

CATALOGUE MARCH 2024

Welcome to the latest and greatest edition of the Korda trade catalogue. We've got a huge amount of new kit to showcase so please take some time to look through and familiarise yourself with our latest gear.

We are also more active than ever on the social media platforms, whilst constantly working on new and existing projects to help sell the kit that you buy from us.

Thanks for your support,

Team Korda

HELI SAFE - 2 per pack

This ingenious system revolutionised fishing with helicopter rigs, as it meant that leads could consistently be discharged as soon as you hooked a fish, whenever the situation meant that this was essential. As well as dropping the lead when you are fishing in very weedy or snaggy situations, it is also popular with anyone using a chod rig, where ejecting the lead increases your chances of landing a fish, especially at long range where a heavy lead is being used. There is also the option though to fit a small plastic collar (supplied) which fixes the lead in place, for use in situations where dropping it isn't necessary, but you still want the versatility that the Heli-Safe System offers. It can be used in conjunction with leaders – such as any ring swivel leader in our Dark Matter or Kable Leadcore ranges, which can be adapted to fit the Heli-Safe bead – or with a naked set-up with your main line straight through to it. Heli-Safe System works perfectly in conjunction with our Leadcore Chod Safety or Naked Chod Safety systems. Each pack contains two Heli-Safe beads, in a choice of green or brown, along with all the bits you need to make it work – including instructions.

CODE	DISCRIPTION
KHDG	Green
KHDB	Brown

MINI HELI-SAFE / 2 per pack

The Mini Heli-Safe is a scaled down, compact version of the original and retains all of the features that helped to make it such a huge success... plus a few more.

It still works in exactly the same way, which was revolutionary when the Heli-Safe first hit the market. We were able to arm anglers with a way to fish any helicopter style presentation, but with the ability to drop the lead as soon as a fish was hooked. This was a massive advantage in weedy or snaggy situations, or when using set-ups such as chod rigs.

The Heli-Safe also allowed anglers to fish in this way quickly and effectively, simply by attaching a lead to the system, and the product did the rest, releasing the lead as soon as your hook link swivel pulled against the top of the bead. Technology has moved on since then, and we have managed to make the system much smaller, which not only makes it less obtrusive on the lake bed; but also reduces drag through the air and will improve your distance when fishing at extreme range; as well as making it less likely to get caught in weed or snags during the fight, once the lead has been jettisoned.

Aside from being more compact, the biggest difference to the original is that it now has three different ways that it can be set – it comes fitted with the normal tensioning spring that you will be familiar with from the original and which allows the lead to be dropped as soon as there is any pressure on the top of the Heli-Safe; but is also now supplied with a red spring which requires significantly more pressure to be applied before it ejects the lead, and is perfect in situations where you only need to get rid of the lead on the odd occasion and the lake is fairly clear of weed and snags; it also still comes with a collar, like the original, that prevents the lead from being ejected at all.

The Mini Heli-Safe comes supplied with a size 11 half barrel swivel and can either be fished naked or with leadcore. Despite its smaller size, it is still incredibly strong and can withstand the force of using any of the leads in our range, even when casting extreme distances.

Colours: Weed or Gravel. Quantity: 2 per pack

NOTE: Mini Heli-Safe is not compatible with Dark Matter leaders or the Heli-Safe Tubing Kit.

CODE	DISCRIPTION
KHDBS	Mini Heli-Safe Brown
KHDGS	Mini Heli-Safe Green

DARK MATTER ACTION PACK

The Korda 'action packs' are designed to give you all the components that you need for a particular set-up, all in one pack. The Dark Matter Lead Clip Action Pack allows you to create five complete lead clip set-ups, including tubing, with the option to fish them either running, or semi-fixed if you insert the retaining pin into the lead clip to fix the swivel inside it.

The brand new lead clips featured in this pack come with two holes – the top one is used for securing any size 8 swivel in place; whilst the lower one is compatible with a Kwik Link.

This safe, anti-tangle system allows the lead to discharge should it become snagged whilst playing a fish. The pack includes: 5 x Lead Clips; 5 x Tail Rubbers; 5 x size 8 Ring Swivels; 10 x retaining pins; 2m of Dark Matter Anti Tangle Tubing. Three different colours are available – weed, gravel, or silt.

CODE	DISCRIPTION
KDM001	Dark Matter Action Pack Weed
KDM002	Dark Matter Action Pack Gravel
KDM003	Dark Matter Action Pack Silt

DARK MATTER TUNGSTEN RIG TUBE

Dark Matter anti-tangle tubing is quite simply the new benchmark for rig tubing. It's the heaviest on the market, and is ridiculously easy to thread. These attributes have seen it become the tubing of choice for fussy anglers like Darrell Peck and Tom Dove.

Dark Matter tubing is super limp too, which helps it to follow the contours of the lake bed, keeping your setup well hidden. We make it in three colours, Weed Green, Silt and Gravel, which allows you to closely match the tubing to the lake bed that you're fishing over.

CODE	DISCRIPTION
KDMTW	Weed - 2 metres
KDMTG	Gravel - 2 metres
KDMTS	Silt - 2 metres

DARK MATTER NANO TUBING

Constructed from the same materials as the extremely popular Dark Matter Tubing but with a thinner outer diameter and a smaller bore, making the Nano version perfect for long distance casting.

Nano Tubing is 30% thinner than the original version, making it more supple, whilst reducing drag when casting. As per its bigger brother, the Nano version is impregnated with tungsten granules, helping it mould to the contours of the lakebed.

With its smaller bore, Nano Tubing can be used with line up to 0.40mm diameter and available in three versions: weed, gravel and silt. Supplied in packs of 2m.

To compliment the Nano Tubing a Dark Matter Nano Tail Rubber is also available, with smaller bore and slimmer profile to match the characteristics of the tubing.

CODE	DISCRIPTION
KDM004	Dark Matter Nano Tubing Weed
KDM005	Dark Matter Nano Tubing Gravel
KDM006	Dark Matter Nano Tubing Silt

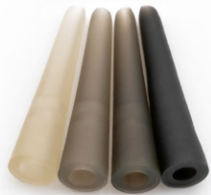

SAFE ZONE LEAD CLIPS / 10 per pack

A purpose-designed safety clip designed to hold your lead on the cast, yet allow the lead to eject with ease should it become snagged during a fight.

CODE	DISCRIPTION
KLCSW	Weed
KLCSG	Gravel
KLCSS	Silt
KLCSC	Clay

SAFE ZONE TAIL RUBBERS / 10 per pack

Tapered sleeves that fit snugly onto any Korda lead clip and keep the lead in place during casting. They tail also fit to the top of any Korda inline lead, forming a smooth join between the rig tube and the lead.

CODE	DISCRIPTION
KRW	Weed
KRGR	Gravel
KRS	Silt
KRC	Clay

HYBRID LEAD CLIPS / 8 per pack

Lead clips that have a size 8 Ring Swivel permanently molded into the body. Because the clip and swivel are inseparable, the lead will drop off every time it becomes snagged.

CODE	DISCRIPTION
KHCW	Weed
KHCC	Clay
KHCS	Silt
KHCG	Gravel

HYBRID TAIL RUBBERS / 10 per pack

Designed for specific use with the Hybrid Lead Clip when using heavy lines and leaders.

QC HYBRID LEAD CLIPS / 8 per pack

The Quick Change version of the Hybrid Lead Clip makes allows the angler to change rigs in no time.

CODE	DISCRIPTION
KQHCWS	Weed / Silt
KQHCGC	Gravel/Clay

LEAD CLIP ACTION PACK

All the bits you need to construct a fully functioning lead clip system. Each pack contains five Lead Clips, Tail Rubbers, swivels and 2m of rig tube. Action Packs are available in the four Safe Zone colours.

CODE	DISCRIPTION
KLCAPW	Weed
KLCAPG	Gravel
KLCAPS	Silt
KLCAPC	Clay

QR LEAD CLIPS / 10 per pack

These clips ensure rapid lead ejection in weedy or snaggy conditions. They are shorter in length and have been engineered with special grooves, which allow the Tail Rubber to slide off under minimal pressure.

CODE	DISCRIPTION
KQRWS	Weed / Silt
KQRCG	Clay / Gravel

SINKING RIG TUBE / 2m per pack

Tubing that can be used with all lead systems in the Korda range. It helps to prevent tangles, gives added abrasion resistance and comes in a range of colours to blend in with various lakebed conditions.

CODE	DISCRIPTION
KTW	Weed
KTGR	Gravel
KTS	Silt
KTC	Clay

NEW 2023

LEAD CLIP PIN / 10 per pack

The Multi Lead Clip is a universal lead system which can either be set to eject the lead as per a conventional lead clip or fished running style to confuse those extremely wary carp.

DF and the Korda boys who fish Gigantica every year have been using this 'running style' lead clip for many years and has proven to be one of the very best set-ups for hooking the extremely pressured carp on the Main Lake. The running method works by removing any pivot point which may help the carp eject the hook; the lead continues to slide up the main line as the fish pulls against it.

To force the lead to eject when snagged, use the supplied pins to plug the swivel or Kwik Link into the clip. This will lock the lead clip in to place and allow the lead to be ejected. Compatible with all tail rubbers in the Korda range but ensure the clip is wet before pushing on and for fish safety, never push the tail rubber on fully.

To fish running, do not plug the Swivel or Kwik Link, allowing the lead to slide up the main line. Available in Weed/Silt and Gravel/Clay.

CODE	DISCRIPTION
KLCPG	Lead Clip Pin Gravel/Clay
KLCPW	Lead Clip Pin Weed/Silt

SAFE ZONE ANTI-TANGLE SLEEVES / 25 per pack

These sleeves help push the hook link away from the lead system during the cast and even help to reset the rig after it's been rejected by a carp. They can be used with any lead arrangement.

CODE	DISCRIPTION
KATSW	Weed
KATSC	Clay
KATSS	Silt
KATSG	Gravel

SHOCK LEADER SLEEVES / 10 per pack

Soft, flexible sleeves that fit inside an inline lead to allow a size-8 swivel to be semi-fixed within.

CODE	DISCRIPTION
KSS	Green

TUNGSTEN ANTI-TANGLE SLEEVES / 8 per pack

Tapered anti-tangle sleeves that have been impregnated with tungsten to make sure that they sink extremely well, helping to pin the terminal tackle firmly to the lake bed.

CODE	DISCRIPTION
KDMATL	Long
KDMATS	Short

HELI SLEEVE / 10 per pack

The Heli Sleeve will sit neatly over a Kwik Link when threaded onto a Dark Matter or leadcore Leader when using a helicopter or chod style set up. It prevents tangles and grips the Kwik Link thanks to the special rubber compound.

CODE	DISCRIPTION
KHRG	Green
KHRB	Brown

SOLID BAG TAIL RUBBER / 10 per pack

Extra-long, slim tail rubbers that have been designed for use with Solidz PVA bags and inline leads. Once filled, the bag can be moistened and twisted around the long rubber, securing it in place for even the longest casts.

CODE	DISCRIPTION
KPTR	Green

RUN RIG RUBBER / 10 per pack

A shoulder has been angled on the rubber at 30 degrees, allowing the lead to sit at a much better angle than any standard running rig setup, minimising the chance of tangles during the cast.

CODE	DISCRIPTION
KRRRW	Weedy Green
KRRRC	Clay
KRRRS	Silt
KRRRG	Gravel

NAKED TAIL RUBBER / 10 per pack

The perfect product to use when fishing a lead clip “naked” i.e. when not using rig tubing or leadcore. Primarily designed for use with zig rigs when using a lead clip, these “naked” tail rubbers will help avoid tangles associated with this type of fishing. There is no need to use anti tangle tubing as the rig is nearly always going to be longer than the tubing. Traditionally when using a standard tail rubber and no tubing, the difference in diameter can cause the zig rig to tangle around the mainline. These specially designed Naked Tail Rubbers have a long tail that tapers down to a tiny bore, creating a seamless join to the main line. These can be used with all Korda lead clips including Hybrid lead clips.

CODE	DISCRIPTION
KNRG	Naked Tail Rubber Gravel/Clay
KNRW	Naked Tail Rubber Weed/Silt

SHOK BEAD / 15 per pack

A small, tapered bead that a size-8 swivel fits perfectly inside. It can be used for running rigs, marker floats or any type of setup that requires a buffer bead.

CODE	DISCRIPTION
KSK	Shok bead

TAIL RUBBER NANO / 10 per pack

Nano Tail Rubbers have been specifically designed to work in conjunction with the Dark Matter Nano Tubing. These tail rubbers feature a 1.4mm bore which creates a seamless join along the thinner Nano Tubing, helping to prevent tangles when fishing long range. The Nano Rubbers are compatible with all Korda Lead Clips and Inline Leads, aiding the construction of a safe, anti-tangle system. Available in three colours to match the Nano Tubing: weed, gravel and silt, with ten in each packet.

CODE	DISCRIPTION
KRNG	Tail Rubber NANO Gravel
KRNS	Tail Rubber NANO Silt
KNRW	Tail Rubber NANO Weed

5MM & 4MM RUBBER BEADS / 25 per pack

These soft rubber beads have a multitude of uses. Use them to prevent flying leads sliding onto your leader, to create the popular ‘Shokka Rig’ or as an anchor to hold a helicopter rig in place on a Safe Zone Leader.

CODE	DISCRIPTION
K4RBG	4mm Green
K4RBB	4mm Brown
K5RBG	5mm Green
K5RBB	5mm Brown

**RING SWIVELS SIZE II / 8 per pack**

These small Ring Swivels are perfect for use on helicopter systems and are often used with chod and hinged-stiff rig setups.

CODE	DISCRIPTION
KR11	Ring swivel Size 11

**SPINNER SWIVEL SIZE II**

This is the perfect choice for anybody who want less metal-ware on their spinner rigs.

CODE	DISCRIPTION
KSPIN3	Spinner Swivels Size 11 (12pcs)
KMW012	Spinner Swivel XX Size 11

NEW 2023**RUNNING RIG / 5 per pack**

Korda Hybrid Running Rigs are a crossbreed of the best parts of modern running rigs. The large eye of the special swivel creates very little friction, greatly enhancing bite indication. The small lead link and silicone sleeve combine to form a very neat, tangle-proof system. Each pack contains: 5 x Big Eye Swivels Size 8; 5 x Shok Beads, 5 x Kwik Links, and 5 x Silicon Tubing.

CODE	DISCRIPTION
KRR	Running Rig

**QC RING SWIVEL SIZE II / 8 per pack**

Perfect for changing rigs quickly when fishing helicopter style, or for creating the popular Spinner Rig favoured by Danny Fairbrass and Tom Dove.

CODE	DISCRIPTION
KQR11	Size 11 QC Ring Swivel

**CHOD SWIVELS / 8 per pack**

These size-eleven ring swivels have been subtly re-engineered to allow for putty to be securely moulded around the barrel.

CODE	DISCRIPTION
KCHS	Chod Swivels Size 11

**QC ROUND RING SWIVEL SIZE II / 8 per pack**

Designed as the ultimate quick change swivel for chod and hinge rigs.

CODE	DISCRIPTION
KRQR11	Size 11 QC Round Ring Swivel

**KWIK LINK / 20 per pack**

A universal quick-change link for attaching leads, Link Loops or marker floats to swivels. Available in two sizes.

CODE	DISCRIPTION
KWL	Kwik Link Standard Size
KWLXS	Kwik Link Extra Small

STICK KLIPS / 20 per pack

A slim, quick-change clip designed for speedy rig changes when using PVA sticks.

CODE	DISCRIPTION
KSCS	Stick Klips Small
KSCM	Stick Klips Medium

**SPINNER RING SWIVEL SIZE II**

This size 11 swivel also helps to create very neat spinner boom sections, with the ring at the other end of it giving plenty of movement, and allowing you to crimp tightly to it, or if you're using more supple materials which are being tied directly to the ring.

CODE	DISCRIPTION
KSPIN2	Spinner Ring Swivel Size 11
KMW011	Spinner Ring Swivel XX Size 11

NEW 2023**RING KLIP / 20 per pack**

A quick-change clip that gives the hook link excellent freedom of movement when clipped onto a size-8 swivel.

CODE	DISCRIPTION
KRKP	Ring Klip

**NEW 2023****HOOK KLIP MEDIUM / 10 per pack**

The ability to quick change your rig components has never been so popular in modern day carp fishing. The prominence of the spinner-style quick change mechanism is one of the reasons why that particular rig set-up is extremely prevalent in the modern-day carp scene.

These Hook Klips incorporate those same QC features but transpose them to many other styles of rig. Whether that's a Blowback Rig for bottom baits or IQ D rig for wafers, these small metal latches make changing your hook quickly, an extremely easy process, whilst maintaining the mechanics of your chosen rig.

The eye of the Hook Klip is situated in the direction of the kicker to allow it to be pushed over without tearing and will sit discreetly out of sight. When the time comes to change your hook, simply slide back the kicker and unclip the old hook and replace with a new one.

Hook Klips are extremely durable, with a black nickel-plated coating. They can be used with monofilament or braid, making them the perfect addition to a multitude of rig uses.

CODE	DISCRIPTION
KMW010	Hook Klip Medium

SWIVELS SIZE 8 / 25 per pack

This swivel fits snugly in all of our lead clips and inline leads. A non-reflective finish and breaking strain of over 60lb make this the swivel that all others are judged against.

CODE	DISCRIPTION
KS20	Swivels Size 8

QC RING SWIVEL SIZE 8 / 8 per pack

The size 8 quick change swivel with a large ring attached to the eye. Ideal for fishing helicopter style.

CODE	DISCRIPTION
KQR8	QC Ring Swivel Size 8

RING SWIVELS SIZE 8 / 8 per pack

Our size 8 swivels with a large ring attached to one eye. This provides the ultimate in flexibility, enabling the hook link to fold back against the rig tubing on the cast, which prevents tangles.

CODE	DISCRIPTION
KR8	Ring Swivels Size 8

BIG EYE SWIVELS / 10 per pack

A multi-purpose swivel, ideal for use with running rigs.

CODE	DISCRIPTION
KBES	Big Eye Swivel Size 8

QC SWIVEL SIZE 8 / 10 per pack

The classic Korda size 8 swivel re-engineered to feature a quick change loop, allowing the angler to change hook links in an instant.

CODE	DISCRIPTION
KQS20	QC Swivel Size 8

BACK TO CONTENTS

PTFE QC RING SWIVEL SIZE 8
(8pcs)

The Korda Size 8 and Size 11 PTFE COATED QC RING SWIVELS have been designed to allow anglers to quickly change hook lengths whilst maintaining a strong and reliable connection. The QC, or Quick Change, element has become a firm favourite with Team Korda and allows the rig to be changed and re-cast in a minimal amount of time... capitalising on fish feeding on your spot. HINT: Cover the connection with an anti-tangle sleeve.

CODE	DISCRIPTION
KMW004	PTFE Coated QC Ring Swivel Size 8

PTFE RING SWIVEL SIZE 8
(8pcs)

The Korda Size 8 PTFE COATED RING SWIVEL has been designed to fit inside Korda Lead Clips, Inline Leads and Bait-Up Method Feeders. The ring creates a hinge in-between the lead system and the hooklink which is designed to allow the rig to lay correctly on the bottom.

CODE	DISCRIPTION
KMW002	PTFE Coated Ring Swivel - Size 8

PTFE SPINNER RING SWIVEL SIZE 11
(8pcs)

The Korda Size 11 PTFE COATED SPINNER RING SWIVEL has been purposefully designed for creating the popular Spinner/Ronnie Rig. The Polytetrafluoroethylene (PTFE) coating makes it the perfect coating for our swivels as it reduces friction between the barrel and swivel eye, allowing them to rotate freely, this in turn will improve the hooking efficiency of your Spinner Rig. Having the most efficient rotation will increase your rigs mechanics and help them to perform at their optimum level.

CODE	DISCRIPTION
KMW005	PTFE Coated Spinner Ring Swivel Size 11
KMW013	PTFE Spinner Ring Swivel XX Size 11

NEW 2023

PTFE SPINNER SWIVEL SIZE 11
(8pcs)

One of the main principles of the spinner rig, as the name suggests, is that the hook is free to spin round and take a hold in the mouth of the carp. The more freely that it spins, the better the chances of getting a hookhold, and this is exactly what the PTFE Spinner Swivel achieves.

This version is the perfect choice for anybody who wants less metal-ware on their spinner rigs. Making it less obtrusive, by doing away with a metal ring as part of the swivel.

This size 11 swivel is designed specifically for us with this rig and can be used with various hook link materials

and just like our standard version, the hook can easily be added or removed from the 'crook' at the other end, which is then covered with a Kicker to keep everything securely in place. Polytetrafluoroethylene (PTFE) has one of the lowest friction coefficients of any solid material, which makes it perfect for coating swivels as it reduces any friction between the barrel and the eye. They are sold in packs of eight. Ring swivel version also available.

CODE	DISCRIPTION
KMW007	PTFE Coated Spinner Swivel Size 11
KMW014	PTFE Spinner Swivel XX Size 11

NEW 2023

PTFE QC RING SWIVEL SIZE 11
(8pcs)

The Korda Size 8 and Size 11 PTFE COATED QC RING SWIVELS have been designed to allow anglers to quickly change hook lengths whilst maintaining a strong and reliable connection. The QC, or Quick Change, element has become a firm favourite with Team Korda and allows the rig to be changed and re-cast in a minimal amount of time... capitalising on fish feeding on your spot. HINT: Cover the connection

CODE	DISCRIPTION
KMW003	PTFE Coated QC Ring Swivel Size 11

PTFE RING SWIVEL SIZE 11
(8pcs)

The Korda Size 11 PTFE COATED RING SWIVEL has been designed to create a strong hinge when using Chod or Hinged Stiff Rigs.

CODE	DISCRIPTION
KMW001	PTFE Coated Ring Swivel - Size 11

PTFE DOUBLE RING SWIVEL SIZE 11
(8pcs)

The Korda Size 11 PTFE COATED DOUBLE RING SWIVEL has been designed to provide maximum flexibility when using a helicopter set up. The extra ring helps to reduce tangles whilst the PTFE coating ensures a super-smooth improved rotation.

CODE	DISCRIPTION
KMW006	PTFE Coated Double Ring Swivel Size 11

SOLIDZ PVA BAG SYSTEM - XS & S, 25 per pack / M & L, 20 per pack

The Solidz range of bags has been designed to offer an alternative to the Funnel Web Systems. Solid bag fishing has become an increasingly popular method of delivering a compact package of bait at any range and in all conditions. Solidz are manufactured at Korda HQ to a stringent specification using the highest grades of Japanese PVA film

available. Packaged in a resealable wallet with easy-to-follow instructions. Each pack comes with a unique flat-packed Korda bag loader to make easy work of filling them. Available in four sizes to cover all situations and colour coded for easy recognition.

CODE	DISCRIPTION
KPVA1	XS - 45 x 100mm - 25 Bags
KPVA2	S - 55 x 100mm - 25 Bags
KPVA3	M - 70 x 110mm - 20 Bags
KPVA4	L - 85 x 110mm - 20 Bags

SOLIDZ SLOW MELT PVA BAGS - XS & S, 25 per pack / M & L, 20 per pack

These Solidz PVA Bags have a thicker film to increase melt time of the bag. Manufactured in the UK, the film is over twice the thickness of the original Solidz bags, delaying the melt time considerably, ideal when fishing long-range, in deep water or wet and rainy conditions. Manufactured from the highest-grade material available, with a neutral Ph. The original Solidz are extremely robust, but these slow-melt versions take that to the next level, with zero residue and free from any aroma.

Doubling up bags when in deep water is now a thing of the past, making it easier and quicker to tie bags up. The thicker bag is inherently stronger too, making them the ideal choice for casting long-range with heavy leads. Available in all existing sizes. Supplied in packs of 25 (XS/S) or 20 (M/L).

CODE	DISCRIPTION
KPVA5	XS - 45 x 100mm - 25 Bags
KPVA6	S - 55 x 100mm - 25 Bags
KPVA7	M - 70 x 110mm - 20 Bags
KPVA8	L - 85 x 110mm - 20 Bags

NEW 2023

ORIGINAL FUNNEL WEB
PVA SYSTEM

This is the widest mesh of them all designed to create PVA bags of pellets and boilies etc.

