft/silty bottoms

CODE	DISCRIPTION
GFLO1	Feeder Links Small 2"
GFLO2	Feeder Link Medium 2.5"
GFLO3	Feeder Link Large 3"

TERMINAL TACKLE

FOAM WAGGLERS / 2 PER PACK

Un-weighted Foam Wagglers designed to make minimum disturbance. Flights aid stable and accurate casting. Manufactured in high density foam to produce a super buoyant float and finished in Gurus 'surface camo'. For use with Guru Waggler Converters. Use Guru Waggler Adaptors and Super Tight Line Stops to swap easily from a loaded to an unloaded float.

CODE	DISCRIPTION
GFW2	Foam Wagglers 2SSG (3.2g)
GFW3	Foam Wagglers 3SSG (4.4g)
GFW4	Foam Wagglers 4SSG (4.4g)

WAGGLER CONVERTERS / 2 PER PACK

For easy shooting of unloaded floats, insert the waggler base peg into the soft sleeve for a secure fitting. Use Guru Waggler Adaptors and Super Tight Line Stops to swap easily from a loaded to an unloaded float. Ideal for use with Guru Foam Wagglers, and all other unloaded floats.

CODE	DISCRIPTION
GWC3	Waggler Converters 3.2g
GWC4	Waggler Converters 4.4g
GWC6	Waggler Converters 6.5g

WAGGLER ADAPTORS / 10 PER PACK

The Micro swivel creates a neat link to main line and the large looped clasp makes attaching float quick and easy. The looped clasp allows the waggler to sit correctly on the adaptor, making for a straighter, more accurate cast.

CODE	DISCRIPTION
GWA	Waggler Adaptors

IMPACT BOMB

/ 2 PER PACK

The Impact Bomb is a flat pear shaped lead with a hole in the middle of it and a mesh which bait can be pushed into, so that it will stay in during the cast, with the majority of it ending up close to your hookbait.

CODE	DISCRIPTION
GMB11	Impact Bomb 1.1oz
GMB15	Impact Bomb 1.5oz
GMB2	Impact Bomb 2oz
GMB23	Impact Bomb 2/3oz

X-SAFE SYSTEM COMPATIBLE

INLINE LEAD

/ 2 PER PACK

Guru In-Line X-Safe Leads are the ultimate safe bagging system. They are compatible with X-Safe Stems, which allows the angler to make a speedy switch from In-Line to X-Safe systems. They also allow you to switch from method feeder or pellet feeder to X-Safe leads instantly.

CODE	DISCRIPTION
GIL11	Inline Lead 1.1 Oz
GIL13	Inline Lead 1/3 Oz
GIL15	Inline Lead 1.5 Oz
GIL2	Inline Lead 2 Oz
GIL23	Inline Lead 2/3 Oz

SQUARE PEAR BOMB

/ 2 PER PACK

Guru Square Leads are designed for fishing in swims where you're faced with sloping lake beds. The flat sides prevent the lead from rolling. Guru Square Leads are made up from a super-dense material offering more efficient hooking, casting and accuracy.

CODE	DISCRIPTION
GL01	Square Pear Bomb 10g (1/3oz)
GL02	Square Pear Bomb 15g (1/2oz)
GL03	Square Pear Bomb 31g (1.1oz)
GL04	Square Pear Bomb 43g (1.5oz)

FLAT PEAR BOMB

/ 2 PER PACK

The Pear Leads have a slightly sleeker profile than the Square Leads. They also have the ability to hold on marginal or island slopes and they are well suited for use on rivers.

CODE	DISCRIPTION
GL05	Flat Pear Bomb 10g (1/3oz)

RIG SYSTEM SWIVEL

Infinite rolling barrel, extra-tough Rig System Swivel designed to be used in conjunction with the entire Guru range. The anti-corrosion black-nickel-plated finish is incredibly hard wearing.

SNAP LINK + SWIVEL

High-quality size-11 snap links and swivels allow the angler to change feeders or hook links in seconds. Finished with an anti-glare coating.

MICRO LEAD CLIP

The design of this lead clip ensures that your feeder or lead can be released from your setup should it become tethered. Guru Micro Lead Clips prevent tangles and will help you land more fish as a result.

CODE	DISCRIPTION
GS11	Size 11 Rig System Swivels
GSL5	Size 11 Snap Link + Swivel
GLC	Micro Lead Clip

SPEED BEAD / 10 PER PACK

This ingenious little bead has been designed solely to help you put more fish in your net, quicker. They comprise a rubber outer bead, against which your feeder or bomb can come to rest, with an internal, quick-change swivel.

CODE	DISCRIPTION
GSB	Speed Bead

SILICONE TUBING

Super-fine silicone tubing for enhancing bait presentations when using hair rigs. The 0.3mm internal bore is designed to grip the shank of hooks as small as size 20 to give optimum presentation.

CODE	DISCRIPTION
GST	0,3 mm Silicone Tubing

SUPER TIGHT LINE STOPS

Multi-purpose, compact line stops that have a super tight fit on low diameter lines. Ideal for use with feeder and float setups or as back stops.

CODE	DISCRIPTION
GLSL	Large super tight line stops
GLSM	Medium super tight line stops
GLSS	Small super tight line stops

FLOATS

PINGER WIRE STEM FLOAT

A truly all-round model for commercial fishing. As the name suggest, it's perfect for pinging pellets, but equally at home for all kinds of baits when targeting carp, F1s and commercial silvers. The balance of visibility, strength, and stability is perfect. The wire stem suits this float to choppy conditions, with the rounded body shape offering stability in tow. The medium 1.5mm hollow plastic bristle is highly visible, thick enough to support large baits, but also sensitive enough to detect shy bites from big wary fish. The ultimate commercial all-rounder, made from Wilky's renowned high-grade foam. The wire stem runs all the way through the body into the bristle, making the float virtually indestructible! Again, a hand-glued extra-long side eye is unbelievably strong!

CODE	DISCRIPTION
GF001	Pinger Wire Stem Float 0.15g
GF002	Pinger Wire Stem Float 0.2g
GF003	Pinger Wire Stem Float 0.3g

GF006	Pinger Wire Stem Float 0.6g
GF007	Pinger Wire Stem Float 0.75g
GF008	Pinger Wire Stem Float 1g

PINGER CARBON STEM FLOAT

A truly all-round model for commercial fishing, identical to the Pinger Wire, but with a carbon stem. As the name suggest, it's perfect for pinging pellets, but equally at home for all kinds of baits when targeting carp, F1s and commercial silvers. The carbon stem makes the float very difficult to tangle, and is extra robust! Ideal for fishing through the water and on the drop, helping anglers get perfect presentation! The rounded body shape offers stability in tow and choppy conditions. The medium 1.5mm hollow plastic bristle is highly visible, thick enough to support large baits, but also sensitive enough to detect shy bites from big wary fish.

CODE	DISCRIPTION
GF009	Pinger Carbon Stem Float 0.25g
GF010	Pinger Carbon Stem Float 0.4g
GF011	Pinger Carbon Stem Float 0.5g
GF012	Pinger Carbon Stem Float 0.75g
GF013	Pinger Carbon Stem Float 1g

BOBBIE FLOAT

The Bobbie pole float has been primarily designed to cover most commercial carp and F1 pole fishing situations. The Bobbie is a super strong pole float with a highly visible 1.8mm hollow plastic bristle which suits bigger baits and bigger fish scenarios perfectly. The Bobbie features a slim body pattern which offers minimal resistance, but still retains enough stability to offer perfect rig presentation, even in windy conditions. This float body is made from a super strong high-density foam material which has created the most durable float possible. Presentation is a vital aspect to any pole float and the Guru Bobbie features a 0.6mm wire stem which offers perfect rig presentation and stability. For enhanced strength and durability, the wire stem of the Bobbie goes right through the high-density foam body and is placed into the tip of the float which adds significant strength and robustness. The side eye of the pole float is also glued deep into the foam body, improving the pole floats longevity massively. The Bobbie is a super versatile pole float pattern and the size range available reflects that. We've produced the Bobbie from 0.15g right through to 1g covering a wide variety of different fishing situations and bait options.

CODE	DISCRIPTION
GF039	Guru Bobbie Float 0.15g
GF040	Guru Bobbie Float 0.25g
GF041	Guru Bobbie Float 0.4g
GF042	Guru Bobbie Float 0.5g
GF043	Guru Bobbie Float 0.75g
GF044	Guru Bobbie Float 1g

BOBBIE CARBONS

The Bobbie Carbons are the perfect pole float when targeting carp all year round. Featuring a 0.6mm carbon stem, which is super durable and suits a variety of different tactics. The stem itself is built all the way through the body of the float and into the bristle, adding to the strength of the float as well as helping the float settle once dropped into the water. The 1.8mm hollow plastic bristle is key for these floats, making them easily visible in any light situation or against any bankside vegetation, as well as being able to support heavy baits such as corn or hard pellets. Being this visible, improves the angler's ability to be able to read the indications and see when to strike at the correct time. The body is a thin shape, allowing minimal resistance when striking into fish, but is still thick enough to keep the float nice and stable in the water. The side eye of the float has been through a thorough gluing process, ensuring the eye will never get pulled out whilst in battle with big fish or fishing amongst snags. Each pole float is made by hand at Guru HQ to the highest standard. The Bobbie Carbon pole floats are a true all-rounder pattern, so we have a wide range of sizes to cope for all eventualities.

CODE	DISCRIPTION
GF046	Bobbie Carbon 0.2g
GF047	Bobbie Carbon 0.3g
GF048	Bobbie Carbon 0.4g
GF049	Bobbie Carbon 0.5g
GF050	Bobbie Carbon 0.75g
GF051	Bobbie Carbon 1g

BAGGER

The Bagger pole floats are the ideal pole float when fishing against a mudline or fishing down the edge. Featuring a 0.9mm fiberglass stem, which is super durable and will not break or snap under pressure. Also, the 2mm hollow plastic bristle is very visible even in low light conditions or against any bank-side vegetation. Suitable for supporting heavy baits such as worms or corn which are used a lot when fishing in these kinds of conditions. A round body is also featured on this float, this helps keep the float nice and stable, especially due to the methods it will be put through when fishing in shallow water with fish wafting the rig around, this helps keep it all in one place. This float is available in 0.3g and 0.4g, nice and heavy floats to keep your hook bait still and maintain good presentation of your rig. A hand-glued extra-long side eye is used on this pattern to increase the strength of the float. Each pole float is made by hand at Guru HQ to the highest standard.

CODE	DISCRIPTION
GF052	Bagger 0.3g
GF053	Bagger 0.4g

F1 WIRE STEM FLOAT

The F1 Slim Wire float is designed for really delicate situations on mainly commercials and club lakes. The super slim body makes the float really sensitive and due to the short stem the float settles really quickly. The grey finish and special coating makes this float again nearly indestructible.

- Slim, wire stem pole float
- 1.5mm hollow bristle
- Short float aids very quick setting
- Wire stem makes this float - very stable in windy conditions

CODE	DISCRIPTION
GF021	F1 Wire Stem Float 0.15g
GF022	F1 Wire Stem Float 0.3g
GF023	F1 Wire Stem Float 0.45g

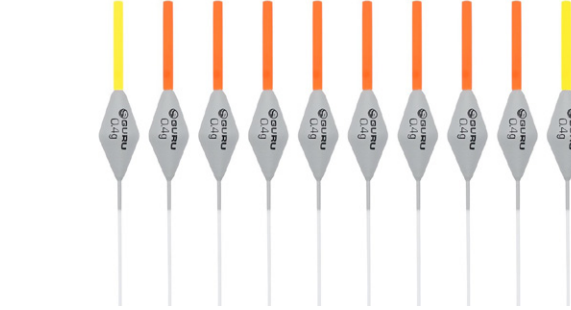

F1 CARBON STEM FLOAT

The F1 Slim carbon float is designed for really delicate situations on mainly commercials and club lakes. The super slim body makes the float really sensitive and due to the short stem the float settles really quickly. The grey finish and special coating makes this float again nearly indestructible.

- Slim, carbonstem pole float
- 1.5mm hollow bristle
- Short float aids very quick setting
- Carbon stems makes the float ideal for fishing on the drop

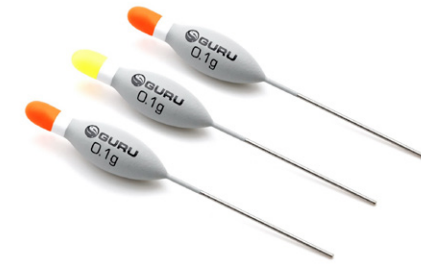

CODE	DISCRIPTION
GF024	F1 Carbon Stem Float 0.15g
GF025	F1 Carbon Stem Float 0.25g
GF026	F1 Carbon Stem Float 0.3g
GF027	F1 Carbon Stem Float 0.45g

MARGIN DIAMOND FLOAT

Designed with big fish in mind, for catching down the edge. The Margin Diamonds sit super stable thanks to the body shape combined with a thick 0.9mm fibreglass stem, which is also incredibly strong running all the way through the float and into the tip. This is essential when margin fishing, as big fish often waft the water and bait around all over, and having a float that sits stable aids presentation massively! The tip itself is thick hollow plastic in 2.5mm, so you can see and read the float perfectly well when fishing against cover. It's also ideal for supporting large baits for big fish - bunches of maggots, worms, double corn, 8mm pellets and meat won't drag the float under. The side eye on the float is super durable and ensures presentation is perfect. The lighter 0.1g and 0.2g versions are ideal for when you're looking for a slow falling bait, maybe loose feeding some bait. The heavier 0.3g and 0.4g versions are suited to pinning a bait down when there are lots of big fish swirling around in the swim.

CODE	DISCRIPTION
GF030	Margin Diamond Float 0.1g
GF031	Margin Diamond Float 0.2g
GF032	Margin Diamond Float 0.3g
GF037	Margin Diamond Float 0.4g

COOKIE FLOAT

This dibber style float is designed for a wide range of shallow or up-in-the-water pole fishing situations on commercials for carp and F1s. Sizes of 0.1g, 0.2g, and 0.3g cover all shallow fishing options, and the floats are superb for the popular 'slapping' style of shallow fishing that takes place on a lot of commercials. The Cookie is a very popular pattern amongst commercial experts for 'mugging' or 'dobbing' fish too, perfect for flicking at cruising fish without tangling, making an enticing quiet little 'plip' to catch their attention! Like all our range, strength is an essential build quality, and despite being a small float, the Cookie can withstand catching big weights of large hard-fighting fish! A lot of this is down to the fact it's made using high-density foam, with the side eye glued deep into the body to ensure it will never pull out. The side eye also ensures the float sits perfect every time to give anglers ultimate presentation, and doesn't ride-up or get caught in the surface tension which sometimes happens when using silicone or a spring-style eye. The shape of the cookie makes it perfect for shallow work and suspending baits off the bottom such as hard pellets, meat or casters. It has a dumpy little body shouldering up into the dibber tip, which is highly visible and supports a whole manner of baits up to 8mm pellets with ease. The short wire stem is sturdy and stiff, not bending or breaking under pressure, but providing the small float with a lot of stability and making sure it cocks quickly when fishing shallow - important as you want to see bites as quickly as possible when shallow fishing. The discrete grey colour also makes the floats perfect for shallow work, not spooking wary fish near the surface coming up to intercept bait near to the float.

DIAMOND FLOAT

A long and stable float, developed for fishing baits such as meat, corn and pellets, when stable presentation is needed – the ultimate float for fishing short.