CODE	DISCRIPTION
KFW	Tube, Kompressor & 7m of Funnel Web PVA
KOHR5	5m Hexmesh Refill
KOHR20	20m Hexmesh Refill
KOMR5	5m Micromesh Refill
KOMR20	20m Micromesh Refill

BOILIE FUNNEL WEB
PVA SYSTEM

This medium-width mesh is ideal for making large PVA sticks or small, compact bags of boilies.

CODE	DISCRIPTION

KBHR5	5m Hexmesh Refill
KBHR20	20m Hexmesh Refill
KBMR5	5m Micromesh Refill
KBMR20	20m Micromesh Refill

LONG CHUCK FUNNEL WEB
PVA SYSTEM

The narrowest mesh has been designed to create the ultimate PVA stick for long-distance casting.

CODE	DISCRIPTION
KLCFW1	Tube, Kompressor & 7m of Funnel Web PVA
KLCHR5	5m Hexmesh Refill
KLCHR20	20m Hexmesh Refill

SPREAD-EM WOVEN PVA TAPE / 5m

This woven tape has a coarse texture to its flat cross section; this makes it perfect for stringers because the texture will actually hold the baits apart even with the force of the cast.

CODE	DISCRIPTION
KPT	5m Dispenser

KWIK-MELT SOLID PVA TAPE WIDE
/ 10mm x 20m

Kwik Melt tape has become the favourite PVA tape for many of our most-admired big-carp anglers. It's great for stringers, as well as tying off PVA bags and securing hairs on the cast.

CODE	DISCRIPTION
KEMT	20m Dispenser

EAZI-MELT BRAIDED PVA STRING / 15m

Pull your baits onto a loop of string and then hand the string over the hook before pulling the top bait back up against the hook to tighten the loop so the loop cannot slip back off the hook in flight.

CODE	DISCRIPTION
KPS	15m Dispenser

KWIK-MELT SOLID PVA TAPE NARROW
/ 5mm x 40m

A handy twin dispenser offering 2 spools of solid 5mm PVA tape in a single convenient package.

CODE	DISCRIPTION
KEMT5	2 x 20m Dispenser

CHOD SAFE

If you use chod rigs, or hinged stiff rigs then you're going to want one of these neat cases. They're an impact-proof way to curve and store up to 28 perfect Mouth Trap hook sections, of a range of lengths. Two different diameter sections allow you to set, and keep both short and longer pre-tied chod rigs in the perfect fish-catching curve. What's more, there's also space for three pre-tied leadcore leaders (or similar) with Heli-Safe beads attached. Those clever design bods have engineered a pop-up handle to allow you to steam your chods into the perfect curve, without burning your fingers too!

The ChodSafe is finished in a soft-touch rubber and features a neat magnetic closure system to prevent it opening in transit. Each ChodSafe comes with thirty pins to secure your rigs to the foam-lined cylindrical sections.

CODE	DISCRIPTION
KBOX2	Chod Safe

BACK TO
CONTENTS

MINI RIG SAFE COMBI

Unlike the other Rig-Safe models, this one also provides storage for small essential rig components, such as boilie stops, beads, swivels, shrink tube and anything else of a similar size. These are kept in the 12 secure compartments that fill one side of the case, which snap shut to ensure there is no chance of them spilling out during transit. The other side of the Mini Rig-Safe Combi will hold 20 rigs of up to eight inches in length, which are stored neatly and held in place via the pins provided. It comes supplied with 15 standard pins for storing finished rigs on the high density foam board, plus 10 double pins that will hold rigs in place that are yet to have a swivel or similar attached to them. It features the specially machined, ridged aluminium bar

The Mini Rig-Safe Combi is made from high impact plastic and is incredibly strong, plus it is finished in soft touch rubber to allow a good grip in wet conditions. The clever magnetic locking system ensures that it can't come open during transit, but there are no latches to fiddle about with top open and close it when you have cold hands!

CODE	DISCRIPTION
KBOX4	Mini Rig Safe Combi

LARGE RIG SAFE

Those of you who use longer rigs or need more storage space will love the Large Rig-Safe! This is the ultimate rig storage system for anyone looking for more capacity than the existing Mini Rig-Safe offers, or needs somewhere to store pre-tied rigs of 12 inches or longer. It will hold up to 90 rigs, thanks to one side of it featuring double-ended storage, and the clever magnetic locking system means that it will never come open accidentally during transit, but is very easy to open when you want to, even with cold hands! The Large Rig-Safe features a specially machined, ridged aluminium bar to retain the hooks and keep them razor sharp until you're ready to use them, and it has been shaped so that if you're using a curved shrink

tube kicker it retains its shape if you store them point upwards. It comes supplied with 30 standard pins to hold swivels or loops in place on the high density foam inner, and prevent tangles, or if you prefer to tie your rigs to the right length when you arrive at the water, then you can make use of the 20 double pins which will keep those in place, rather than in a knotted mess! It is made from high-impact plastic, meaning that it is very strong, and is finished in soft-touch rubber, which not only feels nice in your hands but allows a good grip on it even when wet. The outside is marked up to 12 inches or 30 cm, so you can tie your rigs to exactly the length that you require.

TACKLE & RIG STORAGE

TACKLE SAFE

The Tackle-Safe provides the perfect end tackle storage solution for the mobile angler. Like the Rig-Safe range, it is made from high-impact plastic, meaning that it is very strong, and is finished in soft-touch rubber, which not only feels nice in your hands but allows a good grip on it even when wet. It features 29 different compartments of assorted size, allowing plenty of opportunity for storing even the smallest tackle items securely. It also comes supplied with a set of stickers that allow the angler to label each compartment with the contents.

CODE	DISCRIPTION

TACKLE BOX

Why did we make this? Easy answer: to give people options. We have looked at these for a long period of time and wanted to create a product that we felt was BETTER than what is already out there. It's the perfect all-round tackle storage system designed to accomodate the Korda Leader-Safe, Mini-Boxes, Korda spools, Kamakura hook boxes, ready tied rigs, clips, you name it.

CODE	DISCRPTION
KBOX6	Tackle Box

TACKLE BOX COLLECTION

The Tackle Box Collection is by far the most complete tackle storage system Korda has ever produced. Adding this to your armory will save you room for other bits and pieces, and will keep your tackle neatly organised. It features the already multifunctional Tackle Box, along with other accessories like a large leadersafe, two mini boxes with 9 and 16 compartments and three accessory boxes.

CODE	DISCRIPTION
KBOX16	Tackle Box Collection

MINI BOXES

Along with the new Tacklebox comes a range of mini boxes that are all specifically designed to fit neatly inside the tacklebox, making it an all-round tackle storage solution.

CODE	DISCRIPTION
KBOX7	9 Compartment Mini Box
KBOX8	6 Compartment Mini Box
KBOX9	8 Compartment Mini Box
KBOX10	16 Compartment Mini Box

LEADER SAFE LARGE

The Korda Leader Safe Large is a compact and tangle-free storage system for up to 6 leaders. It accomodates lead clips and Heli-Safe systems and it is designed to fit perfectly in the Korda Tackle Box when the sleeve is removed. The removable sleeve protects your leaders when stored outside the Tackle Box.

CODE	DISCRIPTION
KBOX12	Leader Safe Large

TUBING BOX

Forget meters of rig tubing spread around your entire carry-all or rucksack! Meet the Korda Tubing Box, a neat storage unit for all your rig tube. It holds up to 10m of rig tubing and it is designed to fit neatly inside the Korda Tackle Box. Inside you find a removable tray that can hold all sorts of small end tackle items as well.

CODE	DISCRIPTION
KBOX13	Tubing Box

LEADER SAFE SMALL

The Korda Leader Safe Small is a compact and tangle-free storage system for up to 3 leaders. It accomodates lead clips and Heli-Safe systems and it is designed to fit perfectly in the Korda Tackle Box when the sleeve is removed. The removable sleeve protects your leaders when stored outside the Tackle Box.

CODE	DISCRIPTION
KBOX11	Leader Safe Large

ACCESSORY BOX / 3 per pack

These smart little Accesory Boxes are perfect for storing small tackle items. They feature a removable divider to split the cavity into two equal spaces and they fit neatly inside the Korda Tackle Box, whilst a hinged identification tab allows easy removal from the Tackle Box. Every pack contains 3 Accessory Boxes.

CODE	DISCRIPTION
KBOX14	Accessory Box

RIG SPOOLS / 2 per pack

These Rig Spools have been designed to store zig rigs and chod rigs, and will neatly fit inside the Korda Tackle Box. They are made from high density foam, so your hook point can be pushed into the spool to hold the rig securely in place, without fear of damaging the point, and the other end is trapped via a pin (12 supplied with each pack). Each Rig Spool will comfortably hold up to six rigs, and you get two in each pack. The pins come in a canister which neatly fits into the centre of the spools, and as well as being used to hold the pins that it comes supplied with, they are also handy for storing other thing like Hair Stops or pieces of foam for zigs.

CODE	DISCRIPTION
KBOX17	Rig Spools

TACKLE BOX MAGNET

A powerful magnet designed to keep rigs in place on the Korda Tackle Box rig tray.

CODE	DISCRIPTION
KBOX19	Tackle Box Magnet

HOOK SAFE

The Hook Safe is the perfect storage solution to keep your hooks in perfect condition, especially if you've taken the time to hand sharpen them! The latest addition to our 'Safe' range has been designed to neatly fit inside the Tackle Box and will hold up to 67 individual hooks, in sizes from 2 to 8. The slotted silicone insert is designed to hold each individual hook securely in place, and without the risk of damaging the point when putting them into, or taking them out of, the box. The box itself is made from high impact hard plastic,

with magnet fastening to ensure that it can't come open during transit, but is very easy to open and close when you need it to. The lid has a built-in, flip up magnification lens, which can be used to check hook points, and is held in place by a magnetic fastener when not in use. The Hook Safe is also ideal for those who use rigs where a hair is whipped on separately – such as variations of the spinner rig – as it means you can tie them in advance and neatly store them.

COMPAC LUGGAGE SYSTEM

The Compac luggage system provides a neat and water resistant storage solution for terminal tackle and other angling essentials. Made from high quality EVA fabric, it is strong, durable and extremely light, helping you to stay organised and mobile on the bank.

There are different sizes and shapes available to suit every situation.

COMPAC CAMERA BAG / Small - Medium - Large

If you've spent a lot of money on camera kit then you want to ensure that it stays in perfect condition when you take it fishing with you, but also that it remains portable and easily accessible when you need to use it. The range of COMPAC Camera Bags has been designed specifically for angling, by anglers who are photography fanatics, and the range of three bags has you covered, whether you are just taking a compact-style camera, a basic SLR or a full kit with several lenses and other accessories.

All three COMPAC Camera Bags are made from high quality, durable EVA, which is water resistant, as are the zips that have been used, to ensure that your camera kit stays dry in almost any scenario and will continue to do so for a long time to come. The inside of these bags is foam padded and lined with fleece, which will help keep your kit dry should you put it away damp or in situations where condensation could be an issue, as well as ensuring that it isn't scratched during transit.

The MEDIUM and LARGE versions also feature moveable dividers to keep items such as a camera body, lens and flashes separate and prevent them knocking against each other and potentially causing damage and can be positioned wherever you need them to be. An elasticated internal pocket can hold up to five SD cards, ensuring they are easily accessible whilst also keeping them safe. Each model also has multiple zipped internal pockets to store other essential items such as filters, lens clothes, cleaning fluid, brushes, and the like. A removable, adjustable shoulder strap ensures that it is easy to carry. As well as having space for a variety of smaller accessories.

The SMALL size will hold a standard SLR-style camera with a lens attached; MEDIUM will hold a standard SLR-style camera with lens attached, plus a separate lens or flash gun; LARGE will hold a larger SLR-style camera with the lens attached along with two other lenses or flash guns.

TACKLE & RIG STORAGE

COMPAC ORGANISER

For those of you who prefer to store your terminal tackle in our COMPAC Range of pouches and not a Tackle Box/Tackle Safe, the new COMPAC Organiser is the perfect solution as it will ensure you can find what you're looking for, when you need it! The COMPAC Organisers are ideal for anyone who regularly finds themselves in different fishing situations where different terminal tackle and tactics are required, as you can quickly grab whichever COMPAC you've loaded with the right gear, knowing you'll have everything you need for that session.

There is enough space for larger items such as marker floats, our PVA Funnel Web System, Krusha, Kutter, Zig Line, Zig Floats, and all manner of other items, which are stored in the bottom of the system underneath a removeable tray, which neatly sits on the top. This tray has been specifically designed to accommodate items such as the Kamakura hooks, all of the Korda square spools of hook link material, plus Accessory Boxes, along with other items, and the dividers can be removed so you can store things however you prefer. A large zipped mesh pocket in the lid is split into four compartments (three smaller ones within the main one) and is perfect for storing packets of smaller items such as swivels, hooks, Kickers, tail rubbers, or anything of a similar size.

Like all of the other pouches in the COMPAC range, it is made from high quality, durable, lightweight EVA, with a zipped, transparent lid, to help ensure that the contents stays dry whilst being easily accessible. It also has a handle to allow you to pick it up and move it easily.

KLOR / 10 per pack

The Klor hook pattern was designed and created by Danny Fairbrass to be an aggressive, strong, fast turning hook with brilliant hooking potential with a variety of rigs. It is incredibly strong and proven to be able to withstand fishing for big carp in extreme conditions, both at home and abroad.

The Klor has a very aggressive shape (even more so than our Kurv Shank hook), with the point in line with the eye, and this encourages it to turn quickly and take hold in the mouth of a carp. It is suitable for use with all manner of rigs, including the Combi Rig and Spinner Rig presentations, and with bottom baits, pop-ups and wafers.

The point is long, ultra-sharp and slightly in-turned which makes it far less likely to be damaged by nuisance species, such as crayfish and small fish, moving it around on the bottom, especially when fishing over gravel.

CODE	BARBED

KLOR4	Klor Size 4
KLOR6	Klor Size 6
KLOR8	Klor Size 8

KLOR BARBLESS / 10 per pack

The wire is a heavy gauge, and this results in a very strong hook which can be used in weedy or snaggy conditions, even when using braid, without fear of it bending out. During testing Danny landed carp to over 60lb from wild, French waters that were full of snags. Despite the thickness of the wire, the point remains very sharp and the whisker barb, once the hook goes in, will ensure it stays in place.

Sizes: 2, 4, 6 and 8
Available: Barbed or Barbless
Quantity: 10 per pack

SPINNER / 10 per pack

Our newest hook pattern designed purposely for use with the Spinner Rig.
The 55-degree eye angle follows the direction of a kicker which enables the hook to sit perfectly when used with a buoyant hook bait. Furthermore, the long, curved shank opens the gape of the hook when mounted on a Spinner Swivel offering the very best hooking potential.
Coupled with a super sharp, straight hook point, these hooks raise the bar even further when using the already deadly Spinner Rig.

KURV SHANK / 10 per pack

The Kurv Shank is a very versatile hook and can be used with both pop-up and bottom bait rigs, including popular presentations such as the KD and IQ D-rig. It has great hooking properties thanks to an aggressively in-turned eye and curved shank, which helps it to flip round and take a hold inside the mouth, even when using it without Shrink Tube or a Kicker. Hooking potential is also aided by its long, needle sharp point.

LONGSHANK BEAKED - 10 per pack

The original Korda Longshank X was based on the popular, original fly hook patterns, which found favour with carp anglers due to their shape and hooking ability – we made them much stronger and sharper. Fast forward 20 years and DF has been tweaking this ultimate carp catcher once again. Heavily influenced by his underwater experiences, Dan decided to make two major changes to one of his favourite patterns, making it an even deadlier option within his armoury. The first change was to create the hook with a beaked point. During testing, the beaked point provided more secure hook holds, increasing the hooked fish to landed ratio significantly.

KURV SHANK XX / 10 per pack

The Kurv Shank XX is two wire gauges thicker than the standard Kurv Shank hook. It has been designed, developed and tested for use in the most demanding of fishing situations in the world.

CODE	DISCRIPTION	CODE	DISCRIPTION
KKSXX1	Size 1	KKSXX6	Size 6
KKSXX2	Size 2	KKSXX8	Size 8
KKSXX4	Size 4		

LONGSHANK BEAKED B - 10 per pack

The other change was to in-turn the eye even further. The original pattern has a 20 degree in-turned eye, the new beaked version increases this to 40 degrees. This helps the hook flip and turn extremely quickly in the carp's mouth, ensuring consistently good hook-holds. In keeping with the original pattern, the Longshank Beaked is forged, with a stepped-up wire gauge for extra strength, whilst maintaining its durability with a PTFE coating. Available in sizes 2, 4, 6 and 8, barbed and barbless, with ten hooks per pack.

LONGSHANK X / 10 per pack

A strong, long-shank pattern with an ultra-sharp straight point and micro barb with a slightly in-turned eye for better hook holds. It is suitable for a host of pop-up and bottom-bait presentations.

KAMAKOTE HOOK POINT COMPOUND

The Kama Kote is an anti-corrosion hook point compound, designed to complement our Kamakura hook range perfectly. This small addition to your tackle box will ensure you are protecting your hook points from corrosion so that your super sharp hooks stay in perfect condition. This specifically made product is not petroleum based and is both odourless and transparent in water. It has excellent water resistance, remaining on the hook point for longer.

CODE	DISCRIPTION
KAM27	KamaKote Hook Point Compound

PROPOLIS CARP TREATMENT

Creating a waterproof seal over ulcers and open wounds. Propolis prevents dirt, debris, and pathogens from causing infection, and potentially killing the fish. Created with natural anti-microbial properties, and derived from bees, Propolis is known as nature's antibiotic, and helps ensure prime fish stay in prime condition.

CODE	DISCRIPTION
KCC2	Korda Propolis Carp Treatment

ULCER SWAB

As part of our aim to ensure that fish go back in at least as good a condition as when they were hooked, if not better, we came up with the Ulcer Swab liquid. A lot of the focus is on products for treating hook damage to the mouth, but this product is also perfect for use on abrasions, ulcers and other wounds anywhere on the body of the fish. Ulcer Swab is designed to clean and disinfect these areas, so as to prevent them from becoming infected by bacteria or fungus. Propolis can then be applied to seal the wound. It comes in a bottle with an eye-dropper style nozzle for easy application, and you get 30ml in each bottle.

LOOP BRAID 20LB
/ 1 per pack

This supple yet abrasion resistant braid is perfect for creating combi-style rigs as it's just stiff enough to push the hook away from the hook link when using neutrally buoyant baits. Ideal for creating rigs such as DF's favourite loop and boom combi-rig where the braided loop section is set up blow-back style utilising Danny's favoured lasso knot over additional metalwork such as rig ring or micro hook swivel. Although perfect for creating loop-to-loop style rigs, the Loop Braid works extremely well when tying rigs which require an Albright Knot. Loop Braid is a camouflaged colour in 20lb breaking strain, with 20m on each square spool which are shaped perfectly for slotting into your Korda Tackle Box.

CODE	DISCRIPTION
KLB20	Loop Braid 20lb

KICKERS - Green / Brown - 10 per pack

These robust rubber kickers take the hassle out of having to steam and shape shrink tubing to improve rig mechanics, as they can simply be slipped over the eye of the hook to give the perfect presentation.

CODE	GREEN	CODE	BROWN

NEW 2023

NEW 2023

LINK LOOPS / 15 per pack

A teardrop-shaped metal loop that is tied to the end of your hook link to enable you to quickly change rigs. They fit perfectly onto a Kwik Link or Stik Klip.

CODE	DISCRIPTION
KHLL	Non-reflective coating

KICKERS - Mixed yellow & pink - 10 per pack

On some waters adding a touch of colour to the hook can produce quicker bites, which is why they also come in a choice of bright colours. Yellow and pink have already proved very successful during testing.

CODE	DISCRIPTION
KICK07	Small (10-12)
KICK08	Medium (6-8)
KICK09	Large (2-4)
KICK19	X-Large (1-2)

NEW 2023

RIG RINGS / 20 per pack

A range of non-reflective rig rings that enable you to make rigs like the chod rig, blowback rig or D-rig.

CODE	DISCRIPTION
KRRXS	Extra Small
KRRS	Small
KRRM	Medium
KRRL	Large
KRRO	Oval

KICKERS - Mixed red & white - 10 per pack

Another variation that's well worth a try, whether you're fishing bottom baits or zigs.

NEW 2023

SILICONE SLEEVES / 20 per pack

These sleeves can be used to cover swivels on leads, Kwik Links, Stik Klips and Ring Klips, helping to keep everything tidy, secure and preventing tangles on the cast.

CODE	DISCRIPTION
KS3	Weedy Green

TAPERED SILICONE SLEEVES / 10 per pack

A tapered version of our silicone sleeves.

CODE	DISCRIPTION
KTSSB	Brown
KTSSG	Green

HOOK BEADS / 20 per pack

Korda Hook Beads grip the hook shank without the need for additional gluing. The special tapered design allows a ring or swivel to neatly buffer against the bead. These rubber hook beads fit tightly onto the shank of any hook pattern, and can be used to create a number of effective presentations. They're perfect for use with rig rings, to create blow-back rigs, or even variations of the all-conquering chod rig. They come supplied on easy-to-use spools, which each hold 10 hook beads.

CODE	DISCRIPTION
KHB	Hook Beads
KHBL	Hook Beads Large

FLOSS CAPS / 10 per pack

Floss Caps help to efficiently secure your hook bait to your chosen rig. Speedy, Simple and Secure- Braid Needle & Fine Needle (Compatible)- Burn Bait Floss onto the Floss Cap to secure- No knots required.

CODE	DISCRIPTION
KFLC1	Floss Caps Clear
KFLC2	Floss Caps White/Red
KFLC3	Floss Caps Pink/Yellow

HIGH GRIP HOOK BEADS / 20 per pack

Our specially designed High Grip Hook Beads are made with an increased surface area which means a large percentage of the bead is in contact with the shank of the hook. This design feature ensures that the High Grip Hook Bead will not slip when using large hook baits at long range. The slick tapered shape of the bead allows it to remain as small as possible whilst maintaining it's grip strength. The Medium size is designed to trap a MEDIUM Micro Ring Swivel (or MEDIUM Bait Screw Swivel) on the hook shank for a variety of rig presentation.

CODE	DISCRIPTION
KHBG	High Grip Hook Bead Medium
KHBLG	High Grip Hook Bead Large

SHRINK TUBE

Easy-to-shrink tubing that allows you to create a range of different rig presentations. Simply hold over steam and it will shrink down tight over hook eyes, swivels or knots. Available in 1.2mm, 1.6mm and an XL for very large hooks. The clear version is virtually invisible in water and is ideal for targeting particularly spooky fish.

SUPER WRAP / 10 per pack

Perforated plastic coating for your hook baits that will help them resist the attentions of crayfish and other nuisance species, while still allowing attractors to leak off. To fit, simply insert the hook bait and steam the coating over a kettle to shrink it onto the bait.

CODE	DISCRIPTION
SW12	Small, 8-12mm baits
SW22	Medium, 13-22mm baits
SW32	Large, 23-32mm baits

SILICONE TUBE / 1.5m per pack

Fine-diameter, soft, silicone tubing that has a multitude of rig applications. It is often used to trap the hair to the hook shank, or short sections can be pushed over the hook eye to aid hooking when floater fishing.

CODE	DISCRIPTION
KS05G	0.5mm Green - 1,5m
KS75G	0.75mm Green - 1,5m

D-RIG KICKERS / 10 per pack

These helpful kickers create an effective 'D-rig' without the need to tie tricky knots.

CODE	DISCRIPTION
KICK13	XL Green (Hook size 1-2)
KICK14	Large Green (Hook size 2-4)
KICK15	Medium Green (Hook size 4-6)
KICK16	Small Green (Hook size 6-8)

BAIT DRILL

These precision engineered drill bits come in a choice of 1mm, 4mm, 6mm, or 8mm diameters, making them perfect for boring-out any hookbait and adding buoyancy to it, via the matching cork sticks, which are provided.