The diamond features a long, 0,9mm stable fiberglass stem, suitable in all conditions, that is super durable. This runs right up through the high-grade foam float body and into the 1,9mm bristle, making the float virtually indestructible. The body shape is where the name comes from, a diamond. This offers a balance of stability, sensitivity and low resistance. The bristle is hollow plastic, and highly visible, cut and painted in house from scratch. Perfect for supporting large baits. The side eye is glued by hand, deep into the body, for upmost strength!

CODE	DISCRIPTION

AVENTUS 4M+1M LANDING NET HANDLE

/ 1 PER PACK

Designed to be incredibly versatile and super high performance throughout its combinations of lengths and varieties, to cater for ALL competition fishing situations. Suitable and versatile to satisfy commercial, natural and international styles of fishing, with a maximum length of 5m. The handle is three sections, plus a 1m extension. This latest handle is super high performance built using top grade carbon with re-enforced joints throughout. This makes it lightweight, stiff and strong throughout its combinations. At a full 5m, the handle is ideal for international situations, for venues where anglers are sitting high off the water or have snags/weed in front of them that they need to net fish beyond. In a lot of high-level competitions, having extra landing net length gives anglers ultimate confidence they can net fish when they pop-up a long way out. The versatility of the handle comes primarily from the fact it has two different threads that are double-pinned into the end and second section. This offers anglers the chance to have a thinner end of the handle, that can be used at any length from the end section right up to 5m long. If you wanted a super thin and lightweight short handle in a particular situation, there is nothing stopping anglers using just the first and second section alone for this. You can use the first second and third section too, or the full 5m. The second thread is in the second section, also double-pinned securely in place, to give anglers the option of having a much stiffer handle with thicker support at the net head end. The carbon at the very end is tapered to prevent the very end looking super bulky. This style of handle has been

super popular on the commercial scene, offering ultimate strength and also giving anglers the power and control to scoop and manoeuvre their landing net through the water to net big fish with confidence. The 1m extension really comes into play when using the landing net in this combination, as it gives anglers an extra 1m of reach and control, alongside the super stiff performance of the second threaded section with their net on. Previously, a lot of landing nets that had the thicker thread section could only be used at short lengths. In the butt end of the 1m extension, the handle has a Floater Protection Cone inside it. This reduces damage to the back end of the pole that is often resting on the bank behind anglers, and also prevents grit, dirt or stones entering. When sat out in the water in a wading situation it creates a floating back end of the handle preventing it filling with water. The finish on the landing net pole is smooth and slick, that gives anglers a balance of manoeuvrability and grip, while looking the part too! The threads themselves where the landing net is screwed into the pole were a part we wanted to ensure were incredibly strong and reliable. These are extra durable and are both double-pinned as previously mentioned for ultimate security.

CODE	DISCRIPTION
GRD124	Aventus 4m+1m Landing Net Handle

AVENTUS 2.7M F1 LANDING NET HANDLE

/ 1 PER PACK

A super slim and incredibly lightweight handle that has superior strength! This has been achieved by using thicker carbon walls that give the landing net pole superb strength, while enabling it to remain extra thin and responsive. All the power in this handle is created from the inside with this design. This pole is intended primarily for F1 sport, silverfish work and canal fishing where a short, slim and lightweight handle helps anglers be efficient, agile and comfortable. The likes of Andy Bennett had a big hand in the testing and development of this product. While testing the pole, a lot of our anglers also found the handle was perfect for use when netting lots of smaller fish sat out in the water - when speed fishing, with Steve Ringer putting it to good use in the Feeder Masters Final at Tamar Lakes. Because it's so short and lightweight, it doesn't get in the way and is easy to position when wading etc. Again, the thread is extra strong and double pinned for ultimate strength, and the joint is fully re-enforced.

CODE	DISCRIPTION
GRD125	Aventus 2.7m F1 Landing Net Handle

**N-GAUGE PRO 400
NET HANDLE 4.0M 3PCS**

/ 1 PER PACK

The latest addition to the N-Gauge family is the 4.0m N-Gauge Pro Landing Net Handle. This handle is made from a super strong Zero400 Tensile Carbon construction that has been purposely designed to give the handle maximum strength, durability, whilst still offering a balanced light-weight performance.

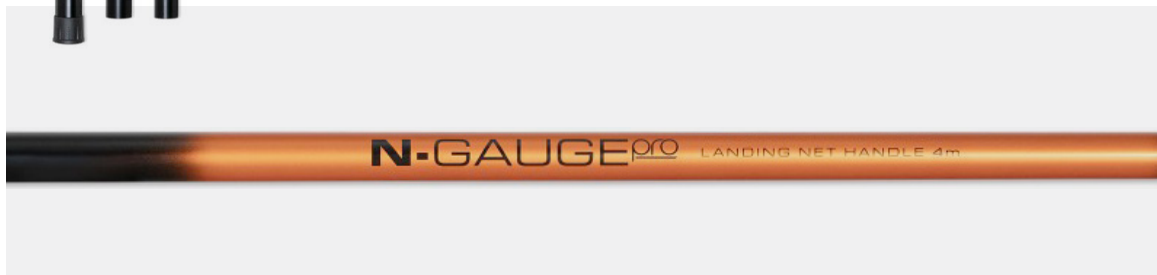

The 4.0m N-Gauge Pro handle features high compression strength blanks for increased power and rigidity, particularly effective when used at the handle's full 4.0m length. The handle features over cap take/apart joints which significantly improves the overall performance and stiffness. Featuring a double thread on the end two sections which means it can be used at multiple lengths (4.0m & 2.9m).

The N-Gauge Pro handle is finished off with a Super Glide Matt Finish to improve both speed and efficiency when netting fish.

GURU KEEPNET 4M RIVER / 1 PER PACK

The Guru 4M River Keepnet has been designed to cover all your river fishing requirements. The 4M length makes this the perfect option for fast flowing rivers and any fishing scenario that demands that extra length in a keepnet.

Featuring weighted rings throughout the whole length of the keepnet to ensure the net sinks and remains stable, even in fast flowing water. The 4M River Keepnet features a heavy duty, super tough fast flow large mesh material that significantly improves overall keepnet strength and improves the keepnets performance on fast flowing rivers.

Just like the rest of the keepnets in the Guru range the 4M River Keepnet features an over-sized top ring to make it as easy as possible to put fish in the keepnet.

External rings throughout the whole net have been applied to avoid net wear, improving the keepnets longevity greatly.

Fish care is of paramount importance to us at Guru and several key features on our keepnets help protect fish as much as possible, starting with the dark protective finish to the keepnet, this keeps the fish calm and safe. We haven't added any handles on the inside of the keepnet, aiming to protect the fish as they are returned.

The 4M River Keepnet has our reliable multi-angle screw thread which allows you to position the keepnet in whatever angle to suit your session.

KEEPNET

/ 1 PER PACK

Guru keepnets come in a choice of 2.5m Silver Match, 3m Carp Match, or 4m International Match designs to cover a range of situations and species, and they're all built to last for many seasons. The rings are weighted to ensure that the net sinks properly and remains stretched out, and there is an external sleeve to protect the net from wear around the rings, one of the areas that has traditionally always been weakest and the first to wear out. A fish-friendly super soft mesh has been used so that you can look after your catch as much as possible, and a dark finish helps to keep the fish calm whilst they are in the net. An over-sized top ring has been used to make it as easy, and quick, as possible to put fish in it with the landing net, with a screw thread that can be adjusted to any angle for perfect positioning. When it comes to retrieving your catch at the end of the session, smaller lower rings (the bottom three) allow you to pull the rings through to help to get the fish out for weighing in or returning them.

CODE	DISCRIPTION
GB18G	Guru Bucket 18 ltr Grey

BAIT STRAINERS

/ 1 PER PACK

To soak pellets, simply insert the Bait Strainer into a Guru Bait Box, pour in bait and cover with water. After soaking, lift the Bait Strainer from the box and leave to stand for 10 minutes. Your pellets will then be ready to use.