These are best used with boilies or nut baits where you want to add some buoyancy, such as critically balancing a bait or creating a snowman set-up from your bottom baits – or even just if you leave your pop-ups at home by mistake! The narrowest diameter drill is designed to drill a hole through hard baits that can't be pierced using a baiting needle, or certainly not without splitting them. It is perfect for things such as air-dried boilies and pellets, and will bore a hole that can then be used to thread the hookbait onto your hair.

The end of the Bait Drill features a small spike which can be inserted exactly where you want to make a hole, and will ensure the drill doesn't slip, and is designed in such a way that it reduces the chances of splitting the bait whilst in use.

The Bait Drill has a black and green ergonomically designed handle to allow you to get a good grip for precision drilling. Each pack contains one Bait Drill and up to six cork sticks depending on size. Spare cork sticks in 4mm, 6mm, and 8mm are also available, and are sold in packs of 10.

CODE	DISCRIPTION
KRT001	Bait Drill 1mm
KRT002	Bait Drill 4mm
KRT003	Bait Drill 6mm
KRT004	Bait Drill 8mm

CORK STICKS

These high quality cork sticks are primarily designed to be used in conjunction with the Bait Drills to add buoyancy to hookbaits, but they also have all sorts of other uses from popping up a bunch of maggots to imitating a floating pellet when surface fishing. They come in a choice of 6mm or 8mm, with ten sticks in each pack with 4mm cork sticks to follow.

CODE	DISCRIPTION
KRT005	Cork Sticks 4mm
KRT006	Cork Sticks 6mm
KRT007	Cork Sticks 8mm

DM BALANCING WEIGHTS / 20 per pack

The DM BALANCING WEIGHTS can be used to counterbalance most pop ups / buoyant hook baits, this is particularly helpful when using naked Chod rigs where it can be tricky to obtain the weight needed to sink the pop up. They are also quickly interchangeable, which makes them perfect when trying to critically balance hook baits. They do not wear and are reusable, meaning they will last forever if not lost.

CODE	DISCRIPTION
KDMW01	Dark Matter Balancing Weights Mixed
KDMW02	Dark Matter Balancing Weights 0.30g
KDMW03	Dark Matter Balancing Weights 0.35g
KDMW04	Dark Matter Balancing Weights 0.40g
KDMW05	Dark Matter Balancing Weights 0.45g
KDMW06	Dark Matter Balancing Weights 0.50g

Available in 5 weights (0.30g – 0.50g) with each individual product laser etched with a number to identify the weight i.e. 0.30g is labelled as 30. In addition, a 'mixed pack' is available containing 15 weights (3 of each size). With the mixed pack, you can try all of the weights until you find one which is perfect, and then use the same size each time for that particular hook bait.

Did you know? Crayfish are attracted to tungsten, and anglers fishing waters with them in will tell you what a nightmare they are when using putty. The DM BALANCING WEIGHTS are the perfect solution to this issue when fishing waters that contain crayfish as they cannot pull them off the rig.

TIP: They will fit over ALL Korda size 11 swivels. We have done everything we can to try and control the tolerance of Korda size 11 swivel barrels, BUT sometimes they are a little tight to push on fully by hand. We recommend using a Krimp Tool to carefully bring the balancing weight and swivel together. Please note that they will not necessarily fit on competitor's size 11 swivels as sizes vary. Tungsten is a very hard material, it has little flex and therefore cannot be easily forced onto oversized barrels.

CONTENTS

ADJUSTABLE ZIG KIT

This neat kit makes zig fishing simple. The boom section keeps the rig clear of any bottom debris and features a ball bearing swivel giving rapid tangle-free rotation. The grey low-viz float is unobtrusive in mid-water and extremely buoyant, making it very quick to set the zig at the required depth.

CODE	DISCRIPTION
KKIT2	Adjustable Zig Kit
KKIT3	Large Zig Kit

ZIG LINE - 100m spool

Our first dedicated zig and floater hook link is fine, supple and camouflaged – everything you need to fool wary carp. The line carries a subtle green tint that has been formulated to blend in sub-surface. Zig Line is available in 7lb, 9lb and 11lb, on handy 100m spools.

CODE	DISCRIPTION
KZIG7	7lb (3.2kg), 0.22mm
KZIG9	9lb (4.1kg), 0.25mm
KZIG11	11lb (5kg), 0.28mm

MIXA / 10 per pack

The Mixa has a super-short shank, which can be easily hidden beneath a float hook bait, together with a huge gape and beaked point, which is offset to help hook cautious, pressured fish. This allows big fish to be landed on what is a relatively small, light hook.

CODE	DISCRIPTION
KMH6	Size 6
KMH8	Size 8
KMH10	Size 10
KMH12	Size 12

ZIG ANTI TANGLE SLEEVE

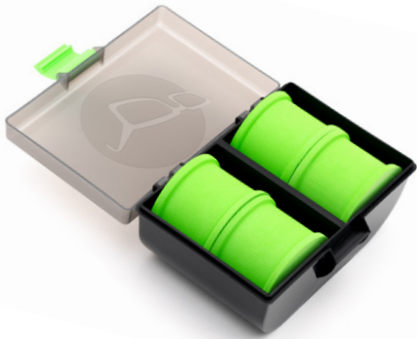

The Korda Zig Anti Tangle Sleeve helps to prevent tangles when zig fishing. It fits perfectly over a size 11 QC Swivel and is meant to be used with the ZigKit.

CODE	DISCRIPTION
KZIGAT	Zig Anti Tangle Sleeve

ZIG MAGNET

These amazing little gadgets help you to cast even quite long zigs, without the worry of tangles. The magnetic plate holds your hook until you cast, keeping it, and the hook link, clear of the ground and possible snags. The Zig Magnet screws into all banksticks.

CODE	DISCRIPTION
KZM	High-vis Green

ZIG BOX

If you want to keep your zig hook links in perfect condition until you need to use them, then look no further than the Zig Box. It has been designed to allow you to store even the longest of zigs on EVA foam spools so that there is no danger of them getting tangled, or there being damage to the hook link material or hook point. It also comes in very handy for storing pre-tied leaders. The hard, high impact plastic box has a tinted lid which closes securely in place via a clip-lock fastener, and has a lip all the way around the inside to help prevent water getting into it. It comes supplied with four 45mm diameter EVA spools, plus 20 pins for securing your zigs or leaders on them. It can also be used in conjunction with our Ready Zig spools, if you prefer to buy ready-tied zigs.

CODE	DISCRIPTION
KZB	Black

KRUISER CONTROL - 150m spool

This excellent main line has been formulated to give exceptionally smooth casting performance and its super-soft and supple nature makes for easy use of lightweight controllers and even freelined baits. A low-gloss, clear finish and near-neutral buoyancy ensures that this line is difficult for the carp to see as it hangs discreetly in the surface film.

CODE	DISCRIPTION
KM6	6lb (2.7kg), 0.25mm
KM8	8lb (3.6kg), 0.28mm
KM10	10lb (4.5kg), 0.30mm
KM12	12lb (5.4kg), 0.33mm

ZIG RIGS / 3 Per Spool

A range of zig rigs, tied with our 8lb Zig Line and size-10 Mixa hooks. Supplied on lightweight foam spools, along with three foam hook baits in black, yellow and pink.

CODE	DISCRIPTION
KCR062	Ready Zigs 6' Barbed, Size 10, 8lb
KCR063	Ready Zigs 8' Barbed, Size 10, 8lb

KCR067	Ready Zigs 8' Barbless, Size 10, 8lb
KCR068	Ready Zigs 10' Barbless, Size 10, 8lb
KCR069	Ready Zigs 12' Barbless, Size 10, 8lb

SURFACE FLOATS

These inline floats are highly visible when viewed from above the surface, so they can be clearly seen by the angler, but are almost invisible to fish below the surface. They are available in a variety of sizes, the smallest being just 5g which is perfect for flicking baits out close to the bank. The 15g and 30g sizes are great all-rounders for any situation and there are 50g and 80g versions which can be cast to the horizon! One feature that is a bit different is the quick-change system that allows you to quickly switch from one size of float to another, simply by sliding it off of your main line and using the specially designed quick-change swivel. This is perfect if the fish suddenly move out of range, or drift close in and you don't want to be crashing a heavy controller near them.

GOO

BACK TO
CONTENTS

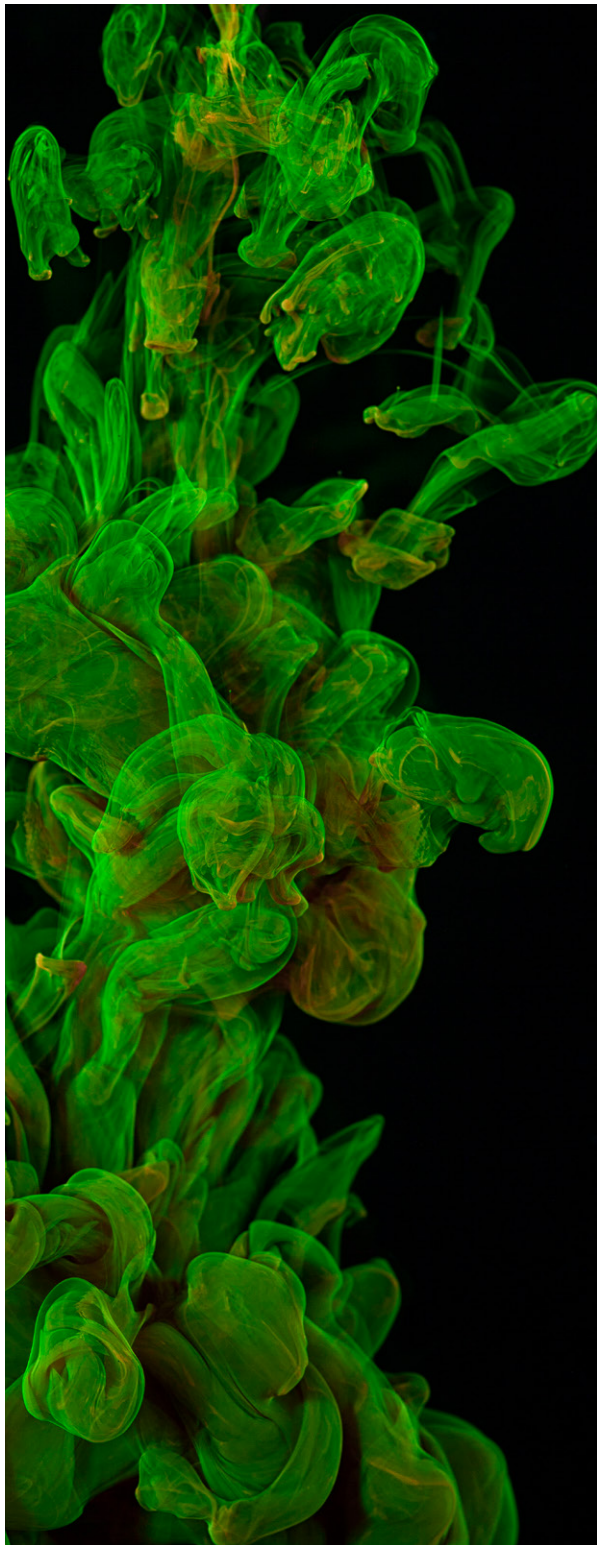

GOO - THE ULTIMATE LIQUID ATTRACTANT - 150 ml

The Goo is a soak, a plug and a spod-mix additive, all rolled into one awesome package. The cloud of attraction that comes off bait treated with Goo has to be seen to be believed, and this is one of the attributes that makes the Goo so revolutionary. But it's not the only one. The feeding triggers and flavour combinations housed in the mysterious liquids have been carefully tweaked to create the best and biggest feeding response.

The Goo was developed by Loutjie Louwies in South Africa, where it has been used to great effect for many years, leading to the dominance of the South African national team in the FIPSeD World Championships. The lads even gave England a beating in their own back yard, at Linear Fisheries, using the Goo.

Smokes have a greater viscosity than Supremes, and a few casts with a little added to your spod or your PVA bags will create the most unique cloud of smell, taste and colour and simply send fish into a frenzy around your hook bait.

The Supremes are slightly softer in colour, but just as effective and are ideal for use in almost every situation. Soak pellets, mix it with water to dampen groundbait or flavour floaters to add a unique edge, add it to PVA, soak skinned tigers, plug boilies; the uses and flavour combinations are endless. The Supremes are perfect for soaking into hook baits and are so natural smelling that their addition really can't be overdone. Having said that, a bottle goes a very long way!

BUBBLE GUM SUPREME

A sweet, uplifting, fruity and unbelievably juicy aroma... this is Bubble Gum Supreme Goo! It has a mouth-watering fruity smell that is deceptively potent. Like some of the other super popular Goo (Isotonic and Pineapple) from Kiana, it has a translucent, yellow hue, giving it a subtle colouration that doesn't dramatically change the appearance of the bait it is added to. The Bubble Gum Supreme Goo can be used on its own, but also acts as the perfect sweetener. Combine this unique flavour with berry or citrus flavours to create your own custom combinations. For inspiration, just think of your favourite Bubble Gum flavours when you were growing up!

CODE	DISCRIPTION
KG0039	Bubble Gum Supreme

JUNGLE JUICE SUPREME

The Jungle Juice Goo Supreme is a tropical mix of sweet and sour citrus flavours. A quick smell will give you a strong, zesty, fresh aroma - reminiscent of tropical fruit juice. The unique citrus blend, subtle colouring, and abundance of essential oils, help to make Jungle Juice Goo an immediate future classic. Ali Hamidi has always hailed the magic of citrus flavours, and during the most recent Monster Carp trip to The Graviers, in France, he used the Jungle Juice to catch fish up to 60lb+ for the cameras. Jungle Juice Goo Supreme has a very light, subtle hue and won't change your hook bait colour dramatically, unless they are white - in the same way other Goo can. Being a 'Supreme' variant, it has a thinner consistency that allows it to soak into the core of your hookbaits and/or cover your loose feed perfectly. Once in the water they will slowly leak a powerful blend of the Jungle Juice Goo's sweet, acidic, citrus ingredients and attractants. Kiana have explained that during testing, Jungle Juice had an "extreme wow factor" when it comes to catching fish.

CODE	DISCRIPTION
KG0043	Jungle Juice Supreme

MOONSHINE SUPREME

As part of the 10th Phase of Kiana Goo releases we have "distilled" a very special batch of Goo. 'Moonshine' Supreme has a grainy, whiskey-style flavour, reminiscent of your favourite tippie from Tennessee, in terms of its look and smell. An old school classic, whiskey flavours have a proven track record for catching carp. Moonshine Supreme Goo contains no alcohol, but you would be forgiven for thinking that the carefully crafted flavour and smell would be at home in a shot glass! Moving beyond the light-hearted name, Moonshine uses natural blends of ingredients to make up this unique smell and taste profile, and will generate quick bites. Light in colour, and potent in flavour... a quick smell really does hit the back of your throat and takes your breath away, just like a real shot of whiskey. Moonshine Goo Supreme is great for soaking into pop-ups and wafers, which can be used in any water temperature. PLUS why not try a shot of 'Moonshine' in your Solidz PVA bags.

CODE	DISCRIPTION
KG0044	Moonshine Supreme

DRAGONS BREATH SUPREME

Get ready for a fiery blast of hot, spicy carp catching magic that turns any hookbait into a fireball of attraction. A hot blend of spices that come together to create a flavour you know carp love but can't quite put your finger on... this is Dragons Breath. As you can imagine it is orange like flames and will make any bait you add it too taste and look fire. Kiana say this new flavour was another one the field testers tried to blag for themselves for another year. They just didn't want to share this mythical pulling power of Dragon Breath Supreme after testing it for several years.

CODE	DISCRIPTION
KG0046	Dragons Breath Supreme

SALAMI SMOKE

The FIRST meat flavour Goo EVER! A deep, strong authentic Salami flavour which has proved brilliant in deep water lakes during testing, pulling the fish down to the Salami soaked hook baits. A very hard flavour to describe the spicy, sweet, hot and savoury flavours which combine in a perfect meaty mix to create Salami Smoke Goo. The viscosity of Salami Smoke makes it ideal for adding to PVA bags before they are cast out, or for painting on to hook baits. The Salami Smoke works well in colder water temperatures, below 16 degrees, as well as in warmer ones too.

CODE	DISCRIPTION
KG0045	Salami Smoke

NEW 2023

FRUTTI DI MARE SUPREME

Frutti di Mare literally translates from the Italian for 'fruits of the sea' and conjures up images of the Mediterranean coast and fresh seafood platters loaded with various molluscs and crustaceans. We know that carp love to eat the freshwater varieties of these aquatic creatures in our lakes and rivers, and that flavours based on the ones found in the sea have been proven carp-catchers over many decades, so it is no surprise that this new Goo has been achieving some fantastic results during testing! Being a Supreme version of Goo, it has a thinner consistency which makes it ideal for soaking deep into your hookbaits if left coated in it for a longer period of time, and thus ensuring that it is still leaking off a scent trail for many hours after you've cast out. It is red in colour.

CODE	DISCRIPTION
KG0051	Frutti Di Mare Supreme Goo

NEW 2023

PASSION FRUIT SUPREME

Passion Fruit is a bit different as fruits go, as it combines both tartness and sweetness, as well as having a slightly floral aroma, which makes it quite distinct from anything else. The sweetness is more delicate than some fruits, and the tartness is similar to citrus, which creates a natural balance, and the carp – and anglers – seem to love it, if results during testing have been anything to go by. Being a Supreme version of Goo, it has a thinner consistency which makes it ideal for soaking deep into your hookbaits if left coated in it for a longer period of time, and thus ensuring that it is still leaking off a scent trail for many hours after you've cast out. In terms of the colour, it is the sort of vibrant, dark yellow that you would expect to find on the inside of a ripe passion fruit.

CODE	DISCRIPTION
KG0050	Passionfruit Supreme Goo

NEW 2024

PANGO SUPREME

The Pango Supreme Goo is a fantastic secret blend of citrusy fruit. Together, they create a sour and acidic taste that has noticeably attracted carp. Pango Supreme emerges as the natural evolution from its predecessor, Manganana Supreme, rekindling the essence of mango's unmatched allure. Through extensive testing, it has proven to be highly effective in getting quick bites, even when used over large beds of bait. Pango Supreme Goo unleashes a distinct punch, drawing fish in with its irresistible aroma. Pango Supreme Goo is yellow and offers the perfect hook bait glaze plus creates an alluring yellow cloud in the water. Each layer will increase leakage time, so soaking and reapplying over time is recommended. It can be used in ground bait, loose feed and on your hook baits. Mixing several Goo flavours to create customised combinations has led to big fish captures for the Monster Carp team over the years. Why not try using Isotonic Supreme with the Pango Supreme for some serious Pango-tonic punch.

CODE	DISCRIPTION
KG0052	Pango Supreme Goo

NEW 2024

MULBERRY SUPREME

Mulberry Supreme Goo is inspired by the iconic sweet and fruity carp fishing flavour profile of Mulberry, which has been used to great success for decades. This classic scent is vibrant, inviting, and instantly recognisable with its floral undertones, you could say it smells like carp fishing. The smell and flavour of Mulberry Supreme Goo is truly complex and original. Kiana has reimagined this classic ingredient, crafting a rich, luscious scent that sets it apart from the rest of the range. It offers a balance of sweetness and tanginess, which is what sets it apart from the existing range of Kiana 'berry' Goo's. It has a juicy sweetness, and subtle tartness combined with floral nuances. Mulberry Supreme Goo is a rich and satisfying purple colour that mirrors the fruit on which the flavour is based. It creates a subtle mauve hue in the water and will change your hookbait colour when it soaks in, getting more intense the more it is left to soak. Being a 'Supreme' variant, it has a thinner consistency that allows it to soak into the core of your hook baits and/or cover your loose feed perfectly.

CODE	DISCRIPTION
KG0054	Mulberry Supreme Goo

NEW 2024

TROPICAL SUPREME

Tropical Supreme is a powerful addition to your angling arsenal that embodies sharpness and tanginess, crafted with precision using a tropical mix of sweet and sour citrus flavours. The mouthwatering smell you get when opening the bottle is potent, this liquid attractant exudes an irresistible allure that travels far and wide in the water, drawing fish to your bait with its tantalising scent. We have carefully selected a blend of strong, zesty, citrus flavours combining the irresistible aroma of tropical fruits with the proven effectiveness of Kiana Carp Goo technology. Designed to provoke feeding responses, Tropical Supreme delivers a sensory experience that fish simply can't resist. The Tropical Goo Supreme is yellow and will change your hook bait colour when applied, in the same way other Goo can. This 'Supreme' variant of Goo has a thinner consistency that allows it to soak into the core of your hook baits or cover your loose feed perfectly.

CODE	DISCRIPTION
KG0053	Tropical Supreme Goo

DIGITAL SCALE 132LB/60KG

These digital scales have been designed in conjunction with top manufacturer Reuben Heaton to provide everything that an angler could need from them, as well as being able to handle the weighing of any carp that you will catch at home or abroad. They've been made to withstand the rigours of being on the bank in all conditions, thanks to being waterproof and shockproof, with stainless steel fittings. They will weigh fish up to 132lb/60kg, in 1oz/25g divisions, and are easily readable via the LCD screen, which also has a green back light for use at night. They are very easy to use and have been designed with a very generous tare facility, allowing most weigh slings to be zeroed, and once a weight has been recorded it can be stored on the internal memory, which has the capacity to hold up to 50 entries. These digital scales have also been designed to ensure a long battery life and that they are ready to go, whenever you need to use them. They fit neatly into the Compac Scales Pouch, which is sold separately.

KONTOUR FLUOROCARBON - 200m

Within seconds of hitting the water Kontour lies flush to the bottom, following the undulations of the lakebed where it remains hidden from line-shy fish. Plus, with a very similar light refractive index to water, it is virtually invisible when submerged. All this, coupled with superb abrasion resistance makes Kontour extremely user friendly and a firm favourite with many big fish anglers.

CODE	DISCRIPTION
KFC12	Kontour Fluorocarbon 12lb - 0,33mm/200m
KFLU02	Kontour Fluorocarbon 15lb - 0,35mm/200m
KFLU03	Kontour Fluorocarbon 18lb - 0,37mm/200m

KONTOUR FLUOROCARBON - 50m

Kamo Kontour is the ultimate abrasion resistant fluorocarbon leader for when fishing in snaggy situations. This Kontour is extremely tough and durable and therefore is less likely to damage when encountering the likes of weed, mussels, snags and lily pads. It has a higher density than monofilament and sinks extremely fast, pinning the line down near the rig. The two-tone kamo tint helps it to blend in with almost any lakebed, even once sediment collects on the line. Due to the thickness of this leader material, it is best used in short-range, margin fishing situations, or when

placing rigs using the aid of a boat. Although this product was developed as a heavy leader, the properties of the fluorocarbon material lends itself perfectly to creating stiff hooklinks, particularly those that require a stiff boom. To crimp this material, use a 0.7mm Large Krimp.

- Key Features:
- Extremely abrasion resistant
 - Fast sinking
 - Virtually invisible in water

CODE	DISCRIPTION
KFLU04	Kamo Kontour 30lb - 0.60mm/50m

LONG CHUCK

/ 1000m spool

The new Long Chuck main line has been designed specifically for fishing at long range and will add extra yards to your cast compared to a standard mono. It is ultra-low stretch to enable quicker compression of the rod blank, and alongside the fact that it has very low water absorption, it also helps when trying to feel the lead down at range or in a cross wind.

That low water absorption also helps ensure that the line stays light-weight and stays in the air for longer, thus helping to lower the drag on the lead during flight, but the biggest factor in achieving that is the fact that the line is clear – adding a dye to a mono line increases the weight, as well as altering the molecular structure and creating more stretch, all of which means that coloured lines won't cast as far. Long Chuck also features a high breaking strain to diameter ratio, which significantly reduces both the drag and the weight of the line, compared to an equivalent breaking strain – 10lb is 0.27mm; 12lb is 0.30mm; 15lb is 0.33mm; and 20lb is 0.40mm. It is supplied on 1.000m spools.

CODE	DISCRIPTION
KDCM01	LongChuck Clear 10lb/0.27mm 1000m
KDCM02	LongChuck Clear 12lb/0.30mm 1000m
KDCM03	LongChuck Clear 15lb/0.33mm 1000m
KDCM11	LongChuck Clear 17lb/0.35mm 1000m
KDCM04	LongChuck Clear 20lb/0.40mm 1000m

LONGCHUCK TAPERED LEADERS

/ 5 per pack

These shock leaders have been designed specifically for long range fishing to help you achieve maximum distance without the risk of a crack-off, and are perfect when used in conjunction with the Long Chuck main line.

There are three different combinations of Long Chuck Tapered Leader, which allows you to match it to the breaking strain of main line that you are using, thus ensuring the neatest joining knot possible and also reducing the risk of 'frap-ups' (this usually occurs when different diameter lines are joined and a sudden change to the way it spirals off of the reel through the butt ring).

Each leader is 10m long and features 8m of 30lb/0.47mm breaking strain line, to absorb the force of the cast as well as giving some protection when playing a fish due to its abrasion resistance – ideal when fishing over gravel bars – and then the last 2m tapers down from 0.47mm (30lb) to either 0.27mm (10lb), 0.30mm (12lb), or 0.33 mm (15lb) diameter, depending on which of the three versions you choose. The tapered leaders feature the same properties as the Long Chuck main line, with ultra-low stretch to help compress the rod (heavy mono is typically quite stretchy and hampers the cast); low water absorption; lightweight for its breaking strain, as it is clear (dye adds extra weight), so it stays in the air longer; and a high breaking strain to diameter ratio to reduce drag. Each spool contains five leaders.

CODE	DISCRIPTION
KDCM05	LongChuck Tapered Leaders 10-30lb/0.27-0.47mm
KDCM06	LongChuck Tapered Leaders 12-30lb/0.30-0.47mm
KDCM07	LongChuck Tapered Leaders 15-30lb/0.33-0.47mm

LONGCHUCK TAPERED MAINLINE

/ 300m spool

The Long Chuck Tapered Mainline has been designed for casting at range in situations where you want to fish straight through without a leader knot – especially useful in weedy venues where that can gather around the knot and present problems under the rod tip. The Long Chuck Tapered Mainline comes on a 300m spool, and at each end of that it features an 8m section of 0.47mm (30lb) diameter line designed to take the force of the cast - as well as offering good abrasion resistance when playing a carp – plus a 2m tapering section down to whichever diameter of main line you have chosen. It is exactly the same at both ends, so should you experience a cut-off, you can simply reverse the line on your spool and use it again. This tapered main line feature the same properties as the Long Chuck main line, with ultra-low stretch to help compress the rod (heavy mono is typically quite stretchy and hampers the cast); low water absorption; lightweight for its breaking strain, as it is clear (dye adds extra weight), so it stays in the air longer; and a high breaking strain to diameter ratio to reduce drag. It comes in a choice of 10-30lb (0.27-0.47mm); 12-30lb (0.30-0.47mm); and 15-30lb (0.33-0.47mm).

CODE	DISCRIPTION
KDCM08	LongChuck Tapered Mainline 10-30lb/0.27-0.47mm
KDCM09	LongChuck Tapered Mainline 12-30lb/0.30-0.47mm
KDCM10	LongChuck Tapered Mainline 15-30lb/0.33-0.47mm

LONGCHUCK TAPERED MAINLINE GREEN

/ 300m spool

The green version of the Long Chuck Tapered Mainline has been introduced into the Long Chuck family for those anglers that prefer some colour in their line over the standard clear.

Long Chuck Tapered Mainline has been designed for casting at range in situations where you want to fish straight through without a leader knot – especially useful in weedy venues where that can gather around the knot and present problems under the rod tip.

The Long Chuck Tapered Mainline comes on a 300m spool, and at each end of that it features an 8m section of 0.47mm (30lb) diameter line designed to take the force of the cast - as well as offering good abrasion resistance when playing a carp – plus a 2m tapering section down to whichever diameter of mainline you have chosen. It is exactly the same at both ends, so should you experience a cut-off, you can simply reverse the line on your spool and use it again.

This tapered mainline features the same properties as the Long Chuck mainline, with ultra-low stretch to help compress the rod (heavy mono is typically quite stretchy and hampers the cast); low water absorption; lightweight for its breaking strain and a high breaking strain to diameter ratio to reduce drag.

It comes in a choice of 10-30lb (0.27-0.47mm); 12-30lb (0.30-0.47mm); and 15-30lb (0.33-0.47mm).

CODE	DISCRIPTION

KDCM14	LongChuck Tapered Mainline Green 15-30lb/0.33-0.47mm

SUBLINE / 1000m spool

SUBline is a heavy, co-polymer line that has been designed using the very latest in materials and technology. We have manufactured not only one of the toughest monofilaments we've ever used, but one of the softest and easiest to cast. It sinks admirably well too. The 1000m spools feature line markers every 250m to let the angler know exactly how much line has been used when spooling up.

CODE	DISCRIPTION
SUB10G	10lb (4.5kg), 0.30mm, Green

SUB20B	20lb (9kg), 0.43mm, Brown

TOUCHDOWN / 1000m spool

Touchdown is a versatile all round line that suits every angling situation. Its low stretch maximises indication and casting potential, whilst retaining soft and subtle characteristics. Touchdown sinks well, cutting through the surface film, reducing the bow in the line after casting and concealing itself on the bottom. It also retains amazing knot strength, and abrasion resistance allowing fish to be landed in the most testing of conditions. Touchdown is available in the popular breaking strains of 10lb, 12lb, 15lb and 20lb, covering all angling requirements whether at home or abroad.

CODE	DISCRIPTION
KTDG10	10lb (4.5kg), 0.30mm, Green
KTDG12	12lb (5.4kg), 0.35mm, Green
KTDG15	15lb (6.8kg), 0.40mm, Green

KTDB20	20lb (9kg), 0.43mm, Brown

SUBBRAID / 450m & 1200m spools

This is a super-fast-sinking main line braid that's available in a subtle SUB-green colouring and two breaking strains. SUBbraid has no stretch, making it perfect for feeling for that all important drop.

CODE	DISCRIPTION
SBB1	15lb (6.8kg), 0.30mm, 450m
SBB2	15lb (6.8kg), 0.30mm, 1200m
SBB3	20lb (9.1kg), 0.34mm, 450m
SBB4	20lb (9.1kg), 0.34mm, 1200m

APEX BRAID / 450m & 1200m spools

A high-performance Dyneema-blended main line braid that casts extremely well. Markers every 150m on the spools help to ensure that your reels are perfectly filled.

CODE	DISCRIPTION
APEXF30	30lb (13.6kg), 0.23mm, 450m
APEXF50	50lb (22.7kg), 0.36mm, 450m
APEXB30	30lb (13.6kg), 0.23mm, 1200m
APEXB50	50lb (22.7kg), 0.36mm, 1200m

CARP LINE / 1000m spool

If you're looking for a tough, reliable line that won't cost you the earth, then Carp Line is definitely the one for you! It is amongst the toughest lines on the market and will handle weed and snags better than most lines, but if there are signs of abrasion then it's also inexpensive to re-spool. It also casts and sinks well, behaves superbly on the reel and provides a very high knot strength.

CODE	DISCRIPTION
KCM08	8lb (3.6kg), 0.28mm, Green
KCM10	10lb (4.5kg), 0.30mm, Green
KCM12	12lb (5.4kg), 0.35mm, Green
KCM15	15lb (6.8kg), 0.40mm, Green
KCM20	20lb (9kg), 0.43mm, Green

ARMA KORD / 20m spool

Widely accepted as one of the best of all the Dyneema leaders. Soft enough to be used on the Continent as a hook length or as a heavy casting leader for long-range fishing and spodding.

CODE	DISCRIPTION
ARMK30	30lb (13.6kg)
ARMK50	50lb (22.7kg)

HYBRID STIFF / 15m spool

A robust, stiff, coated braid that is excellent for use over firm spots. It has a stiff, clear coating that helps it to blend with a host of lake bed conditions. It's coating can be stripped back to form a number of bottom-bait and pop-up presentations.

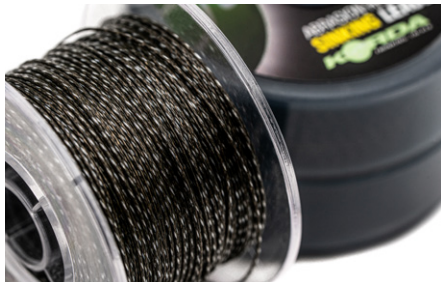

CODE	DISCRIPTION
KHY5	Hybrid Stiff Weedy green, 15m, 20lb
KHY6	Hybrid Stiff Gravel brown, 15m, 20lb

ARMA KORD SINKING / 50m spool

A dark-brown, sinking version of our popular braided Arma Kord leader material.

CODE	DISCRIPTION
ARMKS30	30lb (13.6kg) Brown
ARMKS50	50lb (22.7kg) Brown

SUPERNATURAL / 20m spool

Supernatural is a super-soft, uncoated braid. It's the ideal solid-bag hook link and is also an essential part of the popular combi-link. It is available in two breaking strains, 18lb and 25lb in both green and brown.

CODE	DISCRIPTION
KSNG	18lb (8.2kg), 20m, Weedy Green
KSNB	18lb (8.2kg), 20m, Gravel Brown
KSNG25	25lb (11.3kg), 20m, Weedy Green
KSNB25	25lb (11.3kg), 20m, Gravel Brown

N-TRAP SEMI-STIFF / 20m spool

N-Trap Semi-Stiff sits in the sweet spot between the relatively supple N-Trap Soft and Hybrid Stiff. It's stiff enough to kick a light hook bait away from the lead and reset itself if rejected by a feeding fish, yet it has a degree of flexibility, which allows it to be used over silt or light weed.

CODE	DISCRIPTION
KNT04	15lb (6.8kg), 20m, Weedy Green
KNT05	20lb (9kg), 20m, Weedy Green
KNT06	30lb (13.6kg), 20m, Weedy Green
KNT13	15lb (6.8kg), 20m, Gravel Brown
KNT14	20lb (9kg), 20m, Gravel Brown
KNT15	30lb (13.6kg), 20m, Gravel Brown
KNT22	15lb (6.8kg), 20m, Silt
KNT23	20lb (9kg), 20m, Silt
KNT24	30lb (13.6kg), 20m, Silt

N-TRAP SOFT / 20m spool

After months of testing we came up with what we believe to be the best soft coated braid on the market. It has a robust, matt coating that wont split when knotted and the inner Dyneema braid is nicely colour-matched to the coating. N-Trap Soft is available in three Safe Zone colours, Weed Green, Gravel Brown and Silt and in three breaking strains. The material is supple enough to lay over bottom contours unobtrusively yet it will still resist tangles.

CODE	DISCRIPTION
KNT01	15lb (6.8kg), 20m, Weedy Green
KNT02	20lb (9kg), 20m, Weedy Green
KNT03	30lb (13.6kg), 20m, Weedy Green
KNT10	15lb (6.8kg), 20m, Gravel Brown
KNT11	20lb (9kg), 20m, Gravel Brown

KNT20	20lb (9kg), 20m, Silt
KNT21	30lb (13.6kg), 20m, Silt

DARK MATTER TUNGSTEN COATED BRAID / 10m spool

Dark Matter coated braid incorporates tungsten granules within the coating to ensure that it sinks quickly and remains pinned to the lakebed.

CODE	DISCRIPTION
KDMCG18	Gravel Brown, 18 lb, 10 m
KDMCG25	Gravel Brown, 25 lb, 10 m
KDMCW18	Weed Green, 18 lb, 10 m
KDMCW25	Weed Green, 25 lb, 10 m

MOUTH TRAP / 20m spool

Tie perfectly curved stiff rigs quickly and easily! Mouth Trap's incredibly low memory makes tying even ultra-short rigs simple! Available in three breaking strains and in one colour, a silkweed-green tint.

CODE	DISCRIPTION
KMT15	15lb (6.8kg), 0.43mm, 20m
KMT20	20lb (9kg), 0.47mm, 20m
KMT25	25lb (11.3kg), 0.53mm, 20m

DARK MATTER BRAID / 20m spool

The fastest sinking braid that we could make. It's supple and sinks like a brick to help you make the most inconspicuous rigs imaginable. It features a banded camouflage pattern to help break up its outline.

CODE	DISCRIPTION
KDMB15	15lb (6.8kg), 20m
KDMB20	20lb (9kg), 20m
KDMB30	30lb (13.6kg), 20m

IQ² FLUOROCARBON / 20m spool

A unique, soft fluorocarbon that is close to invisible on the lake bed due to its refractive index. It can be used to construct stiff rigs, such as Danny Fairbrass' IQ D-Rig as well as a range of combi-link presentations.

CODE	DISCRIPTION
KIQS10	10lb (4.5kg), 0.32mm, 20m
KIQS12	12lb (5.4kg), 0.35mm, 20m
KIQS15	15lb (6.8kg), 0.40mm, 20m
KIQS20	20lb (9kg), 0.47mm, 20m

KAMO / 20m spool

A super-tough, camouflaged coated hook link. Kamo is also available in higher breaking strains that are essential when targeting the biggest carp in the world, in the most demanding situations (see the 'Euro Zone' section for these).

CODE	DISCRIPTION
KKB15	15lb (6.8kg), 20m
KKB20	20lb (9kg), 20m
KKB30	30lb (13.6kg), 20m

IQ FLUOROCARBON / 20m spool

IQ is a fluorocarbon which refracts light in almost the same way as water, making it almost invisible when immersed. It is stiffer than normal nylon so improving anti-tangle and anti-eject properties.

CODE	DISCRIPTION
KIQ10	10lb (4.5kg), 20m
KIQ15	15lb (6.8kg), 20m
KIQ20	20lb (9kg), 20m
KIQ25	25lb (11.3kg), 20m

SUBLINE TAPERED MAIN LINE / 300m spool

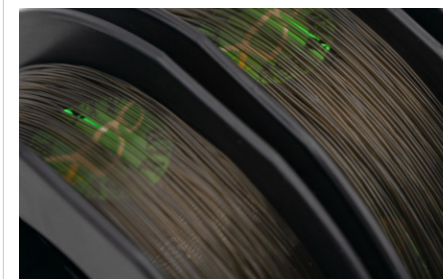

We've taken our proven SUBline and tapered it from a thinner, casting diameter, right up to a thick shock-leader diameter, removing the need for leader knots. If the tapered section gets cut off, then all you need to do is to simply reverse the line onto another spool to expose the second tapered section. Tapered SUBline is available in three versions, which are supplied on 300m spools. These versions are 8lb to 40lb, 10lb to 40lb and 12lb to 40lb. Tapered SUBline is available in Sub Brown colour only.

CODE	DISCRIPTION
KTM28	8lb - 40lb (3.6kg - 18.1kg) 0.28 - 0.50mm, Brown
KTM30	10lb - 40lb (4.5kg - 18.1kg) 0.30 - 0.50mm, Brown
KTM33	12lb - 40lb (5.4kg - 18.1kg) 0.33 - 0.50mm, Brown

BOOM / 15m spool

Our first fluorocarbon that can be crimped, which opens up a world of uses for rig tying. Its prime function is for creating stiff boom sections to help kick the hook bait away from the lead system, something Boom does each and every cast. You can use it to make combi-rigs, or out-and-out stiff rigs, for pop-ups and bottom baits alike. Being a fluorocarbon, Boom blends with all lake bed types and, thanks to its subtle, green tint, it's always inconspicuous to carp feeding around it. Boom is available in 0.45, 0.50, 0.55mm and 0.65mm, on 15m spools.

CODE	DISCRIPTION
KBOOM45	15lb, (6.8kg), 0.45mm NEW 2022
KBOOM50	20lb (9kg), 0.50mm NEW 2022
KBOOM55	25lb (11.3kg), 0.55mm
KBOOM65	35lb (15.9kg), 0.65mm

SUBLINE TAPERED LEADERS / 5 x 12m

If your customers prefer a more traditional leader then we now have the answer, in the shape of these SUBline leaders. They're smooth, supple and taper from a low diameter that's perfect for knotting to line of similar diameter, right up to the thick shockleader end that'll take the brunt of the biggest casts. There are three versions available: 8lb to 40lb, 10lb to 40lb and 12lb to 40lb. Each spool holds five, 12-metre leaders that can be cut down to suit the individual's needs. Tapered SUBline leaders are available in Sub Brown colour only.

CODE	DISCRIPTION
KTL28	8lb - 40lb (3.6kg - 18.1kg) 0.28 - 0.50mm, Brown
KTL30	10lb - 40lb (4.5kg - 18.1kg) 0.30 - 0.50mm, Brown
KTL33	12lb - 40lb (5.4kg - 18.1kg) 0.33 - 0.50mm, Brown

KRIMP TOOL

The Krimp tool makes the the creation of super-short, consistent chod rigs and perfect hinged stiff rigs extremely simple. Each tool comes with a box of small Krimps and a box of large Krimps. Spare Krimps are available.

CODE	DISCRIPTION
KKT	Krimp Tool

KRIMP TOOL SMALL

Crimping is a great way to achieve neat, strong connections, especially when you are using stiffer and/or thicker materials which can be hard to knot effectively – plus it allows you to get the hook link length right every time, which is especially useful for chod rigs. Getting it just right though when you do crimp something, so that it won't slip or weaken the material, is always a concern, but this Mini Krimp Tool alleviates that issue as it is purposely designed for use with the three sizes of Krimp that we sell – the jaws are marked with XS, S and L to denote the slot that should be

CODE	DISCRIPTION
KTS	Krimping Tool Small

used for each size. As long as the Krimps are matched to an appropriate diameter of hook link material, the Mini Krimp Tool will allow you to create the perfect connection every time. It is made from mild steel with rubberised handles to allow you to get a good grip and ensure the right amount of pressure is applied to a Krimp, plus it features a line cutter in its jaws which is useful when constructing rigs. The Mini Krimp Tool is very compact so will easily fit into your Tackle Box or similar, but still allows you to get enough leverage to form the perfect crimped connection every time.

SPARE KRIMPS

Small 0.6mm version is perfect for use with materials like Mouth Trap, the 25lb version of Boom, or even stiff coated braids such as Hyrbid. The Large 0.7mm Krimp is for really thick materials, such as 35lb Boom or very heavy mono. The newest addition to the range, the X-Small 0.5mm version, is perfect for using with 15lb & 20lb Boom, or any other hook link material which is suitable for crimping (must have very low, or no stretch) and has a diameter between 0.40mm and 0.50mm. They come supplied in a neat little box with a sliding lid, which helps prevent spillages, with 50 Krimps in each pack.

CODE	DISCRIPTION
KSK05	Spare Krimps X-Small 0,5 mm
KSK06	Spare Krimps Small 0.6mm
KSK07	Spare Krimps Large 0.7mm

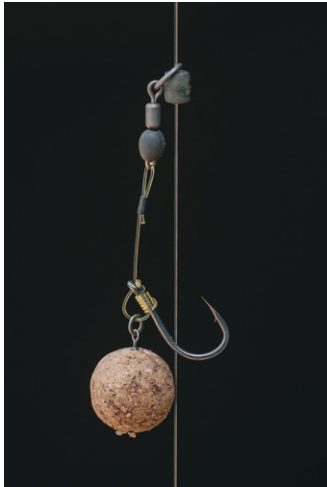

CHOD KRIMPS

The ability to quick change (QC) any rig is a massive time saver and we've been doing it with standard rigs for years. However, due the short length of stiff material used to construct a Chod Rig, until the krimps came along it was always a very fiddly and frustrating knot to tie; particularly on very short chods. Krimping our Mouth Trap Chod Filament has become an increasingly popular way to create a QC Chod by utilising our standard 0.6mm krimps normally associated with our popular Boom material when creating Spinner Rigs. The size of these standard krimps was not ideal but served a purpose until now. The Korda Product Development Team have now created a krimp specifically for constructing neat and tidy Chod Rigs with ease. The new krimps are 40% smaller than the standard version and can be used with 15lb, 20lb and 25lb versions of our Mouth Trap Chod Filament which creates a QC loop stronger than any knot; this is particularly vital with such a short hooklink, where the pressure at the knot is at its greatest.

CODE	DISCRIPTION
KSK05C	Spare Chod krimps 0,5mm
KSK06C	Spare Chod krimps 0,6mm

These tiny krimps can be used with the current Krimp Tools in the range and come in two sizes – 0.5mm and 0.6mm Crimping is a great way to achieve neat, strong connections, especially when you are using stiffer and/or thicker materials which can be hard to knot effectively – plus it allows you to get the hook link length right every time, which is especially useful for Chod Rigs. You need to ensure that you use the correct size of krimp for your Mouth Trap – if the krimp is too big it can slip. We advise that the XS 0.5mm is used with 15lb and 20lb Mouth Trap, with the Small 0.6mm version used with the heavier 25lb filament. They come supplied in a neat little box with a sliding lid, which helps prevent spillages, with 50 Krimps in each pack.

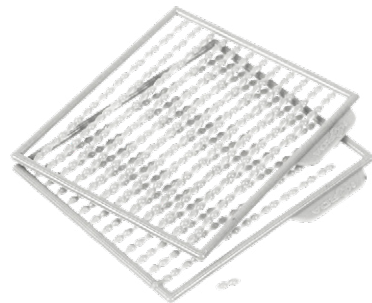

RAZOR BLADES

These ultra-sharp, stainless steel blades now feature a serated edge and slice easily through even the toughest braided fishing lines. Bright green handles mean they are easily found if dropped.

CODE	DISCRIPTION
KRZB	Green

HYBRID HAIR STOP

Simple-yet-effective hair stops.

CODE	DISCRIPTION
KHBS	Clear

PULLA TOOL

A vital, unsung hero of a product that's a tackle-box essential. It has a T-bar handle and stainless hook to help ease knots down tight, straighten hook links or safely steam shrink tubing over a kettle.

CODE	DISCRIPTION
KPUL	Black & Green

EXTENDA STOPS

The Extenda Stops allow you to increase the length of your hair without the hassle of tying up a new rig. These tough, plastic stops come in three different sizes, which cater for a range of bait types and hair lengths.

CODE	DISCRIPTION
KEXSS	Clear, Small
KEXSM	Clear, Medium
KEXSL	Clear, Large

UNWAXED BAIT FLOSS / 30m Spool

This unwaxed Bait Floss is ideal when tying hard baits lasso style to a Micro Ring Swivel or Rig Ring. The unwaxed coating enables the knot to be tightened down fully, making it less likely to slip when making multiple casts or using heavy leads. When threading and blobbing baits, this non-slip, unwaxed version helps prevent baits flying off on the cast, a particularly useful benefit when multiple casts at range might be required. The square spool is designed to fit neatly into the Korda Tackle Box and is fitted with an ID tab for easy identification when stored. Each spool contains 30 metres of bait floss.

BAIT FLOSS / 30m Spool

This flat, waxed bait floss has been developed to securely grip pop-ups when tying them to a rig ring. Run a cigarette lighter flame around the floss once the bait is tied on and it becomes transparent.

CODE	DISCRIPTION
KBF	Bait Floss
KBFU	Unwaxed Bait Floss

HEAVY LATCH NEEDLE / 7cm

Perfect for use with boilies and larger particles such as tiger nuts or brazils.

CODE	DISCRIPTION
KBNH	Green

HEAVY LATCH STIK NEEDLE / 12cm

The Heavy Latch Stik Needle, finished with a red handle, is ideal for pulling hooklinks through long PVA sticks or constructing stringers.

CODE	DISCRIPTION
KBNS	Red

SPLICING NEEDLE / 7cm

Splicing leadcore is easy with this fine needle.

CODE	DISCRIPTION
KSPN	Orange

FINE LATCH NEEDLE / 7cm

Ideal for use with soft boilies, soft pellets or sweetcorn.

CODE	DISCRIPTION
KBNF	Purple

BRAIDED HAIR NEEDLE / 7cm

If you have problems with your hair fibres getting caught in the needle, then this is the one to use. It has no rough edges for fibres to get caught on.

CODE	DISCRIPTION
KBNB	Yellow

SUPER-FINE NEEDLE / 7cm

For use with small boilies, nuts and sweetcorn.