CODE	DISCRIPTION
GBS1	1 pint Bait Strainer (T/P 10)
GBS3	3 pint Bait Strainer (T/P 10)

GURU BUCKET 12 LTR / 1 PER PACK

Simply a smaller more-compact bucket for mixing and storing groundbait and pellets. Takes up less room on a bait table etc, easy to use, perfect for smaller amounts of bait, and has a measure on the side.

CODE	DISCRIPTION
GB12	Guru 12l Bucket

NEW 2023

MAGGOT RIDDLE

/ 1 PER PACK

Designed to riddle small live baits such as maggots, pinkies and bloodworm quickly and effectively. Featuring a 3mm square mesh which perfectly riddles and cleans bait, resulting in the freshest bait possible. Fits perfectly on top of the 2.2 pint and 3.3 pint Guru Bait Boxes and features handy guru tabs in opposite corners for ease of use.

CODE	DISCRIPTION
GMR006	Guru Maggot Riddle Orange
GMR007	Guru Maggot Riddle Black

BAIT UMBRELLA

/ 1 PER PACK

This bespoke bait broly packs down so small that you'd hardly notice it, until you need it! It's just the right size to cover most side trays and, thanks to an adjustable central pole, it can be tilted down to give supreme coverage if the weather is really bad!

CODE	DISCRIPTION
GB1	Bait Umbrella

NEW 2023

BAIT BOX 5.3 PINT

/ 1 PER PACK

The 5.3 Pint Bait Box has been designed to store and be used with any bait you could possibly use, pellets, maggots, corn, etc. Designed in typical Guru colours, black box with an orange lid. The lid itself is tight fitting which avoid any chance of the lid clicking off during transit and bait being released accidentally. The lid features a perforated lid, which is perfect for live baits such as magots, worms, squats or pinkies.

- Used for storing larger amounts of baits
- Tight fitting lid
- Stackable

NEW 2023

CODE	DISCRIPTION
GBT05	Bait Box 5.3 pint
GBT06	Bait Box 5.3 pint Solid Lid (Green)

NEW 2023

5 PINT BAIT STRAINER

/ 1 PER PACK

The Bait Strainer is designed to strain excess water when preparing and using baits. Particularly effective when soaking micro pellets, simply put the pellets into the strainer, then place the strainer into the relevant sized bait tub filled with water. Soak for the required amount of time and then pull the Strainer out of the water via the corners and then leave to drain.

The Bait Strainer features raised feet at the base which makes drainage of water quick and easy. Perfect for draining baits like pellets, hemp, meat, corn, casters, dead maggots. Any bait that requires the use of water, the Bait Strainer is the perfect accessory.

- Releases excess water when preparing baits.
- Fits neatly inside the Guru 5.3 Pint Bait Box.
- Raised feet allow excess water to fully drain away.
- Use with pellets, casters, dead maggots, hemp & meat.
- Holds up to two bags of pellets.
- Also available in 1 & 3 pint versions.
- The perfect solution for removing mud from worms.

CODE	DISCRIPTION
GBS5	5 pint Bait Strainer

FUSION 110

PLUS 4 SYSTEM 17L
/ 1 PER PACK

The 4 Plus System is a clever idea that gets around the problem of having to take multiple buckets fishing with you in order to keep your bait separate, with none of them actually being full. The 4 Plus System is 17 litres in size and comes complete with four separate containers which can each be filled with something different and where you either don't want to mix all your bait together, or only want to do so at the point where you want to actually introduce it to the lake. The containers are stackable for easy storage, and spares are sold separately, so you can just grab whichever ones you require for your session, and leave the rest in the freezer or garage at home.

- 4 containers will fit inside a 17l bucket
- Soft lids ensure an airtight/watertight seal
- Includes 0.25l side markers
- Freezer friendly
- Suitable for storing particles and boilies
- Stackable for easy storage
- Spare Containers sold separately

CODE	DISCRIPTION
GB17	Plus 4 System 17l

SPARE CONTAINERS 3L
/ 1 PER PACK

These additional containers are compatible with the 4 Plus System. Each container is airtight and watertight, meaning that liquids can safely be stored in them without fear of spillages, and should you have baits such as particles leftover at the end of the session. The containers are stackable for easy storage, so you can just grab whichever ones you require for your session and leave the rest in the freezer or garage at home.

- 4 containers will fit inside a 17l bucket
- Soft lids ensure an airtight/watertight seal
- Includes 0.25l side markers for precise spod mixes
- Freezer safe
- Suitable for storing particles and boilies
- Stackable for easy storage

CODE	DISCRIPTION

Guru presents the perfect organisation system, allowing neat, clean and efficient setting-up and packing-up. Used for carrying main tackle items, smaller Fusion Luggage items full of tackle items such as feeders, pellet wagglers, this Fusion Base Carryall features two main storage compartments. It has a shallower, re-enforced EVA base, ideal for heavy duty metalware, perfect for seatbox accessories. The taller main EVA base, is designed to hold different existing Fusion Luggage combinations plus the XL RIG CASE!

CODE	DISCRIPTION
GLG09	EVA Fusion Base Carryall

GURU FUSION BAIT PRO HT / 1 PER PACK

The Guru Fusion 400 & 600 Bait Pro HT are the latest EVA Fusion luggage items to join the Guru range. The main benefit to the Fusion HT Bait Pro's is the unique HT (Hard Top) lid which has been designed to protect your bait from the elements. The HT lid is weighted and stays firmly in place without having to zip the lid up, particularly effective in windy conditions. The lid itself overlaps the edges of the EVA Bait Pro which means your bait will remain in perfect condition, even in extremely wet or sunny weather conditions. The Fusion 400 HT comes supplied with a standard 300 Bait Pro and the Fusion 600 HT is supplied with a standard 500 Bait Pro. Both the Fusion HT Bait Pros are constructed from an extremely durable 0.8mm EVA wipe-clean fabric material and also feature a super smooth reversed zips and the bespoke Guru zip pullers for easy access at all times.

CODE	DISCRIPTION
GLG038	Guru Fusion 400 Bait Pro HT
GLG039	Guru Fusion 600 Bait Pro HT

FUSION COOL BAG

/ 1 PER PACK

The Fusion Cool is the perfect carryall for transporting bait that needs to be kept cool and in perfect condition throughout a session. The light grey colour of the bag reflects sunlight, keeping bait as fresh as possible.

Water resistant, 36 litre capacity, insulated lining helps to keep bait cool in summer and protected from cold in winter, wipe clean finish, interlocking handles make the bag easy to carry, padded shoulder strap, zipped lid compartment holds personal items, holds a variety of Fusion products and bait boxes.

CODE	DISCRIPTION
GLG023	Fusion Cool Bag

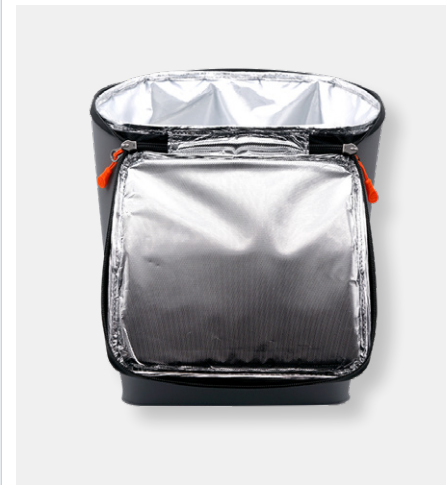

FUSION MINI COOL BAG

/ 1 PER PACK

FUSION FEEDER BOX SYSTEM BAG

/ 1 PER PACK

Strong, durable and stylish, the Fusion Feeder Box System is the perfect transportation solution for carrying up to THREE Fusion Feeder Boxes. Two external pockets are ideal for storing other feeder fishing essentials and accessories – perfect for hook boxes, rig cases etc. There are also under-lid zip pockets ideal for shockleader line, a phone/keys and personal items.