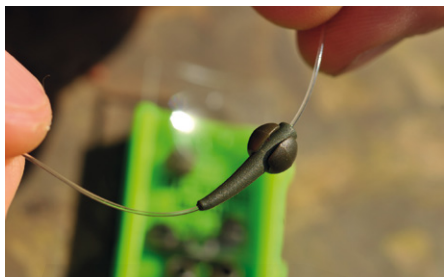

CODE	DISCRIPTION
KBNBF	Blue

CHOD-IT STIFF RIG TOOL

This versatile tool has been designed to make tying effective chod and hinged stiff rigs easier. It is made from machined aluminium and has a hard, anodized coating. Key features include a mushroom cap for tensioning, a recess for shaping loops and a tapered point for shaping D-rigs.

CODE	DISCRIPTION
KCIT	Chod-It Stiff Rig Tool

NAKED CHOD SAFETY SYSTEM

This system makes the naked chod even safer. The system includes three tungsten Chod Sleeves and three Barrel Beads, as well as 12 No-Trace Beads. The tungsten-impregnated parts will help ensure that your chod is fished on the bottom, where you want it.

CODE	DISCRIPTION
KNCS	Naked Chod Safety System

LEADCORE CHOD SAFETY SYSTEM

This system has been designed to make fishing the helicopter rig on leadcore completely safe. The kit includes 10 Barrel Beads, 10 Chod Sleeves and 15 No-Trace Beads.

CODE	DISCRIPTION
KCSL	Leadcore Chod Safety System

NO-TRACE BEADS / 25 per pack

Spare beads that work with both the Naked Chod Safety System and the Leadcore Chod Safety System. Supplied in packs containing 25 beads.

CODE	DISCRIPTION
KSCB	No-Trace Beads

LINE SAVER BEAD / 8 per pack

A clever little tungsten bead that has a tapered section which, when used with the naked chod, allows the swivel to run up and onto it during the fight, saving the line from wear and tear.

CODE	DISCRIPTION
KLSE	Line Saver Bead

DARK MATTER SINKERS

Large 9 per pack / Small & Medium 12 per pack

Another industry first from Korda. A Sinkers is an elongated, tungsten bead that grips hook link materials and main line. They are designed to help pin the rig to the lake bed and are available in Weed Green and Gravel Brown.

CODE	DISCRIPTION
KSKSG	Small Green
KSKMG	Medium Green
KSKLG	Large Green
KSKSB	Small Brown
KSKMB	Medium Brown
KSKLB	Large Brown

STRIPPA TOOL

/ 1 per pack

A rig tool designed to make removing the outer coating on braided hook link materials such as Hybrid Stiff very easy. It is manufactured from aluminium with a hard, anodised finish.

CODE	DISCRIPTION
KSTP	Strippa Tool

GRAVEL
50cm/30lb

DARK MATTER LEADER HELI SAFE (1m - 50cm)

These Dark Matters leaders incorporate our Heli-Safe System and can be fished with any helicopter style set-up, whether that be a conventional hook link or a chod rig. This leader has tungsten collars impregnated into it, to ensure it stays pinned to the bottom. It also incorporates the Chod Safe System which ensures that your hook link can come free of the leader in the event of your main line breaking, and your hook link can be easily attached via a QC Ring Swivel.

CODE	DISCRIPTION
KSZ74	Dark Matter Leader Heli Safe Weed 40lb 50cm
KSZ75	Dark Matter Leader Heli Safe Gravel 40lb 50cm
KSZ76	Dark Matter Leader Heli Safe Clear 40lb 50cm
KSZ80	Dark Matter Leader Heli Safe Weed 40lb 1m
KSZ81	Dark Matter Leader Heli Safe Gravel 40lb 1m
KSZ82	Dark Matter Leader Heli Safe Clear 40lb 1m

The DM Heli-Safe Leader comes in a choice of 1m or 50cm lengths, which gives you enough space to move the top bead well up it, such as when fishing it in deeper silt or weed, so as to ensure your presentation is good when using the longer version. Some venues now have rules restricting the maximum length of your leader, and that is where the 50cm version could come into play – it is also great when fishing at long range as it will cast further.

The other end of this leader has a fused loop, which your main line can either be tied to, or to allow the leader to easily be taken off, the loop-to-loop method is best. The Dark Matter leader material is very abrasion resistant, has a breaking strain of 40lb, and can be matched to whatever type of lake bed you are fishing over, as it comes in a choice of Clear, Weed, or Gravel. Each pack contains one leader.

DARK MATTER RING SWIVEL LEADER

Fused plastic leaders that have been tinted to precisely match the lake bed. They feature two tungsten bands along their length, which help to pin your tackle to the lake bed in the area of your rig. This version ends in a ring swivel, making it perfect for lead clip and inline lead arrangements.

CODE	DISCRIPTION
KSZ30	Weed, 100cm, 30lb
KSZ31	Gravel, 100cm, 30lb
KSZ32	Clay, 100cm, 30lb
KSZ33	Silt, 100cm, 30lb
KSZ34	Clear, 100cm, 30lb
KSZ68	Weed, 50 cm, 40lb
KSZ69	Gravel 50 cm, 40lb
KSZ70	Clear, 50 cm, 40lb

DARK MATTER HYBRID LEAD CLIP LEADER

Fused plastic leaders that have been tinted to precisely match the lake bed. They feature two tungsten bands along their length, which help to pin your tackle to the lake bed in the area of your rig. This version ends in a Hybrid Lead Clip.

CODE	DISCRIPTION
KSZ35	Weed
KSZ36	Gravel
KSZ37	Clay
KSZ38	Silt
KSZ39	Clear

DARK MATTER HELI LEADER

Fused plastic leaders that have been tinted to precisely match the lake bed. They feature two tungsten bands along their length, which help to pin your tackle to the lake bed in the area of your rig. This version is for use with helicopter or chod rigs and incorporates the no-trace chod safety system.

CODE	DISCRIPTION
KSZ45	Weed
KSZ46	Gravel
KSZ47	Clay
KSZ48	Silt
KSZ49	Clear

DARK MATTER LEADER QC SWIVEL

Fused plastic leaders that have been tinted to precisely match the lake bed. They feature two tungsten bands along their length, which help to pin your tackle to the lake bed in the area of your rig. This version is for use with helicopter or chod rigs and incorporates the no-trace chod safety system.

CODE	DISCRIPTION
KSZ71	Weed, 50 cm, 40lb
KSZ72	Gravel, 50 cm, 40 lb
KSZ73	Clear, 50 cm, 40 lb

DARK MATTER TUNGSTEN RIG PUTTY

Dark Matter Rig Putty is the densest putty available. This is achieved through the use of high levels of super-heavy tungsten granules. It remains stable over a whole range of temperatures and is extremely easy to shape and mould. It can be used to counterbalance pop-ups or pin down other rig components and is available in two colours, weed and gravel.

CODE	DISCRIPTION
KDMPW	Weed
KDMPG	Gravel

KABLE LEADCORE / 7m & 25m Spool

Korda realised that to truly camouflage a leadcore leader, breaking up its outline was the way forward. So, the development team designed a banded pattern of subtle colour changes to do just that. Although it has a spliced breaking strain in excess of 50lb, Kable is limp enough to drape across underwater terrain.

CODE	DISCRIPTION
KA7GB	Gravel, 7m

KABLE TIGHT WEAVE / 7m & 25m Spool

Kable has been designed to be the toughest leadcore available while exhibiting unbeatable camouflage properties, with a spliced breaking strain well in excess of 50lbs, it won't let you down in demanding situations. Kable is extremely limp and supple ensuring it drapes subtly across the underwater terrain. This keeps your line concealed in the immediate area around your rig while adding amazing toughness and durability to the end tackle.

CODE	DISCRIPTION
KAB001	Kable Tight Weave 7m Weed
KAB002	Kable Tight Weave 7m Gravel
KAB003	Kable Tight Weave 7m Kamo
KAB004	Kable Tight Weave 25m Weed
KAB005	Kable Tight Weave 25m Gravel
KAB006	Kable Tight Weave 25m Kamo

DARK MATTER LEADER QC HYBRID CLIP

We have now added a Hybrid Lead Clip QC version to our popular range of Dark Matter fused leaders, to allow you to quickly change your hook link in as hassle-free a way as possible, whenever you choose to. These leaders have integral sections of tungsten to ensure that they stay pinned to the lakebed and help to avoid spooking wary carp, and come in a choice of 1m or 50cm lengths – to cater for those who require a shorter version, such as when fishing at long range, or where fishery rules dictate a maximum length. At one they feature a Hybrid Lead Clip QC fused onto the leader and complete with a Hybrid Tail Rubber, and at the other end there is a fused loop for easy attachment to your main line – loop-to-loop style works great and makes it easy to change leader when you wish to, without having to cut or tie anything. The Dark Matter leader material is very abrasion resistant, has a breaking strain of 40lb, and can be matched to whatever type of lake bed you are fishing over, as it comes in a choice of Clear, Weed, or Gravel, Clay. Each pack contains one leader.

CODE	DISCRIPTION
KSZ89	Dark Matter Leader QC Hybrid Clip Weed
KSZ90	Dark Matter Leader QC Hybrid Clip Gravel
KSZ91	Dark Matter Leader QC Hybrid Clip Clear

DARK MATTER LEADER 50 CM QC HYBRID CLIP

CODE	DISCRIPTION

KSZ93	Dark Matter Leader 50 cm QC Hybrid Clip Gravel
KSZ94	Dark Matter Leader 50 cm QC Hybrid Clip Clear

HELI LEADCORE LEADERS / 3 x 1m

Perfectly spliced, 1m Kable leadcore leaders in Gravel Brown and Weed/Silt. This version features the Leadcore Safety System, making it the ideal leader for fishing helicopter style.

CODE	DISCRIPTION
LLHW	Weed, 1m
LLHG	Gravel, 1m

RING SWIVEL LEADCORE LEADERS / 3 x 1m

Perfectly spliced, 1m Kable leadcore leaders in Gravel Brown and Weed/Silt. Terminating in a ring swivel, this version is perfect for use with inline leads.

CODE	DISCRIPTION
LLRSW	Weed, 1m
LLRSG	Gravel, 1m

SOLIDZ PVA LEADERS / 3 x 1m

As the name suggests, these leaders are designed specifically for use with Solidz PVA bags. They are constructed from 1ft of 50lb Kable leadcore, to ensure that everything stays pinned to the bottom, with a Size 8 Ring Swivel spliced at one end (if you prefer you can cut the ring off and just use it as a normal swivel) – which ensures they work perfectly with an inline lead and the swivel properly locates into the nose of it. They come complete with a tail rubber to fit onto the inline lead, and at the other end there is a spliced loop,

HYBRID LEAD CLIP LEADCORE LEADERS / 3 x 1m

Perfectly spliced, 1m Kable leadcore leaders in Gravel Brown and Weed/Silt. Featuring the ever reliable Hybrid Lead Clip, this leader is a great all-rounder.

CODE	DISCRIPTION
LLHCW	Weed, 1m
LLHCG	Gravel, 1m

with the loop-to-loop method being the best way of attaching them – this means that you can have these leaders ready to go with a PVA bag already tied, and simply loop off one leader and put the fresh one on, and be ready to cast back out in a matter of seconds. Each pack contains three leaders.

CODE	DISCRIPTION
KPVALL	Solidz PVA Leaders

LEADCORE LEADER HYBRID LEAD CLIP QC / 3 x 1m

These ready tied leaders ensure the lead will safely eject if required and are ideal for weedy and snaggy venues. It features a Quick Change Swivel for easy and fast attachment of your rig.

CODE	DISCRIPTION
LLHQW	Weed/Silt, 1m
LLHQG	Gravel Brown, 1m

LEADCORE LEADER HELI-SAFE IM / 3 x 1m

The Heli-Safe system is brilliant for use with any helicopter style set-up, whether you are using a conventional rig or a chod, and is now available constructed on Kable leadcore and ready to use straight out of the packet.

Heli-Safe Leadcore Leaders are available in a choice of Gravel Brown or Weed/Silt, with two per pack, and also come with: 2 x spare No-Trace Beads; 2 x Mini Heli-Safe collars; 2 x Mini Heli-Safe red springs.

CODE	DISCRIPTION
LLHSG	Gravel, 1m
LLHSW	Weed, 1m

NEW 2023

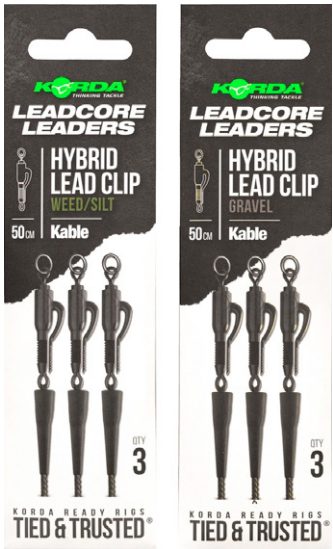

KABLE LEADCORE LEADER
HELI SAFE 50CM / 3 x 0,5m

The Heli-Safe system is brilliant for use with any helicopter style set-up, whether you are using a conventional rig or a chod and is now available on a pre-tied leader. These 50cm leaders are constructed from the new Tight Weave Kable Leadcore and ready to use straight out of the packet.

The 50cm versions are not only perfect for pinning everything to the lakebed and protecting fish from line damage during the fight but are absolutely perfect for casting long-range. This style of leader has excellent anti-tangle properties but are also very safe for the fish as it incorporates the Mini Heli-Safe System – a more compact version of the original - and ensures that the lead will come off whenever it needs to. It also incorporates our No-Trace Safety System.

CODE	DISCRIPTION

KLL006	Kable Leadcore Leader Heli Safe Gravel 50cm

NEW 2024

KABLE LEADCORE LEADER
HYBRID LEAD CLIP QC SWIVEL 50CM

It would be almost impossible to make our ready tied leadcore leaders any more user-friendly, but we've managed it by creating a quick change (QC) version. These QC ready-tied leadcore leaders are as good as anything that you can construct yourself and save you the time, effort and any element of doubt that you've done it correctly.

Each leader is constructed using the new Tight Weave Kable Leadcore and ready to use straight out of the packet. A QC Hybrid Lead Clip is spliced to one end and a spliced loop formed at the other so that it can quickly be attached and detached from your main line as required.

Simply attach the leader to your main line, use the QC attachment for your hook link, put a lead on and you're ready to cast out!

KAMO / 20m spool

A super-tough, camouflaged coated hook link in the breaking strains that are essential when targeting the biggest carp in the world, in the most demanding situations. Kamo is also available in lower breaking strains (see the 'Lines and Hooklinks' section for details).

CODE	DISCRIPTION
KKB50	50lb (22.7kg), 20m
KKB65	65lb (29.4kg), 20m
KKB80	80lb (36.3kg), 20m

DURA KORD / 20m & 15m spool

Heavy-duty, spliceable leader material with a dark, weedy green camo colour. It is made from a Dyneema/ polyester blend that absorbs water and sinks well. Its makeup means that it's soft enough to lie well over bottom contours and it has an increased diameter to prevent it from cutting into subsurface snags and act as an effective rubbing leader.

CODE	DISCRIPTION
DURA45	Green, 45lb (6.8kg), 20m
DURA65	Green, 65lb (6.8kg), 15m

KABLE XT EXTREME LEADCORE

A stepped-up version of our popular Kable leadcore that's been designed for use in the snaggiest of environments. The outer sheath has been blended with Dyneema to make it supple, yet incredibly strong and abrasion resistant and the thick 0.8mm wire makes it sink like a brick. When spliced, it breaks at an eye-waterring 90lb. Kable XT is supplied on 15m spools.

CODE	DISCRIPTION
KABXTG	Weedy Green, 70lb (31kg), 15m
KABXTB	Gravel Brown, 70lb (31kg), 15m

ARMA KORD XT / 20m spool

An increased-diameter, ultra-high performance leader material. Available in a dark camou green to blend well with a range of lake bed types.

CODE	DISCRIPTION
ARMK85	Green, 85lb (38kg)

XT SNAG LEADER / 100m spool

A super-tough, heavy monofilament snag leader, available in a subtle dark brown colour. Supplied on 100m spools.

CODE	DISCRIPTION
SNAG50	Brown, 50lb (22.7kg), 0.55mm, 100m
SNAG60	Brown, 60lb (27kg), 0.65mm, 100m

SLR Balsa Marker Float

The SLR Marker Float is made of the highest quality balsa wood to ensure that it pops up even at extreme ranges. Its thin diameter and uniquely shaped flight makes it very stable in flight. The plastic base cap increases durability when coming into contact with gravel bars and weed beds.

CODE	DISCRIPTION
KMFBL	SLR Marker Float

SLR Balsa Marker Float Small

Made from high quality balsa wood, this shorter version of the SLR Marker Float is perfect for ranges up to 100 yards. It's thin diameter and uniquely shaped flight makes it very stable when casting in windy conditions. The plastic base cap increases durability when coming into contact with gravel or weed beds.

CODE	DISCRIPTION
KMFBS	SLR Balsa Marker Float Small

Marker Kit

A dedicated Marker Kit containing all the components required to assemble an advanced marker float set up which is suitable for tangle free, long range plumbing.

CODE	DISCRIPTION
KKIT5	Marker Kit

Marker Stem

Perfect for fishing in weedy conditions when popping up a marker float would otherwise be a struggle. The ceramic ring allows the mainline to run through with very little resistance, whilst the bearing swivel ensures that the mainline doesn't twist on the retrieve.

CODE	DISCRIPTION
KMS2	Marker Stem

Marker Elastic / 6m

The great carp-fishing public asked, and we listened. They wanted a marker elastic from us, and this Kor-da-green version grips the line well and is easily visible in low-light conditions. Once finished with, it can be nipped off the line without fuss.

CODE	DISCRIPTION
KME	Korda Green

PROBE MARKER LEADS - Blistered

The unique shape of these marker leads will transmit more feeling from the lakebed to the rod tip, enabling you to accurately map out your swim and identify likely feeding spots.

CODE	DISCRIPTION
ML3	Blistered 3oz / 4oz

Marker Probe Lead

Korda Probe Marker Leads are available in either 2 & 3 oz or 3 & 4 oz. These marker leads with probes on the sides allowing you to feel the Lake bed with more accuracy. They are packaged in blister packs of two leads, a 2oz with a 3oz and a 3oz with a 4oz. These leads will remain uncoated as bare lead is far more effective at transmitting the contours of the lake bed more than a standard lead. Identify weed, silt, clay, gravel; you name it you can fish on it, or avoid it!

CODE	DISCRIPTION
ML1	2oz & 3oz Lead (pack of two)
ML2	3oz & 4oz Lead (pack of two)

DISTANCE STICKS

Sticks used for measuring the distance to your spots and allowing you to clip up at the correct range are a very simple thing, but also have the potential to cause you a lot of problems if they're not perfect for the job, which is why our Distance Sticks carry quite a high price tag. The sticks are constructed to last forever as they are machined by JAG from high grade aluminium, which makes them both strong and light. The end which goes into the ground features a hard-ground auger point with 43 cutting teeth, and a T-bar (supplied) allows you to easily screw them into almost any surface, and ensure that they are vertical

and won't fall over or bend inwards during the wrapping process. The high visibility, translucent green, plastic top even features a spirit level bubble to allow you to get them perfectly straight, and also has a slot for a Mini Stow Lite isotope, which will make the whole of the top glow at night to make it easier to see when wrapping up your rods, and also to avoid tripping over the Distance Sticks in the dark! Birds nests can be a big issue when things go wrong when wrapping up your rods, but the Distance Sticks have special grooves machined into them which prevent more than one wrap of line coming off at a time, and stop tangles occurring.

CODE	DISCRIPTION
KDS	Distance Sticks

NEOPRENE FINGER STALLS

These fitted neoprene finger stalls provide grip and protection when going for the big chuck, especially vital when using braided leaders.

CODE	DISCRIPTION
KFSS	Small
KFSL	Large
KFSXL	X-large

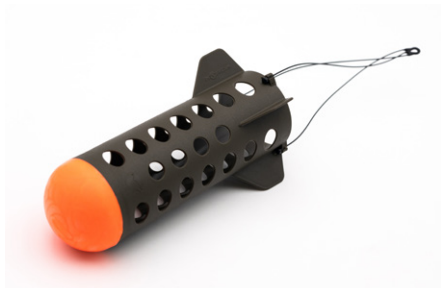

NEW 2023

NEW FINGER STALL

This Finger Stall has been constructed using a combination of high-grade microfibre leatherette and breathable polyester mesh. The protective finger pad provides the ultimate casting protection, whether using heaviest of mono or the finest of braids. The breathable mesh body is extremely light and coupled with an elasticated Velcro fastener ensures a secure fit around the wrist and back of the hand. Comes in small and large versions to enable the perfect fit.

CODE	DISCRIPTION
KDA008	Finger Stall Small
KDA009	Finger Stall Large

SKYLINER

This aerodynamic spod is fantastic for introducing decent amounts of bait with precision. It's ideal for distances up to about 100 yards or so.

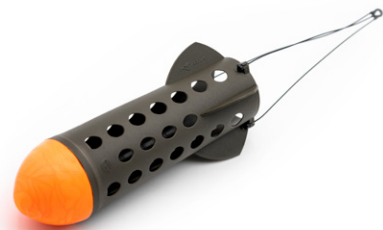

CODE	DISCRIPTION
KSP1	SLR Marker Float

SKYLINER MINI

This aerodynamic spod is fantastic for introducing decent amounts of bait with precision. It's ideal for distances up to about 100 yards or so.

CODE	DISCRIPTION
KSP3	Skyliner Mini

SKYRAIDER

The ultimate spod for distance casting. The spod is nose-heavy, with stabilising flights that give you maximum pull through the air.

CODE	DISCRIPTION
KSP5	SkyRaider

SKYWINDER

A modified version of the now legendary Skyraider. Designed to be used as a boilie rocket, or to deliver maggots at range with reduced spillage.

CODE	DISCRIPTION
KSP7	SkyWinder

SKYRAIDER & DROP ZONE MARKER FLOAT PACK

A spod and marker float in one handy kit.

CODE	DISCRIPTION
KKIT1	SkyRaider & Drop Zone Marker Float

EAZI STIK

One of the first commercially available J-shaped throwing sticks, now available in two sizes for 20 and 25mm.

CODE	DISCRIPTION
TS20	Boilies up to 20mm
TS25	Boilies up to 25mm

SLR BRAID

Korda SLR/Marker braid is an ultra-fine, specialist single strand PE main line which will help you achieve extreme distances. Note that this product should only be used in situations where maximum casting range is required. Always feather the braid before hitting the line clip. Please use Korda Spod or Marker braid for general use.

CODE	DISCRIPTION
KSLRB	SLR Braid

SPOD BRAID - 300m spool

Thanks to its low diameter, this braid casts superbly well. You'll also notice that it has a rather unusual fluoro green colour, which helps to deter seagulls when baiting up with a throwing stick or floater fishing. It is hard-wearing and has high knot strength and with 300m on each spool you should be able to spool up more than once with backing. We recommend Arma Kord is used as a shock leader with Spod Braid.

CODE	DISCRIPTION
KSPB	Fluoro Green, 20lb (9.1kg), 0.16mm, 300m

MARKER BRAID - 300m spool

This braid casts superbly well, thanks to its low diameter, and transmits the feel of the lake bed accurately back to your rod tip, allowing you to find the very best feeding areas with your marker float setup. Finished in dark green it is hard-wearing and has high knot strength, plus with 300m on each spool you should be able to spool up more than once with backing. We recommend Arma Kord is used as a shock leader with Marker Braid.

CODE	DISCRIPTION
KMAB	Dark Green, 20lb (9.1kg), 0.16mm, 300m

SPARE MARKER FLIGHTS BLACK

Spare flights are also available, with two per pack and a choice of black or orange, to cover any light condition.

CODE	DISCRIPTION
KSMFB	Black

INFUZA

Most anglers appreciate that the inspiration to develop a new product comes from being faced with a recurring problem, and here at Korda Developments we've recently seen an increase in the need for a no-fuss hook bait storage facility, which is why we decided to develop this little gem, the Infuza. Boosted hook baits have been a popular technique in carp fishing for many years; the use of oils, flavour additives and bait soaks have seen a resurgence in the last couple of years and the use of such products in our own fishing really did highlight the need for a product that satisfied our requirements.