- Wipe clean carbon effect finish
- Oversized zips and big Guru zip pullers.
- Top and front opening for easy access.
- Additional side pocket for other essential feeder accessories.
- Storage pocket in lid and on flap of front opening for essentials.
- Detachable padded shoulder strap
- Internal padding to secure and protect the Feeder boxes.
- Designed to match and complement other Guru Fusion luggage items.

CODE	DISCRIPTION
GLG033	Fusion Feeder Box System Bag

FUSION BOXSAFE

/ 1 PER PACK

The Fusion Box Safe has been designed to maximise space underneath the main cavity of your seatbox, creating the perfect storage solution for items such as a Fusion Feeder Box, Rig Cases, Rig Boxes, bait and other essential items of tackle that you need access to during your session.

This system fits perfectly underneath the Guru or Rive Seatbox platform tray and locks firmly into place thanks to the magnets built into the base of the Box Safe. The Box Safe features a bespoke carry handle and a front mounted handle, aiding transportation and easy access.

Construction from a thick 1mm EVA material creates a rigid shape, adding extra support and protection for your essential items.

CODE	DISCRIPTION
GLG037	Fusion Boxsafe

For added protection the Box Safe features water-resistant zips to protect the contents from the elements. A tinted lid further protects your items from any potential UV damage. The Fusion Box Safe has a 12L capacity, meaning you can keep a wide range of different items close to hand.

- Fits on Guru or Rive Platform Tray
- 1mm EVA body for extra support
- Tinted lid
- Water-resistant zip
- Magnets lock Box Safe to platform tray
- Bespoke carry handle and front mounted handle
- 12L capacity

LARGE UMBRELLA

/ 1 PER PACK

The brolly is made from Deluxe waterproof 210D material. The 8mm Fibreglass Spokes are thick and extra durable, to help the brolly remain in shape and solid in bad conditions! Overall, the 50-inch brolly gives a huge 2.2m coverage. The thick-walled 19mm ground spike is extra strong, resilient to bending and can be pushed into tough terrain. This is accepted by all major seatbox accessories and brolly arms. In addition to this, the brolly has 4 lots of heavy-duty screw-in steel pegs and adjustable guy ropes to help stabilise and pin-down the brolly in wind. Two back peg D-rings for pegging down the back of the brolly to the ground. The detachable central pole has two screw points, for the brolly to be secured in upright and side-angled positions. Supplied with carry bag featuring re-reinforced base.

CODE	DISCRIPTION
GB2	Large Umbrella

FUSION H2O WATER BUCKET

/ 1 PER PACK

The perfect solution for collecting water on the bankside! No dangerous bending down, or awkward balancing on and around your seatbox – the Fusion H2O drop bucket allows you to easily collect water without risk! Made from super tough, extra durable EVA that has re-enforced seams. The weighted rim means the bucket tips every time when it enters the water, collecting a full 3.5l capacity.

- Detachable 5m cord with storage frame
- Weighted rim – easy tip and full filling properties
- 3.5l capacity
- Collapsible for easy storage
- Fits inside 3.3pt bait tub
- Ideal for weighting down roosts/rollers in windy conditions

CODE	DISCRIPTION

RIG CASE XL

/ 1 PER PACK

The XL Rig Case has been developed to allow people to carry large numbers of pre-tied hook lengths, all together in one place. A super-solid, durable and waterproof sealed case, capable of holding well in excess of 1000 hook lengths in endless combinations. A main aim with the XL Rig Case is to bring wooden hook boxes up to date, popular with many match anglers and also on the continent!

CODE	DISCRIPTION
GRCX	Guru Rig Case XL

ADJUSTABLE RIG CASE 6IN

/ 1 PER PACK

These latest Rig Cases provide a complete and safe storage/transportation solution for all kinds of hooklengths that anglers use for pole, feeder, and waggler work. The main benefit of them, is the fact you can adjust the measurements of your hooklengths to suit your exact needs for the situation in hand and length of hooklength you desire. The 6-inch version will allow hooklengths from 5 to 15 cm to be stored, thanks to the adjustable pegs, with the 8-inch taking hooklengths from 5 to 20 cm. This versatile system works by having adjustable pegs that slide and then lock in place exactly where anglers want them. We have also developed peg locks, which once the main pins are in place, provide extra protection against heavy impact. There is also a tool provided that makes it easy to pop open the pins if you wish to adjust the length. The pegs themselves accommodate all kinds of hooks, even down to fine-wire size 24 hooks. They are super durable while being easy to use with a small overlapping barb on the tip of them to prevent hooklengths slipping off. Within the case, is a set of measuring pins that are raised-up, enabling anglers to quickly and easily measure-up hooklengths as they tie them, before placing them in within. The pins themselves are also long, enabling you to get plenty of hooks on them, with the cases having a capacity of holding more than 600 hooklengths with ease!

ADJUSTABLE RIG CASE 8IN

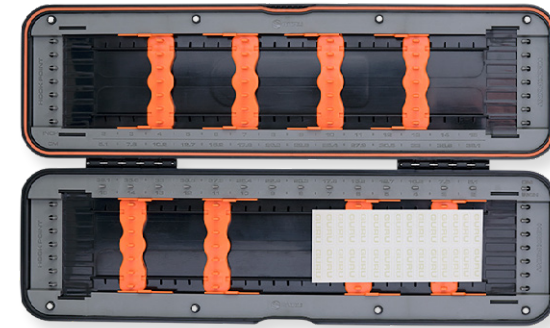

/ 1 PER PACK

- Extremely durable
- Waterproof seal
- Easy open grips
- Magnetic locking system
- 2 label areas on the inside and outside of the case
- Including labels

Two versions available:

- 6 inch, hold hook lengths from 5 up to 15cm
- 8 inch, holds hook lengths from 5 up to 20cm

CODE	DISCRIPTION
GRC01	Guru Adjustable Rig Case 6in
GRC07	Guru Adjustable Rig Case 8in

ADJUSTABLE RIG CASE 15IN

/ 1 PER PACK

The 15" version can store hooklengths from 2" right up to 15", in half inch intervals, making this Rig Case as versatile as possible.

This versatile system works by having adjustable pegs that slide and then lock in place exactly where anglers want them. We have also developed some new peg locks, which once the main pins are in place, provide extra protection against heavy impact. There is also a tool provided that makes it easy to pop open the pins if you wish to adjust the length.

The pegs themselves accommodate all kinds of hooks, even down to fine-wire size 24s. They are super durable while being easy to use with a small overlapping barb on the tip of them to prevent hooklengths slipping off.

Within the case, is a set of measuring pins that are raised-up, enabling anglers to quickly and easily

measure-up hooklengths as they tie them, before placing them in within. The pins are also extra-long, enabling you to get plenty of hooks on them, with the cases having a capacity of holding more than 600 hooklengths with ease!

The case is extremely hardwearing, durable, and weather resistant, with a waterproof seal keeping your hooklengths dry and in perfect condition. We have built the case with easy-open grips for fast and effective access, with a strong magnetic locking system, and there are two label areas on the outside of the Rig Case for improved organisation. The hinges on the case are heavy duty for long-lasting endurance. Internal labels are also provided.

MATCH KOMBATS / 1 PER PACK

These combat-style trousers have been designed so that they are a perfect fit for the match angler. Our own design team re-modelled this classic military design and opted for a 150gsm ripstop fabric, which is not only lightweight and extremely durable, but also dries very quickly should you get caught out in rain, or even fall in the lake! They are the perfect choice during the warmer months of the year, as this material also wicks moisture away from your skin and they are impregnated with mosquito repellent. They are secured via a button and a zip fly, plus have buckles on either side so that they can be adjusted for the perfect fit – there are also belt loops should you wish to wear one. You won't be lacking for pockets either as there are nine in total, with two on each side – one zipped and the other open – plus a large Velcro fastened one on the side of each leg and at the rear, plus pockets within pockets to help you store everything so that you can easily find it but it won't accidentally fall out.

CODE	DISCRIPTION

- ZERO90 Super Tensile Carbon has allowed us to make a slimmer progressive tapered blank that has the power to cast accurately but still maintain a nice soft fish playing action.
- RJD Rigid Joint System integrated with spigot joints this gives the rod a more natural curve all the way through the blank.
- FUJI K Anti Tangle Guides have been applied to these rods to reduce the risk of thin mono and braided lines frapping up on the butt guide during the cast.
- FUJI TVS Reel Seat has a slim ergonomic shape which is designed to feel more comfortable in your hand and also create a nice balanced profile to the handle of the rod.

**AVENTUS

GRD018	Aventus 12-13-14ft Carbon Quiver 3oz

Aventus rods are designed by the GURU team and are made in the UK. The facilities are highly advanced, with years of expertise, knowledge and a staff team that have unbelievable amounts of experience throughout every process of rod design, technology and production. Despite the fact that Daiwa produces the rods we can assure that the rods are 100% unique and made on a complete new blank designed by our GURU team.

**AVENTUS 10 FT
FLOAT ROD**

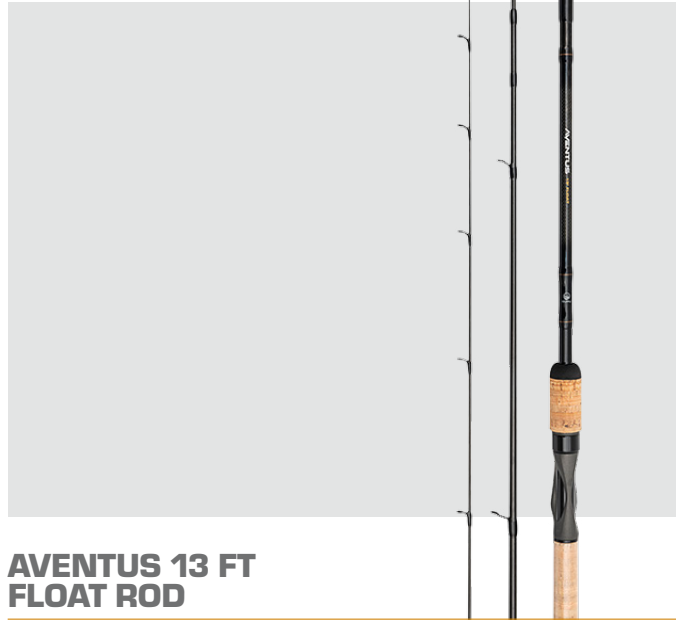

After the popularity of the 11ft float, certain situations and venues left anglers asking for a 10ft version of this rod in the Aventus range. This has all the features of the longer rods in the range, but packed into a neat, lightweight 10ft version that is perfect for mugging fish at close range, shorter casts on smaller venues, or on swims where overhead cover and trees can be a pain!

The action of this rod is very progressive, with plenty of softness in the top end and ample power as you see the blank bend throughout to absorb the battle lunges of big fish! All the usual Aventus features are a part of the 10ft Float, including Zero-90 Carbon Technology which ensures a super crisp action, and helps you cast incredibly accurate thanks to a reduction in twist and wobble when the rod is compressed. This is perfect for this short weapon that will often be used by anglers for accurately casting to fish when mugging, or casting to small features such as islands at close range.

Lightweight single-leg Fuji guides are used throughout, with the cutaway reel seat for ultimate balance, comfort and feel. Of course there's the A-Grade cork handle, with a bespoke Guru EVA hand grip and adjustable hook-up point to finish it off!

CODE	DISCRIPTION
GRD055	10 ft Guru Aventus Float Rod 2pc

**AVENTUS 13 FT
FLOAT ROD**

After releasing the 11ft and 12ft float, anglers were asking if a traditional 13ft float rod would be coming, and here it is! This length is the ultimate all-round float rod, for everything from river waggler work, to commercial silverfish action, slider or big-waggler fishing and Pellet Waggler fishing on big venues for carp! The length means you can cast maximum distance, and combined with Zero-90 Carbon technology and the very best materials, the accuracy of this weapon is incredible!

Action wise, the rod is truly all-round, with a soft top-end to cushion small fish when fishing light lines and finer hooks, but this progresses into the middle part of the rod building in power to handle even the biggest commercial and river fish with ease, in a generously absorbing way.

On the tech-spec side of things, everything you can expect from the Aventus range is present! The very top-end lightweight Fuji single-leg guides with durable Alconite rings, giving the rod a crisp action and weightlessness in the hand. The reel seat is the unique cutaway Fuji lightweight model, incredibly comfortable and giving anglers an amazing feel through the rod. An A-grade cork handle, with a bespoke Guru EVA hand grip and adjustable hook-up point finished this bad boy off perfectly.

CODE	DISCRIPTION
GRD056	13 ft Guru Aventus Float Rod 3pc

**AVENTUS 15 FT
FLOAT ROD**

This rod is designed with all kinds of float fishing in mind, when a longer rod is required for ultimate control. The build of the rod is unique and modern, enabling it to be used for a real range of fish species and sizes from small roach and dace on a river, right up to big chub and barbel! This all-round ability comes from the rod's action. The main body of the rod has plenty of backbone, which is needed for fast pick-up of line when float fishing, especially when trotting or running a float a long way down a river. It enables a quick and firm connection with the fish. The actual tip of the rod is then fairly soft, which is important for cushioning small fish, ensuring you can fish light lines and small hooks without losing them. The balance and modern abilities of this rod really come into play however, when a big fish is hooked. The middle sections still have a progressive action to absorb lunges and pressure when needed. A lot of this is down to the fact that the joints on this rod are overlay joints rather than spigot joints, maintaining the balance of rigidity and a progressive action.

Tech-spec wise, it's packed with the latest technology and assets. It features Zero-90 Carbon Technology, which ensures a super crisp action, and helps you cast incredibly accurate thanks to a reduction in twist and wobble when the rod is compressed. The guides on the rod are top-spec Fuji single-leg reverse guides with durable Alconite rings, that are lightweight so not to affect the rods action and performance. Another finishing touch is the extra-lightweight cutaway Fuji Reel seat, which is comfortable to handle and perfect when holding a rod for long periods, giving the angler an incredible feel through the rod.

The 15ft rod in particular makes a perfect stickfloat tool, with the extra length aiding line control. The spacing of the rigs and large number of rings of the rod help ensure that line peels smoothly off the reel without any tangles or sticking to the blank, even in wet conditions. You may also notice that the guides do change colour throughout the rod, and this is simply because the highest quality guides we wanted to use on the top end of this rod are only available in certain colours. We didn't want to let this cosmetic factor compromise the quality of the rod. An A-grade cork handle, with a bespoke Guru EVA hand grip and adjustable hook-up point finished this bad boy off perfectly.

TOPKITS AND ACCESSORIES

There are three separate, same-length 2.4m topkits available that each have different bore diameters to take different elastics. All these come pre-bushed with quality PTFE bushes.

The thinnest Match Kit has a 3.5mm bore, perfect for all lighter solid elastics and thin hollows up to around a Pink Hydro Elastic.

The next step up is the 2.4m Match Power Kit with a 4.7mm bore and will cater for all hollows and solid elastics to the diameter of a Black Hydro Elastic with ease.

The thickest bore kit is a Carp Power Kit, featuring a 5.8mm bore catering for any elastic thickness, comfortably taking a Red Hydro Elastic.

All these topkits come with a reinforced wrap in the perfect place for the angler's chosen side-puller system to be placed. The Cupping Kit for the pole is cut perfectly to fit the Guru Rapid Release Pole Cup Adapter and is the identical length to the top kits without cutting it down.

N-GAUGE

N-GAUGE 9FT FEEDER

The 9ft Feeder is perfect for short-range work, or short accurate casts to islands! The soft action prevents hook pulls at close range, while the rod still has ample backbone to land big carp!