We needed to design something robust and easy to use, which allowed excess liquid to drain from the surface of the hook baits, ensuring an even coating. The internal tray allows the baits to sit above the plug, but be coated with a simple shake of the pot. Lastly, we wanted to design a quality piece of tackle. We think that the Infuza does everything that an angler requires from this type of product.

KUTTER

The Kutter allows smashes out loads of perfectly chopped boilies in double-quick time. There are three Kutters in the range that suit 16mm, 20mm and 25mm baits. To use them, simply depress the button, remove the plunger and drop in a few baits. Then use the plunger to force the baits down the Kutter, whereupon the inner blade slices them perfectly – and it's practically effort-free! The resulting halved baits are superb in spod mixes and won't roll off the spot at all, due to their shape – which is a bonus when targeting sloping gravel humps, marginal slopes or moving water.

CODE	DISCRIPTION
KUT16	14mm - 16mm Baits
KUT20	18mm - 20mm Baits
KUT25	22mm - 25mm Baits

KRUSHA

The principle behind the Krusha was simple. We wanted to devise something that could crush up literally any bait out there within seconds; whether that be tiger nuts, pellets or air-dried boilies. Created as an ultra-strong and robust device the Krusha uses its sharp teeth to demolish anything that you put before it. Finished in a carpy, olive green colour and available in both large and small, the Krusha is perfect for the day-to-day carp angler. To use, simply fill the Krusha on the section that states 'FILL', place the other section over the top and begin to twist. The more vigorously you twist, the smaller the items will be. Grinding pellets to a mere dust creates a mighty fine bag mix and if you're a fan of solid bags, look no further. The boilie crumb will also be a fantastic addition to a stick mix or spod concoction. Experiment with literally anything and you could create the ultimate mix!

DISTANCE CASTING HELI

As the name suggests, this lead is designed for casting long distances. The nose-heavy design makes it very stable indeed and also gives good hooking efficiency. The nose-heavy shape of this lead means that it flies straight as an arrow; it just goes where you want it to go. Instead of a swivel, the Heli version features a ring, which makes it ideal for use with the Heli-Safe system and gives a much neater set-up, which will cast even better.

TOURNAMENT CASTING HELI

A similar shape to the original Distance Casting lead, but is slightly more nose-heavy to ensure that it flies further and is even more stable, especially in any cross wind, and means that you can get away with using a lighter lead than you otherwise might have been able to, and still achieve the same distance. Instead of a swivel, the Heli version features a ring, which makes it ideal for use with the Heli-Safe system and gives a much neater set-up, which will cast even better. Its streamlined shape also reduces the chances of tangles.

KIB15	1.5oz

COG SYSTEM

3 Lead Clips, 3 Tail Rubbers & 3 Booms per pack

COG stands for Centre of Gravity. This lead system is so called because the rig is attached to the lead in the exact centre of gravity, ensuring that a fish picking the bait up hits the full weight of the lead immediately. Best used over firm lake beds, there are two lead shapes available for use with the system, the Flat Pear and Flat Distance.

One point worth noting is that the COG boom sections are numbered (on the barrel of the swivel) because it's essential that they are used with the correct lead. If you use the wrong boom with the wrong lead, the setup simply won't work as intended.

CODE	DISCRIPTION
KCOG1	For 2 - 2.5oz leads

BAIT-UP METHOD FEEDER

The Method is something which is often overlooked when it comes to targeting larger carp, but it can be an extremely effective way of targeting fish of all sizes – and not just carp, as it works for specimen bream, tench, chub and barbel as well. This is an improved version of our original Bait-Up feeder, with a tri-lobe design and with one of these 'fins' being heavier than the other two, it ensures that it lands the right way up every time, with your hookbait on top of the ball of groundbait. Its shape enables it to easily be packed into a ball of groundbait and for it to grip to it, and the shield at the front helps to prevent the ball breaking up in flight. The shape and weight distribution also helps it to accurately be cast long distances, and on the retrieve it planes up off the bottom and the amount of spin is minimal, thus reducing line twist. There is a rubber insert in the nose, into which a size 8 swivel fits perfectly, and a Tail Rubber makes for a neat, tangle-free finish at the other end. It is available in 50g or 35g versions.

CODE	DISCRIPTION
KDA010	Bait-up Method Feeder 35g
KDA011	Bait-up Method Feeder 50g

SPINNER RIG KRANK

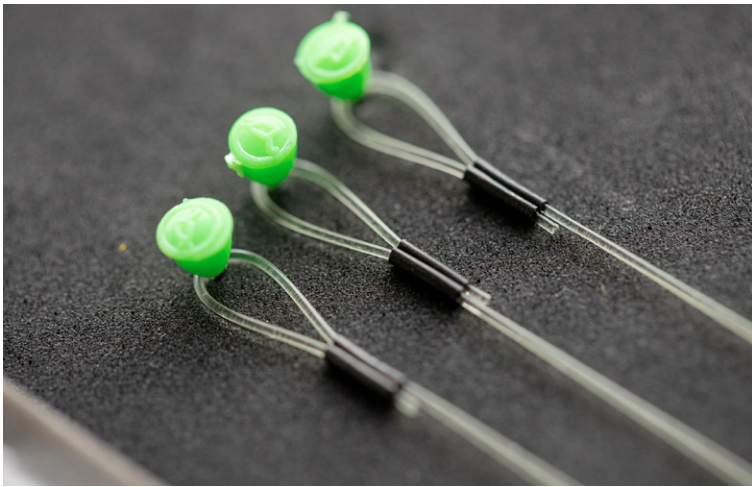

Most anglers will have heard of the spinner rig as it has been featured prominently on many of our videos and is a favourite of a lot of our sponsored anglers, but if you don't have the time or confidence to tie your own, then this ready-tied version is the perfect solution. It is constructed in exactly the same way as any of our top anglers would do it, and features a 5.5 inch Boom hook link with either a Krank or Kurv Shank hook attached via one of our Spinner Swivels which has been crimped on to provide a very strong connection.

At the other end is a crimped loop which can be attached to any of our quick-change style systems. The rig can be used multiple times simply by changing the hook, which is very easy to do. There is a choice of size 4 or 6 hooks, in barbed or barbless, and each packet contains one rig.

"This is the most efficient carp rig I have ever used! I cast this out with extreme confidence as it does everything you wish a rig to do; it has superb hooking potential, and you can even change the hook quickly without having to tie a new rig." TOM DOVE

The READY TIED SPINNER RIG has a 5.5" boom and now comes with both a size 4 or 6 KRANK hook patterns and KURV hook pattern (Barbed or Barbless)

CODE	DISCRIPTION
KCR146	Spinner Rig Krank 4 - 5.5" BOOM
KCR147	Spinner Rig Krank 6 - 5.5" BOOM
KCR148	Spinner Rig Krank 4 - Barbless 5.5" BOOM
KCR149	Spinner Rig Krank 6 - Barbless 5.5" BOOM

N-TRAP DF RIG

The aggressively curved shrink tube, rig ring and super sharp Wide Gape hook combine to turn more pick ups into fish in the net. It features a strong Wide Gape hook in sizes 4, 6 and 8.

CODE	DISCRIPTION
KCR138	N Trap DF Rig, Size 2 Wide Gape, 30 lbs

KCR043	N-Trap DF Rig, Barbless 8 Wide Gape B, 30lb
KCR036	N-Trap DF Rig, Barbless 8 Wide Gape B, 15lb

N-TRAP KD RIG

A combination of the hair position and a balanced bait help the hook find a hold more often than not. These ready-tied versions feature N-Trap and Kurv Shank hooks, which are proven to be the best components for this rig. The KD Carp rigs are available in both barbed and barbless and in X-Strong Euro versions that feature 30lb N-Trap.

CODE	DISCRIPTION

KCR060	IQ D Rig Barbless, Size 6 B Kurv, 12lb
KCR061	IQ D Rig Barbless, Size 8 B Kurv, 10lb

HINGE RIG

There is arguably no better big-fish rig. The hook section is beautifully curved to allow the hook to spin into prime hooking position every time a fish mouths the bait and the IQ boom will kick the hook bait away from the lead on the cast, ensuring perfect presentation.

CODE	DISCRIPTION
KCR088	Hinge Rig Barbed, Size 4 Choddy, 20lb
KCR089	Hinge Rig Barbed, Size 6 Choddy, 20lb
KCR090	Hinge Rig Barbed, Size 8 Choddy, 20lb
KCR091	Hinge Rig Barbless, Size 4 Choddy, 20lb
KCR092	Hinge Rig Barbless, Size 6 Choddy, 20lb
KCR093	Hinge Rig Barbless, Size 8 Choddy, 20lb

SPINNER RIG

The Spinner Rig is by far one of the most popular rigs ever and with reason according to Korda's very own Tom Dove: "This is the most efficient carp rig I have ever used! I cast this out with extreme confidence as it does everything you wish a rig to do; it has superb hooking potential, and you can even change the hook quickly without having to tie a new rig! Easy and very effective."

CODE	DISCRIPTION
KCR134	Spinner Rig Kurv 4 Barbed, 7" Boom
KCR135	Spinner Rig Kurv 6 Barbed, 7" Boom
KCR136	Spinner Rig Kurv 4 Barbless, 7" Boom
KCR137	Spinner Rig Kurv 6 Barbless, 7" Boom

KRANK RIG

Available in barbed and barbless versions, in sizes 2 to 10, the new Krank Rigs utilise the Kamo coated hook link material with a small section stripped back to allow the ultra-wide-gape Krank pattern to take hold consistently. They are tied with a size-eight swivel to allow attachment to lead clips and inline leads.

CODE	DISCRIPTION
KCR072	Krank Rig Barbed Size 2, Kamo 30lb
KCR073	Krank Rig Barbed Size 4, Kamo 20lb
KCR074	Krank Rig Barbed Size 6, Kamo 15lb

KCR108	PVA Bag Rig Barbless, Size 6 Wide Gape, 18lb
KCR109	PVA Bag Rig Barbless, Size 8 Wide Gape, 18lb

KLOR READY TIED LOOP RIGS

DF's favourite loop & boom combination featuring the Klor hook. These ready-tied hook link sections are designed to be used in conjunction with our pre-tied booms, or you can tie your own if you prefer. When the two are looped together they form the perfect combi-rig – simply attach the Klor loop section to the Boom's Loop, loop-to-loop style and you are ready to go, with the added benefit of being able to quickly change the hook section should you need to. The Klor loop section is set up blow-back style but utilising Danny's favoured lasso knot instead of a rig ring. No need for shrink tube, as the in-turned eye of the Klor helps to ensure that the hook flips over and takes a hold. They are tied using a semi-stiff braided material, and come in barbed or barbless versions, in sizes 2, 4, 6, or 8. You get three in a packet.

CODE	DISCRIPTION

BOOMS & LOOPS

NEW 2023

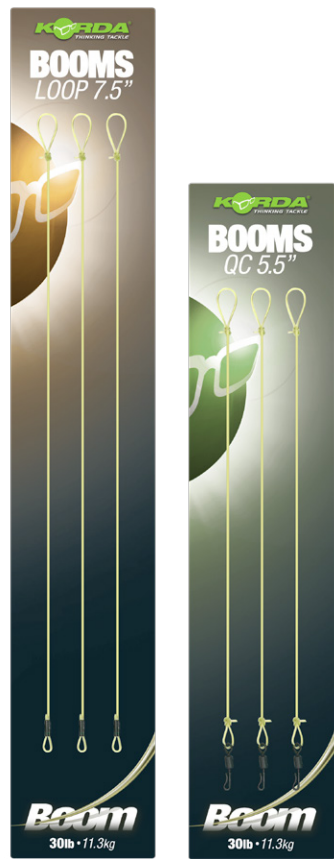

SPINNER HOOK SECTIONS SPINNER

These ready-constructed hook sections for the popular spinner rig take all the time and effort out of making them yourself. All you need to do is crimp the ring swivel onto a stiff hook link material such as Boom – or tie them on if using a coated braid to form a more supple boom – tie on a hookbait, and you're ready to cast out. They are constructed using either the new Spinner hook or the popular Krank and Kurv Shank hooks - so you can choose your favourite pattern. Regardless of hook-pattern, they come complete with a Spinner Swivel and a Kicker which ensures the rig sits at the perfect angle. Each Spinner Hook Section has a Micro Rig Swivel already mounted on the shank, plus a Hook Bead set at the optimum position. If the hook becomes blunt you can easily switch it for a fresh one as ten Hook Beads are also included in the packet. They are available in barbed or barbless versions, in sizes 4, 5 and 6 for Spinner Hook and 4 or 6 for Krank and Kurv. All have three Spinner Hook Sections in a pack.

- Key Features:
- Ready constructed Spinner Rig hook sections
 - Simply crimp to a boom material
 - Choice of Spinner, Krank or Kurv Shank hooks
 - Three per pack

KRR035	Spinner Hook Sections Spinner Barbless 6

READY TIED BOOMS

Using these Ready Tied Booms in conjunction with a helicopter set-up creates the ultimate tangle free presentation. These are ideal for making your own Spinner Rig, favoured by a lot of the Korda anglers. They are available in two versions - regular loop and QC - to suit all anglers' needs.

CODE	DISCRIPTION
KCR110	Booms Quick Change 5.5"
KCR111	Booms Quick Change 7.5"
KCR112	Booms Regular Loop 5.5"
KCR113	Booms Regular Loop 7.5"

NEW 2024

BOOMS SPINNER SWIVEL XX

The Spinner Rig is incredibly popular these days, but if you aren't confident in tying your own, or simply don't have the time, then these ready-tied booms are the perfect solution. Constructed from our market leading Boom material in 35lb. These Booms are extremely strong and durable. To make life easier, they have a loop crimped at one end - which can be attached to your lead system via a QC Swivel, Kwik Link or similar. At the business end, a XX Spinner Swivel has been attached via a crimp; this is the extra strong version within our Spinner Swivel range. To turn the ready tied boom into a Spinner Rig, all you need to do is attach your choice of hook, complete with a kicker to cover the XX Spinner Swivel. They come in a choice of 5.5 inch or 7.5 inch long booms, with three per pack.

CODE	DISCRIPTION
KRR019	Booms Spinner Swivel XX 5.5in
KRR020	Booms Spinner Swivel XX 7.5in

BOOM TUBES

Having gone to all the effort of making up boom sections for your rigs - or having purchased our ready constructed ones - you want to ensure that they stay in perfect condition and don't get kinked or damage prior to being used. The Boom Tubes are the perfect solution and come with two different length hard tubes - 6in. (15cm) and 9in (23cm). - which will each hold up to 30 boom sections. They feature a cap at each end which fits securely in place to ensure that the booms can't fall out during transit.

CODE	DISCRIPTION

BOOMS & LOOPS

NEW 2023

SPINNER RIG SPINNER

This Spinner Hook version is the only rig in the ready tied range available in size 5. This hook pattern was designed purposely for use with the Spinner Rig. The 55-degree eye angle follows the direction of a kicker which enables the hook to sit perfectly when used with a buoyant hook bait. Furthermore, the long, curved shank opens the gape of the hook when mounted on the Spinner Swivel offering the very best hooking potential. These Spinner rigs across the range are constructed in exactly the same way as any of our top anglers would do it and features a 5.5" Boom hook link with either a Krank, Kurv Shank or Spinner hook attached via one of our Spinner Swivels which has been crimped on to provide a very strong connection. At the other end is a crimped loop which can be attached to any of our quick-change style systems. The rig can be used multiple times simply by changing the hook, which is very easy to do. There is a choice of size 4 or 6 hooks (with size 5 available in Spinner Hook version), in barbed or barbless and each packet contains one rig.

"This is the most efficient carp rig I have ever used! I cast this out with extreme confidence as it does everything you wish a rig to do; it has superb hooking potential, and you can even change the hook quickly without having to tie a new rig." TOM DOVE
The Ready Tied Spinner Rig has a 5.5" boom and now comes with three patterns of hook; Krank, Kurv and the latest version in the Korda stable, the Spinner Hook. All come in barbed or barbless versions, sizes 4 and 6.

COMPLETE MARK II STOW INDICATORS - *(Isotopes not included)*

Stows are indicators that allow unparalleled sensitivity when using slack or tight lines. Korda acquired the rights to the design from Carl Pashley, the originator of the Elstow bobbins, because we thought that the concept truly represented a step forward in indicator design. The new improved line clip helps transmit any line movement into positive indications that help you to understand what's happening at the rig end – Stows are particularly good at picking up line bites. The bobbins are available as ready-to-go systems, or as separate, interchangeable components. The chains with short steel extensions are suitable for Delkim-sized alarms, whereas the chains with long extensions are for smaller, Neville-type alarms.

STOWAWAY CASE / for 2 or 3 Indicators

The ultimate in protection for your Stow indicators. These magnetic protective cases have been custom designed to hold your indicators securely. The heads clip into the boxes and the magnetic chain extension attaches to another magnet at the base of the box - ingenious! We have produced two-rod and three-rod versions. If you've got Stows, you'll want these cases!

CODE	DISCRIPTION

HOCKEY STICK & ADAPTOR

This neat little insert allows the angler to switch to an alternative indicator without the need to remove the bite alarm.

CODE	DISCRIPTION
KBHS	Black hockey stick

BLACK & WHITES - INDICATION SYSTEM

Also supplied are two different length chains - the standard 6 inch and a longer 9 inch version - for you to choose between, depending on personal preference. The Hockey sticks that come with the Black & Whites are fully compatible with the Stow range of indicators, so once you have attached the magnetic bayonet-style hockey sticks supplied with your Black & Whites, you can change between styles instantly, without having to unscrew your alarms.

The Black & Whites have a mechanism that runs through the body of the bobbin, allowing you to adjust the grip-strength of the line clip with a simple twist, again allowing for unrivalled customisation of the hanger. The Black & Whites are a two-sided design, one a solid white or black plastic, and the other a clear plastic that houses the super-bright new Mini Isotopes.

BLACK & WHITES

The Black & Whites are a bobbin that we believe offers the ultimate in performance and functionality, alongside classic style and versatility. There are four sizes in the range, and each comes with two interchangeable weights, so depending on the situation you are faced with, and what you want your indicators to achieve, you can customise the weight and tension applied to your line.

JAG

UPRIGHTS / *Stainless or Super-Light Black*

The uprights are available in three lengths. Longer uprights should be attached to the front buzz bar if raised rod tips are preferred. Each upright is easily extended, so it's easy to get your rods sitting at the perfect angle.

CODE	STAINLESS	CODE	BLACK
KSING01	3.5"	KSING17	3.5"
KSING02	5"	KSING18	5"
KSING03	6.5"	KSING19	6.5"

2 ROD BUZZER BAR / *Stainless or Super-Light Black*

The two rod Buzz Bar is available in four different widths. By selecting a wider bar at the front, the angler can achieve the perfect 'splay' on the rod tips. Select the narrower bars in order to get a tighter look.

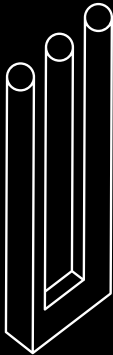

CODE	STAINLESS	CODE	BLACK
KSING08	6.5"	KSING24	6.5"

KSING06	9.5"	KSING22	9.5"
KSING07	8.5"	KSING23	8.5"

This is a concept in rod support that's set to turn conventional buzz bar setups on their head! It's the brainchild of Danny Fairbrass, and is produced to staggeringly high standards by stainless wizard JAG Products. Singlez combines the beauty and aesthetics of single banksticks with supreme solidity and convenience, not to say attention to detail that's simply breathtaking! The Singlez system can be used as a two-rod setup or a three-rod setup, in hard or soft ground and even on wooden or block-paved platforms and towpaths. Mix and match the uprights and buzz bars to create the setup that best matches your needs.

The system is also available in a super-light black aluminium for those that prefer their gear to be a little lighter and more understated. All the components are the same as the stainless version.

GROUND SPIKE & SPIKE EXTENSION

Stainless or Super-Light Black

Drive the spike into the ground for a rock solid set up. For softer terrain, add the extension for additional stability.

CODE	STAINLESS	CODE	BLACK
KSING12	Ground Spike	KSING28	Ground Spike
KSING13	Extension	KSING29	Extension

STABILIZER

Stainless or Super-Light Black

The Stabilizer slots neatly into the base of the Buzz Bar and locks it in place once it's pushed into the ground. Two Stabilizers are required, one for the front and one for the rear Buzz Bar.

CODE	STAINLESS	CODE	BLACK
KSING14	Stabilizer	KSING30	Stabilizer

STAGE STANDS

Stainless or Super-Light Black

Use these in place of the Stabilizer and Ground Spike when fishing from platforms. They are supplied with two heavy duty screws which can even be screwed into concrete if required.

CODE	STAINLESS	CODE	BLACK
KSING15	Stage Stands	KSING31	Stage Stands

T-BAR

Stainless

Available in the stainless only, this heavy duty bar can be used to drive the ground spike into the bank prior to attaching it to your Buzz Bar. It also doubles as a handy weigh bar for recording fish weights accurately.

CODE	STAINLESS
KSING16	6.5

SINGLEZ BAG

This bag has been designed for those who want to keep their Singlez system – either the original stainless or lightweight Black versions – in perfect condition and ensure that no pieces are mislaid in-between sessions. This durable bag features a carrying handle and a double zip for easy access, and it comes in a choice of green or black. The interior has quilted padding and specially designed sleeves and compartments for every component of the Singlez, including a central padded divider. The sleeves have been designed so that they will fit any length of upright, including your bite alarm or rear rod rest. Plus, there are separate sleeves for spikes. The over side of the bag has zipped compartments to hold the buzz bars, and items such as stage stands and stabilisers. It has been designed for use with both the two-rod and three-rod versions of the Singlez.

CODE	STAINLESS
KSING33	Green

SINGLEZ LOCK IT TOOL

This multi-purpose tool has been designed to work in conjunction with the collars on Korda Singlez Uprights and many thumb screw banksticks on the market. The tool can be used to tighten or loosen Singlez collars and thumb screws with ease, ensuring your set-up is as rock solid as it should be and can be stowed away quickly after your session. The tool has a unique internal profile and extended grip making it easy to apply pressure to Singlez collars. In addition, a hook at the end of the tool is designed for lifting bucket lids and small magnets keep the tool closed when not in use. Manufactured by JAG from high grade aluminium you can be sure this product has been engineered with quality and functionality in mind. Comes with an anodised green finish and etched Korda branding.

COMPAC LUGGAGE

NEW 2023

COMPAC FRAMED CARRYALL SMALL

The Korda Compac Small Framed Carryall is the smaller of the two versions, with an internal capacity of 25 litres offering multiple internal and external storage options. It boasts a powder coated aluminium frame for strength and rigidity.

It is actually based on a very old and classic design, the original Egeeco rucksack that had a frame and legs, which ensured that it kept it out of any mud or water when it was stood on the ground.

Internally, there is an open compartment for storing bulkier items, complimented by a detachable moulded tray designed to be used as a bivvy table. If the moulded tray is removed, the hard, padded lid can also double up as a table.

Externally, the carryall features five pockets, four of which are designed to complement the Compac 100, 110, 125, and 140 EVA Pouches.

The front pocket is large enough to accommodate a Korda Tackle Box, helping to maximise the space within the main compartment. The front pocket is supplied with two internal organisers that can be configured to suit your individual requirements, whilst the end pockets feature moulded ports for easy access to charging cables. The carryall sits on four self-levelling mud feet. This not only maintains stability but also raises the base of carryall off the floor making it ideal for fishing those 'not so ideal' swims.

Compac luggage is manufactured using high performance fabrics and military grade components, creating an organised, strong, lightweight, durable luggage system.