- Two piece, 40g casting weight
- 0.75oz, 1oz, 1.5oz carbon tips.

CODE	DISCRIPTION
GRD007	N-Gauge Feeder Rod 9 ft 2 pc

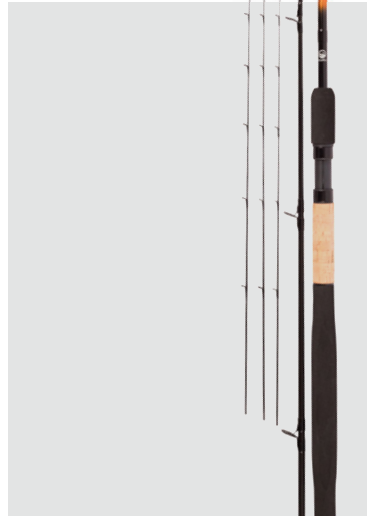

N-GAUGE 10FT FEEDER

The 10ft Feeder is one of the most popular length rods on commercials, ideal for all kinds of ledgering from bomb, Method, Hybrid and Pellet Feeder work. A balance of softness in terms of fish playing action, with power for accurate casting and controlling big fish. From skimmers and F1s in winter, to angry summer commercial lumps - this rod can do it all.

- Two piece, 50g casting weight.
- 1oz, 1.5oz and 2oz carbon tips.

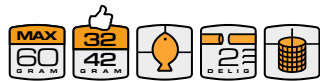

CODE	DISCRIPTION
GRD008	N-Gauge Feeder Rod 10 ft 2 pc

N-GAUGE 11FT FEEDER

The 11ft Feeder is one of the most popular length rods on commercials, ideal for all kinds of ledgering from bomb, Method, Hybrid and Pellet Feeder work. A balance of softness in terms of fish playing action, with power for accurate casting and controlling big fish. From skimmers and F1s in winter, to angry summer commercial lumps - this rod can do it all.

- Two piece, 60g casting weight.
- 1oz, 1.5oz and 2oz carbon tips.

CODE	DISCRIPTION
GRD009	N-Gauge Feeder Rod 11 ft 2 pc

N-GAUGE 12 FT POWER FEEDER

The 12ft Power Feeder does exactly what is says on the tin! While the top end of the rod has cushion and action that prevents hook pulls when fishing lighter for smaller fish, the bottom end of the rod kicks-in to allow you to cast a long way and control the biggest of commercial creatures. An all-round power tool!

- Two piece, 80g casting weight.
- 1.5oz, 2oz and 3oz carbon tips.

CODE	DISCRIPTION
GRD010	N-Gauge Power Feeder Rod 12 ft 2 pc

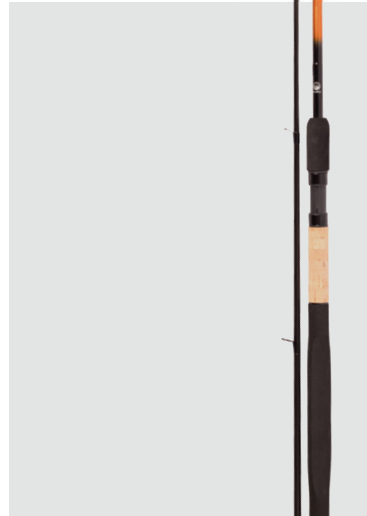

N-GAUGE 10FT PELLET WAGGLER

The 10ft Pellet Waggler is a lightweight and balanced rod, with ample backbone for punching out pellet wagglers and playing commercial fish. The short length makes it easy to handle and maneuver, ideal when mugging fish in the summer or casting tight to features at close range. The 10ft Pellet Waggler maintains an absorbing through action, taming all sizes of fish with ease.

- Two piece, 15g casting weight.

CODE	DISCRIPTION
GRD011	N-Gauge Pellet Waggler Rod 10 ft 2 pc

N-GAUGE 11FT PELLET WAGGLER

The 11ft Pellet Waggler is very similar to the 10ft, with a small amount of extra power for fishing that extra distance. The 11ft maintains a through playing action to absorb every head shudder and lunges of fish no matter what the size, and can be fished at a surprising distance with a balanced set-up!

- Two piece, 15g casting weight.

N-GAUGE SPECIMEN RODS

The N-Gauge Specimen rods are a highly versatile range designed for the specialist, pleasure and specimen angler targeting natural and commercial waters.

This latest range has been developed with 30 & 40 Ton tensile strength carbon to create a progressive power action, meaning the rods bend throughout the blank gaining more power progressively as the rods are bent further – perfect for playing big fish. Alongside this action, the rods remain light, well balanced and extremely comfortable to use. SEA-GUIDE anti tangle guides with slim Zirconia rings drastically reduce the risk of thin mono and braided lines 'frapping up' on the butt guide during the cast.

Our three dual-tip rods in the range 1.25lb, 1.5lb and 1.75lb are perfect for both feeder and float fishing on rivers and still waters. Each twin tip rod has a tubular top with a smooth progressive action suitable for float fishing and feeder fishing. The quiver top comes supplied with two additional carbon quivers balanced with the test curve of each rod suitable for all feeder work on natural and commercial venues.

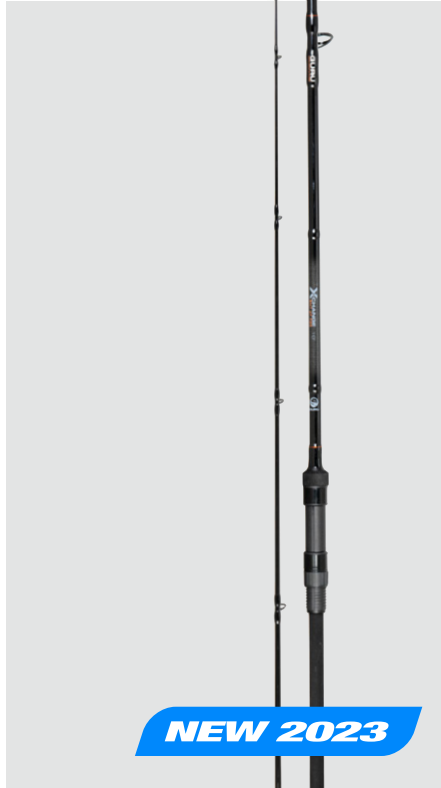

The final rod in the range is the powerful 2.25lb Barbel rod which has an action designed for fishing big 4-5oz feeders on bigger rivers like the Trent when authority for both casting and playing hard fighting fish is required.

N-GAUGE QUIVER TIPS

All N-Gauge Quiver tips are made from high quality carbon and are specifically designed for the N-Gauge rod range.