Overall dimensions: 56cm x 33cm x 41cm

Main compartment dimensions:

41cm x 20cm x 30cm / 25 litres

COMPAC RUCKSACK 60

The COMPAC Rucksack has been designed for anglers who still carry their tackle on their back, rather than using a barrow, or who simply prefer this style of bag to a carryall, and it will hold loads of gear whilst still being comfortable to wear. This 60 litre rucksack offers plenty of internal storage room, as well as allowing you to keep all of your tackle well organised thanks to four outer side pockets which are the perfect size to fit the Compac 100, 110 and 125 EVA pouches, plus a front pocket which gives quick access to all your essential terminal tackle as the Korda Tackle Box fits perfectly into it. This leaves plenty of space in the main

compartment for all of your other kit, along with a zipped internal pocket that is handy for keeping things like your wallet and car keys safe when you are on the bank. Overall dimensions: 52cm x 46cm x 32cm

COMPAC COOLER KAMO - 14 litres

If you're looking for the ultimate fishing coolbag/box to keep all your food and bait in perfect condition during longer sessions, then look no further than the Compac Cooler. The Cooler is the ultimate bag for keeping food and bait frozen or chilled for as long as possible. Featuring, closed-cell, non-absorbent high-insulation to keep the inside temperature as low as possible, which can be further aided by the addition of Cool Packs. This version features an all over exclusive custom light KAMO camouflage print unique to Korda. Every aspect of the Cooler has been carefully designed for the ultimate performance, right down to the premium quality waterproof and air tight zips around the moulded hard-top lid, which keeps cold air inside and prevents moisture getting in. Even when full it is easy to carry, or lift on or off your barrow, thanks to a padded, removable shoulder strap and reinforced handles. This Korda Light Kamo version has a 14 litre capacity, maintaining plenty of room for food, bait and liquids which needs to be kept cold, whilst still utilising the same footprint as the 20l version. This means that it can still be used with the XL Compac Coolpack (sold separately). Dimensions: 38cm x 29.5cm x 34cm. 14 litre capacity

CODE	DISCRIPTION
KLUG74	Compac Cooler Kamo 14l

NEW 2023

COMPAC COOL BAG ROUND DARK KAMO

The range of Dark Kamo Compac Cool Bags has been designed to keep your bait and food as fresh as possible, with a suitable model to cater for all your needs. Whether you are fishing a day session, quick over- nighter, or going fishing for several days and taking a load of bait and food, there is a size of Cool Bag which will perfectly meet your needs, as well as looking stylish and being specifically designed for fishing. The exterior is made from the same durable and water-resistant Dark Kamo fabric used across the Dark Kamo range, so they will match the rest of your luggage, plus they have a reinforced waterproof base. The inner walls are fully insulated to keep the contents cool or frozen for as long as possible – being able to

pick a size of Cool Bag that leaves as little empty space inside as you can help to keep the contents colder for longer – and the addition of Compac Cool Packs helps with that (two Cool Packs are supplied with each medium or large Cool Bag, with internal straps to hold them securely in place).
Dimensions: 25cm x 25cm x 25cm
12 litres capacity.

COMPAC TABLET BAG

These days many anglers take a tablet/small laptop with them whilst fishing, and given what some of those cost, you want to ensure that it stays dry and well protected when you aren't using it! The COMPAC Tablet Bag is the perfect solution, with three models in the range, so you can find one which will neatly fit whatever size tablet/small laptop you have – SMALL is for screen sizes up to 8 inches; MEDIUM for up to 11 inches; and LARGE for up to 13 inches. These bags feature a fully padded foam lining to

protect your devices, with easy access via a heavy duty zip and moulded puller, plus an external pocket for charging cables, or similar. The COMPAC Tablet Bags are made from high performance, lightweight, strong, durable, water resistant fabric, to keep your tablet in perfect condition, whilst matching the rest of your luggage.
Dimensions Small: 22cm x 16cm x 2cm.
Dimensions Medium: 27cm x 19cm x 2cm.

COMPAC BANKSTICK BAG

The COMPAC Bankstick Bag Dark Kamo is the perfect storage solution for those who want to pull their banksticks out of the ground at the end of a session – such as an overnigher between working – and have them quickly packed away, but in a way that ensures your alarms and bobbins won't get damaged. It also ensures mud and grit are not transferred into your bag after a rain soaked session.
The COMPAC Bankstick Bag is made from the same lightweight, strong, durable, water resistant fabric that is used on the rest of the Korda COMPAC Luggage range, and it is fully padded inside with a foam lining to offer plenty of protection during transit. It will hold banksticks up to 18 inches long (or 15 inch with

Delkims attached) and there is enough space to carry all the banksticks you might need during a session. A full length, heavy duty double zip provides easy access, complete with moulded pullers which are easy to grip.
Dimensions: 50cm x 9cm x 9cm.

COMPAC DIGITAL SCALES POUCH

The Compac Digital Scales Pouch will ensure your Korda Digital Scales stay in perfect working order and ready for whenever you catch that special fish! Like all of the Compac luggage range, these pouches are constructed from high performance, military grade fabrics and components, to ensure they perform as they should and are also hard-wearing and long-lasting. The outside of the pouch is made from strong, lightweight, durable and water resistant fabric, to help ensure that your scales stay dry – as water and electronics don't

mix well together! A padded foam lining keeps your scales well protected and stops them getting knocked around whilst in transit. This stylish pouch also features a Compac logo and a heavy duty zip, complete with puller, for easy access to your scales.

COMPAC GOO BAG SMALL

Goo can be incredibly effective, especially when you play around with different colour and flavour combinations, and the Compac Goo Bag is the ideal storage solution for it. The Goo Bag features a removeable insert which is designed to hold all your bottles of Goo securely in place and avoid spillages or damage to the bottles – the small size will take six bottles, and the large has enough space for twelve. The lining is wipe clean and the bags are padded enough to protect your Goo, with the same durable, water resistant, outer fabric found on the rest of our Compac range. Both bags feature a reinforced carry handle as well as heavy duty zips and pullers.

COMPAC DUFFLE 30

The Compac Duffle 30 is a roll top duffle bag made from high-quality PVC tarpaulin material, which makes it incredibly durable and waterproof. This bag is designed to withstand all sorts of tough conditions, making it the perfect choice for life on the bank and anyone who needs a reliable bag to keep their belongings safe and dry. One of the standout features of the Duffle 30 is its watertight roll top closure. This innovative design ensures that the bag is completely sealed, keeping your gear safe from water, dust, and other elements. The wide opening also makes it easy to access your belongings, even when the bag is fully packed. Dimensions: 50cm x 30cm x 30cm / 30 litres capacity

CODE	DISCRIPTION
KLUG142	Compac Duffle 30

COMPAC WADER COVER

With the Compac Wader Cover you can position your waders wherever you want in your swim and then when you need to use them it is simply a case of lifting it off with the handle on the base (the top when it is being used as a cover) and you're ready to go. A zipped mesh lid enables air to circulate and moisture to evaporate, but without it leaking onto everything else, as the heavy-duty waterproof material that the rest of the cover is constructed from won't leak. It also features reinforced carry handles on either side at the top, to enable you to easily lift it on and off of your barrow, or in and out of your vehicle, and there are also webbing loops that a should strap (not included) can be attached to.

CODE	DISCRIPTION
KLUG81	Compac Wader Cover

COMPAC LOW CHAIR

The Compac Low Chair features a lightweight frame and concertina design. These features not only make the chair extremely lightweight but also very compact, making it ideal for loading onto a barrow, packing away in your bivvy or for transportation. With fully adjustable mud feet, the Low Chair is easily levelled on uneven ground, offering an extremely stable stance.

As the name suggests, the Low Chair offers a low-profile viewpoint, making it ideal for watching the water under the front of your bivvy when weather conditions dictate shade or shelter. The arms and headrest are also padded, making the chair very comfortable to sit in over long periods. Constructed from 600D durable and waterproof fabric. Dimensions: 60cm x72cm x72cm. Weight: 3.75kg.

CODE	DISCRIPTION
KLUG82	Compac Low Chair

COMPAC WEIGH SLING

Designed to aid weighing carp accurately, the Korda Compac Weigh Sling is constructed from a lightweight, quick dry, fish friendly material. The base of the sling features multiple drainage holes which ensures water exits quickly when weighing fish. The sling also boasts buoyant foam in the bars, making it easier to transfer your landing net into the sling when safely lifting carp out of the water. Although the buoyant bars float on the surface of the water, this is a weigh

sling only and should not be used to retain fish for any period. The perfectly shaped cut-out grab handles help when transferring the weigh sling to your mat. The sling also features durable, metal weighing loops and quick release zips. Comes complete with waterproof stink bag, providing the perfect end-of-session storage solution. Available in two colours: Olive and Kamo.

CODE	DISCRIPTION
KLUG83	Compac Weigh Sling Olive
KLUG84	Compac Weigh Sling Kamo

COMPAC WEIGH STAFF

The Compac Weigh Staff has been constructed from high-grade anodised aluminium, creating a durable and reliable bit of kit that will withstand the rigors of life on the bank. Featuring a unique 2-piece construction, the Compac Weigh Staff has a minimal footprint and packs down small and tight for easy storage. Its brass fittings and threads guarantee secure, strong and long-lasting use. The Weigh Staff is equipped with a rotating stainless-steel carabiner for quick and hassle-free weighing. Additionally, the stainless-steel spiked base ensures the staff is anchored securely into the ground providing a solid foundation for accurate reading. The Weigh Staff comes complete with a convenient Compac storage bag, allowing you to keep it safe and organised when not in use.

DRY KORE BEDCHAIR COVER

The DRYKORE fabric provides an advanced level of waterproofing and breathability, making it the perfect material for this hard-wearing bedchair cover. By allowing moisture to escape, the hydrophilic membrane helps to regulate your body temperature, keeping you dry and comfortable.
The cover also features a unique removable fleece lining making it exceptionally versatile. Leave the lining attached during the colder months, but remove it to create a super-light summer weight cover.

- The lightweight shell is constructed from industry leading 15k breathable fabric, keeping you dry and comfortable.
- The 15k hydrophilic membrane is taped and sealed at the seams, completely protecting you from driving rain and snow.
- A premium water proofing treatment that retains 80% efficiency even after 20 washes.
- The fabric remains impenetrable to wind, even in the strongest gale.
- Press studs and zip ensure the inner lining stays flush to the outer cover.
- Four buckle clips allow the cover to be secured to the frame of a bedchair, preventing it from slipping to the ground.

CODE	DISCRIPTION
KDA002	Dry Kore Bedchair Cover

COMPAC ROD DIVIDE HOLDALL

This unique system in three and five rod versions, is designed to fully protect both your rods and reels whilst fully made up. Accommodating big pit reels and 50mm butt rings.

Each rod and reel are encased in their own zipped compartment and as the name suggests the holdall is 'divided' into rod sleeves, providing totally independent protection for all your rods and reels. Furthermore, making it much easier when setting up and packing away.

The exterior has pockets and straps along the spine of the holdall to securely hold landing nets and poles. There is a zip pocket to store your leads at the end of each session and a removable, padded shoulder strap makes transportation comfortable.

Manufactured using high-performance, water-resistant fabric and military grade components, creating an extremely organised, strong, lightweight and durable holdall.

Divide single rod sleeves are also available and can be attached to the holdall via a special clip system. Also includes a moulded loop to attach and ID tag if required.

Available in 12' and 13', 3 and 5 rod versions.

CODE	DISCRIPTION

COMPAC SINGLE DIVIDE SLEEVE

Protective rod sleeve which can be used independently or with the Compac Divide Rod Holdalls. A special clip system secures each sleeve to the holdall. Constructed from the same high-performance, water-resistant fabric and military grade components and the Divide Holdall.

Each sleeve accommodates big pit reels and 50mm butt rings and fits securely in the side pouch of the holdall and features a small pocket to store your lead at the end of your session.

Divide Rod Sleeves are available in both 12' & 13" versions.

CODE	DISCRIPTION
KLUG90	Compac Single Divide Sleeve 12ft
KLUG91	Compac Single Divide Sleeve 13ft

SPRING BOW NET

Like rods, landing nets can be a very personal choice. Aesthetics, function and price always influencing most anglers' decision making when purchasing a new item of tackle.

We took our inspiration from a classic design from the past. Available in the early eighties by a shop in North London, Dons of Edmonton. Their Springbow was a brown fibre glass net, featuring a very unique, heavy stainless spreader tube, but that said it was the net of the era and the only serious choice for the carp fisher of the day!

The fashion of today seems to be for very thin handles similar to or matching an angler's carp rods.

We have gone completely against this trend. For performance it was incredibly important that both the arms and pole had inherent stiffness. By having a very low diameter pole, you increase weight because you must increase wall thickness, thin handles are simply not as good to hold in use. A higher diameter handle increases stiffness, is easier to use and more comfortable to grip. We can utilise a thinner wall section without having to compromise on strength or weight.

Our design has a 6' handle that tapers down from 23 to 18mm. Manufactured from ultra-light, high performing carbon fibre in a stunning satin black finish. With a beautifully turned 316 stainless steel point in the end. This has helped to create a net that is so light, that when fully assembled and in use, lays perfectly on the surface of the water without having to use any kind of net float.

One of the key design points was to make a 'statement' spreader block. Something extremely light, very strong and unique in appearance. From concept to production, we updated the design four times over a period of about two and a half years. The final version is stunning to look at. Engineered by our friends at JAG, it's incredibly light, but more importantly so very easy to use and assemble the arms into. As you offer the arms up to the block, you'll notice inside it has a slight oval shape to it, we have machined the block so that it has what we call a "leading" edge. This makes additional space for the arm as its flexed and pushed into place. The arms exit the block at the perfect angle

of 91 degrees, this along with using the stiffest arms we could make without compromising assembly give a truly lovely shape to each assembled net. Each arm has an oversized machined, anodised aluminium, rounded end, designed so that it won't push through the mesh and damage it. This part holds the thick green cord between the arms, with zero stretch and a perfect curve in the arms this keeps everything as tight as possible and helps reduce drag as it's pushed through the water.

The aluminium spreader block is machined out on both front and back faces, (you can see the arms sitting inside). This feature further reducing weight and giving its "chassis like styling". We've added a small slot on the front face that fits a 15mm isotope (NOT included) and engraved on the back with the Spring Bow logo. The final touch was to spray the block in a hard wearing, ceramic, Gun Smoke finish.

We have manufactured three versions, 42" 46" and 50" each one comes with a medium depth net in full Hexmesh. The net part is deep enough for the angler that chooses to push the handle into the lakebed with the arms far enough above the water to retain and stop any carp jumping free after capture!

If you are located in Mainland Europe then two versions of the Spring Bow Landing Net are available, giving you the option to purchase the net either with the medium mesh attached or alternatively with a shallow mesh. If you are located in the UK only the medium version is available complete. However, the shallow mesh is available to purchase separately from our stockists.

All nets come in a heavy-duty Korda Dark Kamo sleeve which has separate pockets for both handle and the arms.

KONTAINER SYSTEM 17L

The Kontainer System is a clever idea that gets around the problem of having to take multiple buckets fishing with you in order to keep your bait separate, with none of them actually being full.

The Kontainer System is 17 litres in size and comes complete with four separate Kontainers which can each be filled with something different and where you either don't want to mix all your bait together, or only want to do so at the point where you want to actually introduce it to the lake.

- 4 Kontainers will fit inside a 17l bucket
- Soft lids ensure an airtight/watertight seal
- Includes 0.25l side markers for precise spod mixes
- Freezer safe
- Suitable for storing particles and boilies
- Stackable for easy storage
- Spare Kontainers sold separately

CODE	DISCRIPTION

COMPAC SPOOLING BUCKET

The Compac Spooling Bucket is designed to make respooling your reels as effortless as possible. The 9-litre bucket features a two-piece, removeable spindle to mount your spool onto. Once loaded, the spindle locates into two moulded clips inside the bucket, retaining the spool of line in the optimum re-spooling position.

Not only does this product make spooling your line easier, it can also be used as a standard water bucket for balancing rigs and keeping fish wet when on the bank.

Not compatible with Code:KFC12 – Kontour 12lb Fluorocarbon Mainline
Dimensions: 21cm (h) x 24cm (C)
9 litres capacity

CODE	DISCRIPTION

COMPAC TEA SET 3 PIECE

Our range of EVA pouches have been a huge success and anglers use them for storing all sorts of things, and now there is one specifically for your brew kit, in the form of the Compac Tea Set, which ensures that making a cuppa on the bank has never been easier. Like all of our Compac range, the Tea Set pouches are waterproof, with welded seams, and a transparent, zipped lid to make the contents easily identifiable, as well as being easy to wipe clean.

CODE	DISCRIPTION
KLUG13	Compac Tea Set 3 Piece

It comes complete with three of our new high quality china mugs, which come with a high gloss finish, an ergonomically shaped handle, and a large Korda logo on the exterior – a two-mug version will be available later in the year. Each kit also features three plastic pots, with screw tops embossed with the Korda logo, and designed for storing your coffee, tea bags and sugar. The Compac Tea Set is completed with one final essential item when it comes to making a cuppa – a black-plated stainless steel teaspoon, complete with a laseretched Korda logo.

COMPAC TEA SET 3 PIECE

These stylish mugs are the perfect addition to your brew kit, and you can even pick a colour to match your favourite Korda clothing! The Korda Mug is made from high quality china, with a glossy finish to make cleaning easier and to help prevent staining. The handle, and mug itself, have been ergonomically designed so that its shape feels comfortable to hold in your hand or hands – a big bonus during the colder months when using it to help warm them up! Each Korda Mug features a large Korda 'glasses' logo on the outside, and comes in a choice of Olive Green, Black, or Burgundy.

WINDSHIELD

The Korda Windshield provides the perfect barrier in inclement weather conditions, ensuring that your stove continues to deliver efficient heat transfer. Foldable and sturdy aluminium plates, wrap around the stove to shield the flame from the wind. The special hinged design allows the Windshield to fold completely flat for storage and fits perfectly inside the Compac Cookware Bag. Manufactured from aluminium with a gun-smoke hard anodised finish and Laser etched Korda logo. The large version is designed to be used with petrol and bottle top gas stoves. Dimensions (flat): 21.5cm x 23cm.

DRYKORE WATERPROOF CLOTHING

Our brand new DRYKORE range of waterproof jackets are breathable, have a lightweight outer shell constructed from industry leading 15K fabric and are so light you will hardly notice that you even have it on.

WATERPROOF - The DRYKORE jacket keeps you completely dry and will not hinder your activity – whether that be casting, playing fish, or even climbing up a tree. The 15K hydrophilic membrane, which is taped and sealed at the seams, ensures that it is completely waterproof, even if you happen to get caught out in torrential rain or a snowstorm.

WINDPROOF - Whilst designed to be worn over the top of other clothing during the colder months, it also plays a big part in keeping you warm as it is impenetrable to wind, even the strongest gale can't get through it.

STRETCH FIT - As well as being water and wind proof, the high-tech woven material that we have used provides an exceptional stretch-fit, meaning that whilst the jacket has been designed to stop rain or wind finding a way in, it also allows you complete freedom of movement and won't restrict your movement when it comes to fishing.

KOMBAT BOOTS / Olive & Brown

The NEW Kombat Boots were designed by Danny Fairbrass to replicate the high end walking boots that he had previously worn for fishing, but with the inclusion of some extra features to make them perfect for anglers, and without such a hefty price tag.

They have been designed with comfort and functionality in mind, as well as looking the part on the bank. They have excellent waterproofing qualities, which is essential when walking through wet grass or putting your foot into shallow water or puddles, as wet feet quickly become cold and can ruin your session. The soles have been designed with grip and durability in mind, and the tread offers superb purchase on the types of surfaces that you are likely to encounter whilst out fishing and will help prevent you from slipping over.

CODE	DISCRIPTION
KCL504	KORE Kombat Boots Olive Size 7
KCL505	KORE Kombat Boots Olive Size 8
KCL506	KORE Kombat Boots Olive Size 9
KCL507	KORE Kombat Boots Olive Size 10
KCL508	KORE Kombat Boots Olive Size 11
KCL509	KORE Kombat Boots Olive Size 12

Note: When buying, make sure that you consider the socks that you will be wearing with them, as you may need a larger size when wearing thick ones.

The Kombat Boots are also great for walking longer distances in, providing support but without being rigid, and you will hardly even feel that you have them on! Many walking boots can be difficult to get on and off quickly, but these have been designed specifically with the angler in mind and open wide so that they can be quickly slipped on when you get a bite in the middle of the night. Another issue with some walking boots is that the laces keep on coming undone, which not only means that you have to keep stopping to re-tie them, but also means they drag through the mud, as well as potentially tripping you up, but the Kombat Boots have a flat lace design to help ensure that doesn't happen and they stay done up securely.

Danny Fairbrass explained: “They’re styled on a high fashion walking boot that I bought in Italy some years ago for a lot more money than these ones are. They’re leather uppers, they’ve got a waterproof membrane inside them, so you can stand in the water if you want to. People always say are they warm – no they’re not warm, because they aren’t meant to be, as they are meant to be waterproof and have a good grip, but wearing them with a combination of our waterproof and merino socks will keep your feet warm inside them.”

KORE DRYKORE JACKET / Olive & Black

The DRYKORE Jacket has undergone extensive testing to get it just right, you may have even seen Danny and the team in sample versions in our videos over the past two years. It is an original custom design that has been overseen by Danny F throughout the process and has a large number of angling inspired design features.

The neck comes up high enough that it will keep out any draughts, with a soft-touch flap to prevent the zipper from rubbing on your face or chin. The integral hood is adjustable via a toggle at the back, to enable it to fit perfectly over caps, and also to provide a tight enough fit that it won't keep blowing off your head if it is windy. In addition to that, it features a rigid peak which not only helps it to keep its shape, but also encourages water to run off down the sides, rather than dripping down onto your face.

It is shaped around the waist so that it is longer at the back, meaning that it will still keep you dry when you sit down and stops it riding up. The cuffs are also designed to prevent water from entering, such as when you raise your arms to cast – there is nothing worse than water running down your sleeves! – This is achieved by having Velcro fastenings which ensures a tight fit around your wrists, but which can easily be adjusted for comfort, depending on what you are doing at the time.

The zips are high quality throughout and have been designed to prevent water from getting through either the main zip, or from entering the two large external pockets, which can be used either for storage or to protect your hands from the elements. There are also two internal pockets for valuables – one of which is smaller and perfect for car keys, and the other will easily fit your mobile phone.

KORE DRYKORE OVERTROUSERS / Olive

The DRYKORE Over Trousers are made from a breathable, lightweight shell, incorporating an industry leading 15k hydrophilic membrane, which is taped and sealed at the seams to ensure that it remains completely waterproof. The use of this lightweight – yet tough and durable - material means that you will hardly even notice that you are wearing them, and the fabric is breathable to help ensure that you don't sweat whilst you have them on. The material also features 'mechanical stretch' which gives an active fit design, such that the DRYKORE Over Trousers fit well to the shape of your lower body, whilst also allowing complete freedom of movement, and without being excessively baggy.

- Water- and windproof
- Stretch fit
- Waterproof zips on each side
- Adjustable Velcro tabs on leg openings
- Quick release belt with an elasticated waistband
- Microfibre knee patches

KORE CREW NECK / Charcoal

This Kore Crew neck Jumper is perfect for chilly evenings during the warmer months, or as one of several layers in the winter. The neck, cuffs and waist are made from a stretchy material to provide a good fit and to also keep warmth in, and the soft fleece inner helps make it very comfortable to wear. The sleeves have thumbholes, which help to keep your hands warm by keeping the cuffs over your hands when required, and also stops the sleeves riding up when adding another layer on top. It comes in olive green or charcoal. Available in sizes from small to XXXL.

KORE POLAR FLEECE JACKET / Black

This fleece has been designed to either be worn as an outer layer during the warmer months, or as a mid-layer when really wrapping up for extreme weather conditions in the winter. It is made from a heavy-knit fleece material and this makes it very warm, as well as being extremely comfortable to wear and with a stylish look. The full length zip means that it is very easy to get on and off, and a snug fitting hood and a collar which comes up high on the neck help to keep any draughts out, as does the fact that it fits fairly close to your body, but without inhibiting movement. There is also plenty of space for storage via two zipped side pockets, plus a zipped breast pocket, to keep all your belongings secured. It is available in a choice of olive or black, and in size from small to XXXL.