GRD257	X-CHANGE BAIT UP 12' 2pc 280g

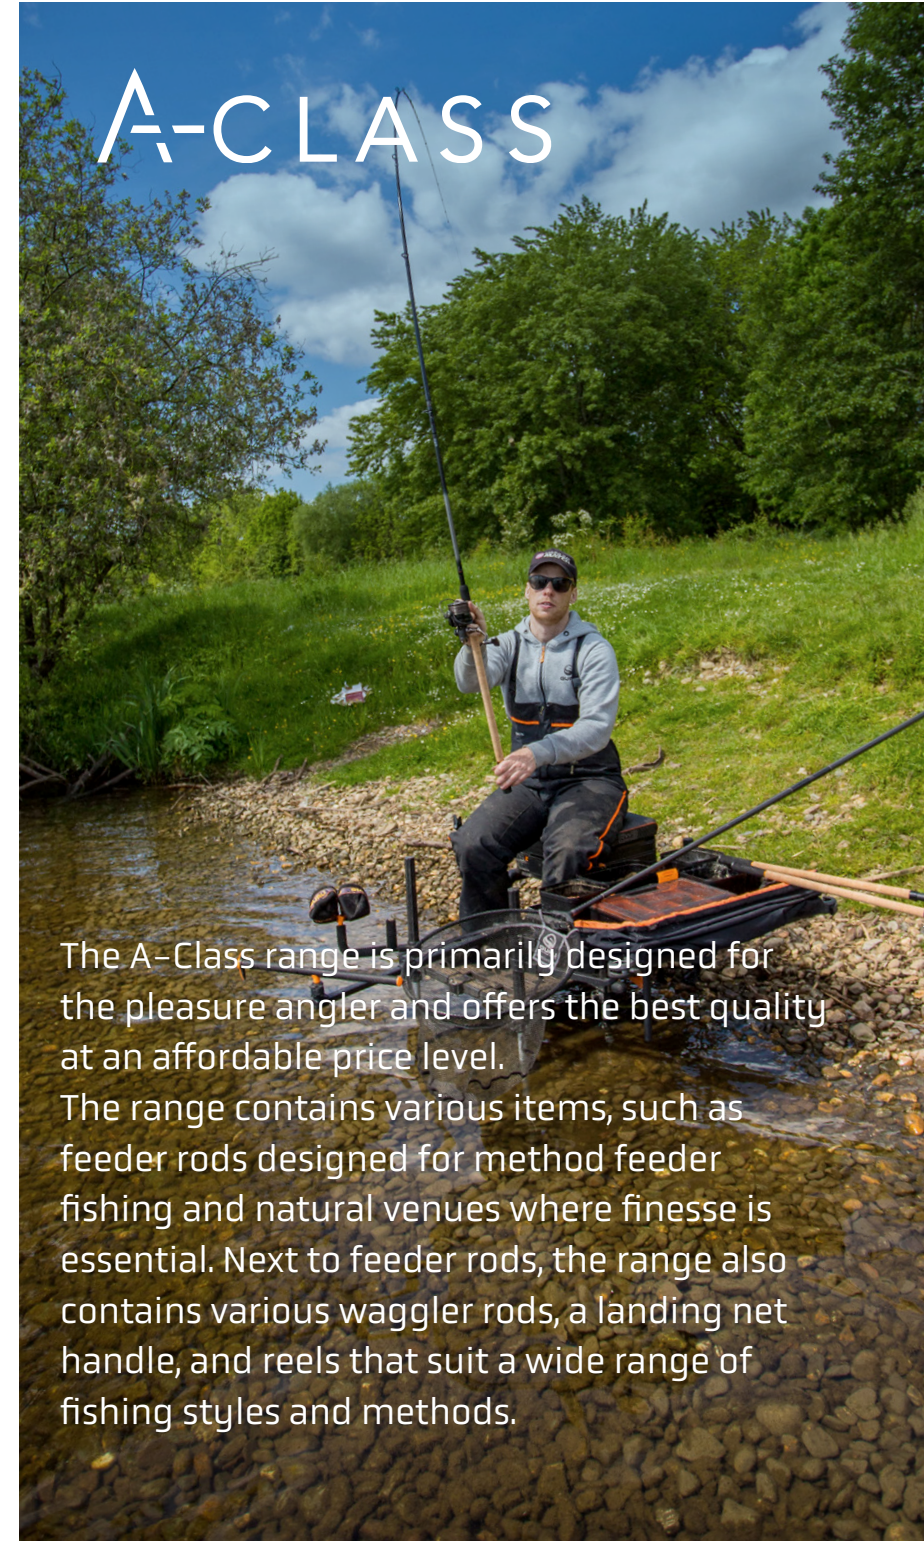

X-CHANGE BAIT-UP FEEDERS

Designed and developed specifically for baiting-up for the serious feeder angler, with the likes of Steve Ringer having a big hand in these latest tools coming to market! During the current feeder fishing boom, anglers have required a specialist rod for baiting-up, enabling them to be quick and efficient during the process. These two-piece rods are available in 10' and 12' versions to cater for the different distances that anglers now need to bait-up at, with casting weights of up to 170g (10') and 280g (12') allowing anglers to bait-up with big, heavy and feed-packed feeders effectively. The powerful and fast action of the rods means that they can be compressed and loaded-up to cast to long-range with upmost accuracy, while the rapid tip action helps to empty the feeder as the rod is jerked, releasing the bait from the feeder perfectly. This can be used to empty the feeder at different depths to gain calculated baiting-up edges! Having strategically placed anti-frap guides prevent crack offs when punching heavy feeders out, and the end eye on both rods is 'anti-frap' preventing the annoying twist-up that often happens when baiting up with big feeders around the end eye on the swing-back of a cast. Of course, there's the long handle and bespoke Guru butt-grip for ultimate comfort, control and accuracy. Ideally, the rods can be used in conjunction with X-Change Bait-Up Braid and Bait-Up Feeders, which are all designed to hold then release feed effectively and make up a deadly bait-up range of products!

A-CLASS

The A-Class range is primarily designed for the pleasure angler and offers the best quality at an affordable price level.

The range contains various items, such as feeder rods designed for method feeder fishing and natural venues where finesse is essential. Next to feeder rods, the range also contains various waggler rods, a landing net handle, and reels that suit a wide range of fishing styles and methods.

A-CLASS MINI METHOD FEEDER 9'

The A-CLASS METHOD Feeder rods have been designed for commercial fishing styles. These rods feature a slim blank with a strong and stiff action. Ideal for carp on commercials where you want extra power down the blank of the rod. All rods are supplied with two quiver tips.

- Weight: 155g
- Casting weight: 1-30g
- Line rating: 3-10lb

REELS

The N-Gauge Specimen Reels have been designed to cover a wide range of fishing situations, whether you're targeting double figure carp on a commercial, or hard fighting barbel on a river, these N-Gauge Specimen Reels have you covered. One of our main goals with the N-Gauge Specimen reel project was to cover a vast range of fishing scenarios, that's why we've developed three-reel sizes; 4000, 5000 and 6000, covering every fishing situation you're likely to come up against. Each N-Gauge Specimen Reel has 5+1 Carbon Ball Bearings which provides increased cranking performance, an aspect that is vital on a specimen style reel.

The N-Gauge Specimen Reels feature a lightweight graphite body that provides the reels with the perfect balance of strength and performance. All the N-Gauge Specimen reels have an aluminium spool, an essential aspect to this reel's performance and durability. Along with an aluminium handle and soft touch T-shape handle knob, giving you ultimate control when playing hard fighting fish. Finishing off the reels is an Adjustable Free Spool system which allows you to set the Free Spool for steady release, beneficial when targeting hard fighting fish such as barbel and carp. The adjustability of the N-Gauge Free Spool allows you to intricately fine tune the system for optimum performance.

Key features

- 5+1 Carbon ball bearings
- Graphite body
- Graphite body cover
- Graphite rotor
- Aluminium spool
- Aluminium handle
- Infinite anti-reverse
- Soft touch T-shape handle knob
- Thick wire bail arm

GRD270	N-Gauge Specimen 6000 Spare Spool

BACK TO CONTENTS

The A-CLASS 4000 REEL is a true all-around reel designed for feeder and waggler fishing. This 4000-size reel has everything you can expect from a reel in this category and offers great value for your money in combination with one of the A-CLASS rods.

A larger addition to the A-Class reel family in this new 5000 size, suited to distance fishing and balanced with longer rods – perfectly matched with the new 12ft, 13ft and 14ft A-Class Distance rods! The Graphite body and side plate gives the reel upmost durability, while the Aluminium spool and handle keep weight to a minimum. There's also an infinite anti-reverse and smooth front-drag clutch system for fish playing control, with a thick wire bail arm that is averse to any bending. The five ball bearings and line roller create super smooth action, with lots of power for retrieving heavy feeders and big fish from a distance. Spare spool also available separate, and of course all spools feature an effective non-line-damaging line clip.

Key features

- 5+1 Carbon ball bearings
- Graphite body
- Graphite body cover
- Graphite rotor
- Aluminium spool
- Aluminium handle
- Infinite anti-reverse
- Soft touch T-shape handle knob
- Thick wire bail arm
- Supplied with one spool