KORE THERMOLITE® PUFFER JACKET / Olive & Black

This puffer-style jacket will not only keep you warm whatever the weather, but is also incredibly comfortable to wear and won't restrict your movement, thanks to the hi-tech materials used to make it. It is filled with our THERMOLITE® padding, which used hollow fibre technology to provide the optimal amount of warmth from the lightest possible weight of material, and which maintains that performance even when wet – which is a big advantage over traditional down-fillings. The outer shell is made from a two-layer bonded fabric which is tough enough to withstand long term use on the bank and anything you might reasonably encounter whilst wearing it, without easily tearing or snagging. The Thermolite Puffer Jacket is also highly water resistant, due to the outer material having a 3K hydrostatic head and a DWR (durable water repellent) coating, which is unique to this jacket and an industry first.

As well as being water resistant, it is also windproof to help keep you warm when exposed to the elements, and that is enhanced by a longer than usual back, which helps prevent draughts and stops the jacket riding up above the top of your trousers when you sit down. A snug-fitting hood, which comes up from around your neck, also helps to prevent any cold air getting inside the jacket, as well as keeping your head warm and dry. The Thermolite Puffer Jacket also features two zipped, fleece lined pockets, which not only are useful for storing any item you need easy access to, but are also great for keeping your hands warm. High quality zips have been used throughout. The Puffer Jacket is available in olive green or black, and It comes in sizes from small to XXXL.

THERMOLITE®

HYBRID JACKET / Olive & Charcoal

The Hybrid Jacket is a fusion of two of Korda's most popular jackets; the Polar Fleece and the Puffer Jacket. Taking the lightweight fleece properties of one and the hollow fibre technology from the other has created a blend of core warmth for the body, whilst achieving the manoeuvrability of a lightweight fleece. The Hybrid Jacket is the complete all-rounder and allows casting and spodding in cold conditions, without inhibiting movement. The fleece arms, side panel and hood are constructed from a heavy-knit fleece material. This not only makes the Hybrid Jacket extremely comfortable and warm but also creates the flexibility needed when moving around. The puffer-style mid-section will not only keep your core warm but is also incredibly comfortable to wear and won't restrict your movement, thanks to the hi-tech materials used to make it. The light padding

KOOL QUICK DRY LS ZIP NECK

The KAMO Kool Quick-Dry Long Sleeve Zip Neck features an all over exclusive custom KAMO camouflage print unique to Korda. ALL PROFITS FROM THIS PRODUCT GO TO LENNOX CHILDRENS CANCER FUND. This is the perfect choice during the warmer months, as not only is it very comfortable to wear, but it is ultra-breathable and still allows ease of movement. It is also designed to dry very quickly, so if you do get caught out by a shower, you won't be left sitting around in wet clothes for hours. It is designed to fit quite close to your body and has been shaped for a perfect fit, whilst still not hampering casting or other movement. A zip gives it a looser fit around the neck when you want it and also allows even more air flow. The long sleeve of the Kool Quick-Dry is also great for keeping the sun off of your skin and protecting yourself – it was designed after Korda boss Danny Fairbrass was diagnosed with skin cancer himself. Sizes from: Small to 3XL

KORE TK HOODIE LIGHT KAMO

The new Light KAMO Team Korda Hoodie now features an all over exclusive custom camouflage print unique to Korda. When we launched the classic TK Hoodies (previously available in Black, Olive and Charcoal) they were completely re-modelled to improve fit, functionality and styling. The resulting garment is what we call ‘action fit’. Our Team Korda Hoodies have a raglan shoulder and stretchy underarm panel allowing freedom of movement, while retaining the tailored fit. In short, the TK Hoodies are super-comfy, and have been made to both look and feel good. The TK Light KAMO Hoodie has been cut from 320gsm fleece jersey material, which offers a rich, cosy feel against the skin too. Other features include a snug crossover fronted hood, neat drawcord loops (so they don’t dangle on the fish when you’re doing photos!), thumb inserts as well as secure gadget compartments in the kangaroo pocket (one for the phone and one for the receiver).
Sizes: Small – XXXL

KORE JOGGERS LIGHT KAMO

The new Light KAMO Joggers feature an all over exclusive custom camouflage print unique to Korda. These fitted joggers have combat style detailing and a brushed-fleece finish, purposely designed for fishing, they allow you to have your essentials in your pockets at all times. The KAMO Joggers are made from a 60/40 blend of cotton and polyester, which won’t absorb moisture, keeping you cool when the temperature rises. The zipped pockets have been configured to offer the best storage options for carp angling, stopping the annoyance of receivers and phones falling out, plus there is additional storage space in the two Velcro fastened pockets on the outside of each leg, plus a single pocket at the rear. An elasticated, drawcord waist holds them securely in place, with elasticated ankle cuffs to prevent them from riding up.
Sizes: Small – XXXL

LE TK HOODIE DARK KAMO

This is based on a classic hoodie design but has been tweaked to make it even more functional for fishing. It fits close enough to your body to provide plenty of warmth and help prevent draughts, but the raglan shoulders and stretchy underarm panels give it an ‘action fit’ so that your movement isn’t inhibited whilst wearing it. It is made from 320gsm fleece jersey material, so feels very cosy against your skin. The hood has a snug, crossover fit, to help keep out the cold and keep your neck warm, and it can be adjusted via two drawcord loops at the front – designed so that they are easy to adjust but won’t dangle down when you’re photographing a fish! The sleeves have thumb holes, so that you can pull them down over the back of your hands in really cold conditions. The large ‘kangaroo pouch’ pocket on. The front also features two internal upright pockets to securely store items such as your phone, car keys or sounder box. It comes in a choice of colours – black, charcoal, light kamo, dark kamo, and dark olive – and in sizes from small to XXXL.

LE LIGHTWEIGHT HOODIE LIGHT KAMO

The KAMO Lightweight Hoodie features an all over exclusive custom KAMO camouflage print unique to Korda. This is the perfect choice for the summer months when you need an extra layer in the evenings/ mornings/cooler days, but a standard hoodie is far too warm to be comfortable. It is made from a mixture of cotton/polyester/spandex which allow it to be fairly snug fitting and tailored to the shape of a typical upper body, whilst at the same time allowing complete freedom of movement, which is essential when casting, etc. The cuffs and neck are loose-fitting, to allow plenty of air flow, and the hood can be adjusted via a drawcord. Sizes from: Small to 3XL

KCL228	Kore Olive Zip Hoodie XXXL

KORE FLEECE GILET OLIVE

This fleece gilet is designed to keep your body warm, whether it is worn over the top of a lighter garment during the summer, or as an underlayer during the colder months. It is made from warm brushed fleece with an anti-pilling finish, to keep it looking great even after constant use. It features a full length zip as well as a collar to keep your neck snug. There is a pocket on each side which can be used for storage or keeping your hands warm, as well as a zipped breast pocket for storing valuables. It is olive in colour and comes in sizes from small to XXXL.

KORE ZIP PRO HOODIE OLIVE

This heavy duty, zipped hoodie is ideal for use during the colder months as it is made from a double knit interlocking fabric designed to keep the warmth in, and the cold and wind out. It is made from a blend of 75% cotton and 25% polyester, and its construction makes it very comfortable to wear, as well as looking the part as well, featuring a Korda 'glasses' logo on the breast. Ribbed cuffs keep the sleeves in place around your wrists and help prevent draughts, and the hood is kept securely in place on your head via drawcords. A zipped pocket on the front is ideal for storing your valuables. Available in olive colour and in sizes from small to XXXL.

TIE DYE TEE DARK OLIVE

Now for something completely different! Following on from the unique but extremely popular Koi Tee. It's time for the Tie Dye Tee to enter the fray. Our Tie Dye Tee is probably the most 'summery' tee we have ever launched. Crafted from premium quality fabric, this tee boasts a soft and velvety texture making it the ideal choice for those hot summer days. The classic tie dye design gives this tee a funky and vibrant look that is sure to turn heads on the bank. For those looking for something a bit different, this tee is the perfect choice. It's a unique piece that will add a touch of individuality to your bankside attire. Not only does the Tie Dye Tee look great, but it's also built to last. With the ability to withstand frequent washes, you can wear it again and again without worrying about it losing its colour or shape. Available in two, two-tone colours, dark olive/black and slate grey/black, with sizes ranging from small to XXXL, you'll be sure to find the perfect fit for you. Overall, our Tie Dye Tee is the ultimate summer fishing tee, offering a combination of comfort, style, and durability that you won't find anywhere else.

NEW 2023

BIRDSNEST TEE DARK OLIVE

The Birdsnest Tee is one of the newest additions to the Korda clothing stable. Crafted with a unique 'peach skin' finish, this t-shirt boasts a soft and velvety texture, making it incredibly comfortable to wear. Whether you're heading down to the lake or just lounging at home this tee is perfect for use in the summer months or as part of a layering system on colder days. Featuring a large 'birds nest' Korda logo on the back, giving a gentle nod to re-cycling any discarded line, this tee is both stylish and distinctive. The tee comes in a range of colours including black, navy, dark olive and burgundy, so you can choose the one that best suits your style.

Made with high-quality materials, this t-shirt is durable and long-lasting. It can withstand frequent washing and retain its soft texture and shape. DF likes our t-shirts to be multi-purpose, so whether you're gearing up for your next session or wearing with jeans when you're out and about, this tee is made to be versatile and suitable for any occasions.

With sizes ranging from small to XXXL, there is a Birdsnest Tee for everyone.

LE KAMO PRO TEE CHARCOAL

The KAMO Pro Tee (CHARCOAL) features a all over tactical looking black/charcoal KAMO camouflage print unique to Korda. The type of ultra-breathable, lightweight material that is used to make this particular T-shirt is very popular with anglers in hotter countries. It is a fairly snug fit and shaped to your body, but still allows ease of movement, and the breathable material reduces sweating and keeps you cool. Should you get caught out in a shower, the material dries very quickly. Not only is it very comfortable to wear, but it is also stylish and has been designed specifically for fishing. Sizes from: Small to 3XL

CODE	DISCRIPTION
KCL558	LE Kamo Pro Tee Charcoal S
KCL559	LE Kamo Pro Tee Charcoal M
KCL560	LE Kamo Pro Tee Charcoal L
KCL561	LE Kamo Pro Tee Charcoal XL

KCL563	LE Kamo Pro Tee Charcoal XXXL

LE KAMO PRO TEE OLIVE

This is an incredibly lightweight, ultra-breathable t-shirt which is perfect to be worn during hot weather, as it will help to keep you cool. The material also dries very quickly, should you get caught out in the rain, or even fall in the lake! The Pro T-shirt is fairly close fitting and designed to hug the contours of your body, but also helps reduce sweating. It features our monochrome Kamo pattern, so that you will blend into your surroundings. Available in charcoal or olive green, in sizes from small to XXL.

CODE	DISCRIPTION
KCL732	LE Kamo Pro Tee Olive M

LE LOYAL TEE

This T-shirt has a 'peach skin' finish that gives it a soft, velvety texture and feels really nice against your skin. It is breathable, so is great for use in the summer or as one of several layers during colder weather. CUT TEE BLACK

Since DF wore the Cut Tee on the Underwater Test Tapes the buzz for this version has been immense. Predominantly black in colour with a 'peach skin' finish that gives it a soft, velvety texture that feels extremely comfortable against your skin. Great for use in the summer or as one of several layers during colder weather.

The Cut Tee features 'cut & sew' dark kamo segments at the top of each sleeve and down the sides of the shirt. The signature dark kamo pattern is featured on several garments in our range, including hoodies, t-shirts and joggers. A white Korda logo on the chest contrasts well on the jet-black main body of the tee. The result is a unique, stylish tee which you could wear anywhere.

It comes in black only and sizes from small to XXXL.

Key Features:

- Peach skin finish
- Soft, velvety texture
- Cut-out kamo panels

NEW 2023

LOGO PATCH CAP DARK KAMO

This stylish cap is the perfect option for year-round use. The front of the cap features a Korda logo-patch and our signature dark kamo, with a traditional curved peak which is great for keeping sun and glare out of your eyes when fish spotting.

The rear section is constructed from soft, black mesh to increase breathability in the warmer months. One size fits all and it can be adjusted via a Velcro fastener at the back for the perfect fit.

Key Features:

- Traditional curved peak
- Rear mesh for ventilation
- Velcro fastener
- Dark Kamo pattern

KOOL WATERPROOF CAP BURGUNDY

Being able to keep your head dry whilst you're fishing helps ensure that you stay comfortable, so we came up with the Kool Waterproof Cap. It retains the advantage of a normal cap, in that the peak helps to keep the sun out of your eyes, which is useful when fish spotting or casting, and it fits snugly on your head so wont easily fall or be blown off.

But unlike a normal cap, it is made from a lightweight, water-repellent material which ensures that your head stays dry – plus if you are out in the rain, the peak will keep it out of your eyes or away from your polaroid glasses. The material is rip-stop, so if you do brush against brambles or similar whilst wearing it, then it isn't easily damaged. One size fits all and it comes in a choice of olive green or burgundy.

IMPORTANT: We are donating 50% of all profits from this item (and anything else in the KOOL range) to the Lennox Children's Cancer Fund.

TRAWLER BEANIE OLIVE, BLACK, BURGUNDY & MUSTARD

This ribbed knit, retro style beanie hat will certainly keep your head warm during the colder months. Inspired by the traditional 'trawler' beanie hats which have a close fit and shallow cuff, which removes any excess space at the top of the hat.

The beanie is designed to sit on the ears, not pulled down over them like bobble hats and other beanie style hats. It's close fitting, without being tight, to ensure that it helps to retain your body heat. The Trawler Beanie has a very soft feel, making it very comfortable to wear, as well as looking extremely stylish, whether on the bank or for every-day use.

It has a square patch on the front with an embossed Korda 'glasses' logo. One size fits all and it is available in black, olive, mustard or burgundy colours.

WATERPROOF FLEECE BOONIES - Burgundy - Olive Green

The Fleece Waterproof Boonie Hat is the perfect choice when the weather can be unpredictable, and is great for keeping your head dry and warm and stopping rain dripping down your neck or getting in your eyes (or on your glasses). It is made from a waterproof cotton material and the brim helps keep water off of your face and prevents it from going down your collar – really useful when you are out in the rain trying to get your rods out or walking around the lake looking for fish. This version is also fleece lined and so is perfect for use during the colder months, ensuring that your head stays warm whilst also being very comfortable to wear.

An internal elastic adjustment means that it can be fitted to your head as tightly or loosely as you choose. It also comes in very useful at times of the year when the weather is changeable, as the brim does just as good a job of keeping the sun out of your eyes. It comes in a choice of olive green or a limited edition burgundy version.

KORE CHINO SHORTS OLIVE

These stylish Chino Shorts have been specifically designed for fishing, but also wouldn't look out of place if being worn casually down the pub! They have a casual fit and the twill fabric – 95% cotton and 5% Spandex – is stretchy enough to make them very comfortable to wear. The fabric has been enzyme-washed – a more environmentally friendly version of stone-washing – to give them a fashionable faded appearance. There is plenty of storage space in the two side pockets and two rear welt pockets. IMPORTANT: We are donating 50% of all profits from this item (and anything else in the KOOL range) to the Lennox Children's Cancer Fund.

KORE QUICK DRY SHORTS OLIVE

The Quick Dry Shorts are perfect for fishing during the warmer months as they have been designed for use in the water, much like a pair of swimming shorts. When temperatures soar and you don't want to be sweating in waders, these are the perfect option for walking out into the water to cast out, bait up, or play fish. The Quick Dry Shorts are comfortable to wear and ready for if and when you do want to go in the water in them. They have a shorter fit and are made from a soft-touch 100% polyester microfibre. A mesh inner layer means that they can be worn without underwear, which allows them to dry quickly in the sun. They feature an elasticated waistband, with a push-stud fastener and zipped fly, and a draw cord allows them to be fastened more securely when you do choose to go in the water. There is storage space via two zipped side pockets and one rear pocket – all of which are designed to drain quickly and help speed up the drying process - as well as a small internal pocket.

ULTRALITE JOGGERS BLACK

Our Ultralite Joggers are designed to be extremely comfortable and stylish whilst you're on the bank. These joggers combine several key features to make them as practical as possible. First and foremost, they are constructed using an incredibly lightweight stretch fabric. This material offers exceptional flexibility and unrestricted movement. Whether you're baiting up, climbing trees or simply going about your usual routine, these joggers will not restrict you in any way. Designed to be very loose fitting, they are specifically engineered to keep you cool, even in the most intense conditions. The lightweight, baggy nature of the joggers, allows for increased airflow, promoting ventilation and preventing overheating. For increased functionality whilst on the bank, they are equipped with zipped front pockets and an elasticated and drawcord waist to accommodate various body shapes and sizes. Available in two colours, olive and black and in sizes small to XXXL.

KORE ORIGINAL KOMBATS
MILITARY OLIVE

These combat-style trousers have been designed so that they are perfect for anglers. Our own design team re-modelled this classic military design, and opted for a 150gsm ripstop fabric, which is not only lightweight and extremely durable, but also dries very quickly should you get caught out in rain, or even fall in the lake! They are the perfect choice during the warmer months of the year, as this material also wicks moisture away from your skin and they are impregnated with mosquito repellent. They are secured via a button and a zip fly, plus have buckles on either side so that they can be adjusted for the perfect fit – there are also belt loops should you wish to wear one. You won't be lacking for pockets either as there are nine in total, with two on each side – one zipped and the other open – plus a large Velcro fastened one on the side of each leg and at the rear, plus pockets within pockets to help you store everything so that you can easily find it but it won't accidentally fall out. They are available in a choice of Military Olive or Dark Kamo colours, and in size from small to XXXL.

POLAR SALOPETTES

The Korda Polar Salopettes have been created with meticulous attention to detail. Designed to keep you warm, dry and comfortable in the harshest of conditions. They are constructed from a water-repellent shell fabric that provides unparalleled protection against the harshest of conditions; say goodbye to those cold winter mornings. The material is quick drying, ensuring you stay cozy and dry even when faced with unexpected rain showers. Keeping you warm is a heavy polar fleece lining that provides excellent insulation without adding unnecessary bulk. To help you achieve the perfect fit, the adjustable shoulder straps, ensure that your salopettes stay in place throughout your daily bankside routine. Whilst the adjustable leg openings make it easy to take them off or put them on, whether you're wearing boots or trainers. Equipped with zipped chest and side pockets, offering convenient storage options for your essentials and help keep everything you need within easy reach. We've also reinforced these salopettes with triple stitching on the seams and gone the extra mile to ensure they withstand the rigors of bank-life by reinforcing the stress-points to ensure longevity and reliability.

NEW 2022

SUNGLASSES CLASSICS 0.75

Polarising sunglasses are perhaps the most important item of tackle that you can own, as they cut down glare to allow you to see your quarry as they move around below the surface. The Classics, as you would expect, are a traditional design which has stood the tests of time and is still regarded as being fashionable, as well as being very functional with large lens and very comfortable to wear. They feature a stylish tortoiseshell frame and with our 0.75 brown lenses – these are a slightly thinner lens than is found on the original Classics and is reflected in the lower price. These glasses offer great performance but at a very affordable price. They come supplied in a drawstring bag which also doubles up as a cleaning cloth for the lenses.

SUNGLASSES POLARISED WRAPS

A less expensive version of the original 4th Dimension Eyewear, these sunglasses are designed to eliminate surface glare with a low price tag. This drastic reduction in brightness enables the angler, when looking from above, to help see beneath the surface layers and into that 4th Dimension where our quarry live.

SUNGLASSES

NEW 2022

THE RONNIE BLACK

Polarising sunglasses are perhaps the most important item of tackle that you can own, as they cut down glare to allow you to see your quarry as they move around below the surface. The Ronnies, have taken the visual aspect a little further by reducing the size of the frame at the bottom of the lens to maximise vision when looking down. As with all Korda sunglasses they must still look good as well as being very functional and comfortable to wear and these Ronnies tick all the boxes. The arms are constructed from wood, giving them a premium look and feel, whilst increasing strength and sustainability. To finish them off a subtle Korda logo is printed on the end of the arms.

NEW 2022

THE RONNIE BROWN

There are 2 versions available – matt tortoiseshell with brown lenses, which is a good all-rounder and matt black with grey lens, which are great in bright conditions. Come supplied in a micro-fibre cloth case which doubles as a cleaning cloth.

Key Features:

- Polarised
- Reduced rim for greater visibility
- Wooden arms
- Two versions available

Basix has been designed to cater for carp anglers on a budget, with the emphasis being on providing high quality products, which will catch fish, but at a price that anyone can afford.

BASIX WIDE GAPE

The BASIX Wide Gape hook has been designed as the perfect all-round pattern, which can be used straight out of the packet for a wide variety of rigs and without the need to add lots of other components – whether you are fishing bottom baits, pop-ups or wafers. The aggressive in-turned eye helps to ensure that it flips over and takes hold in the mouth, without the need to add additional Kickers or shrink tube.

It is made from our ‘X’ gauge wire, so is suitable for use both in the UK and overseas, due to its strength, it also has an unobtrusive black nickel finish. The point has been designed to be long-lasting and it is possible to catch multiple fish on the same hook before it needs changing – every time you cast out though, do check it is still sharp and change it if not. The shape is based upon the incredibly effective original Wide Gape, which has been responsible for catching countless big carp over the years.

BASIX Wide Gape Hooks are available in Barbed and Barbless versions in sizes from 2, 4, 6 and 8. Each packet contains ten hooks.

KBX007	BASIX Wide Gape #8 Barbless

BASIX HAIR RIGS WIDE GAPE

The BASIX Ready Tied Hair Rigs are ready to use straight out of the packet, all you need to do is add either a bottom bait or wafter, and you’re good to go! These rigs are tied using the camo green coloured BASIX Coated Hooklink material, with a small section stripped back by the BASIX Wide Gape hook to allow movement and increase hooking potential. They have a supple hair with a piece of silicone to hold it in place on the shank and help prevent tangles, and the length of that hair has been optimised for hookbait sizes that suit the size of hook you have selected. The size 8 is designed for 12mm hookbaits, size 6 for a 15mm and size 4 for a 18mm.

Each rig is supplied with several Hair Stops and different sized Extenda Stops, to allow you to alter the length of the hair and use different sized baits to those which the rig has been designed for. At the other end of the BASIX Hair Rigs there is a loop and a BASIX Anti Tangle Sleeve to enable it to be quickly and easily attached to a BASIX Lead Clip Leader or BASIX Lead Clip Action Pack set-up (which includes QC swivels).

Supplied in packs of 2 - Available in hook sizes 4, 6 and 8 in both barbed and barbless.

BASIX MAIN LINE

The BASIX Main Line is a brilliant all-round line that offers fantastic value for money, with a very high level of performance. It is very abrasion resistant and tough, but also casts very well and has good knot strength. It has a relatively low level of stretch, which helps when it comes to feeling the lead down. This line is ‘camo green’ in colour, which means that it blends in very well with any lake bed. BASIX Main Line comes in a choice of 12lb or 15lb breaking strains, which will cover most carp fishing situations, and it comes supplied on either 500m or 1,000m spools – so that if you have smaller capacity reels, or only use two, then there is no need to buy a larger spool than you actually need to fill them.

CODE	DISCRIPTION
KBX008	BASIX Main Line 12lb/0.35 mm - 500 m
KBX008	BASIX Main Line 15lb/0.40 mm - 500 m
KBX044	BASIX Main Line 12lb/0.35 mm - 1000 m
KBX045	BASIX Main Line 15lb/0.40 mm - 1000 m

BASIX SPOD/MARKER BRAID 200M

The Basix Spod/Marker Braid can be used for either feature finding or baiting up with a spod/Spomb. This buoyant braid is perfect for use on your marker rod, as it has zero stretch and so allows you to better feel your lead across the lake bed and to determine what features are present in front of you. Its low diameter compared to the breaking strain of 30lb makes it very easy to cast, and long distances can be achieved with minimal effort. Due to the breaking strain, you can use it without the need for a shockleader, which makes it a lot more user-friendly and easier to fish with. Basix Spod/Marker Braid is made from a tightly woven braid and with a silky smooth feel to it, which also aids casting distance. It is an unobtrusive Camo Green colour and comes supplied on 200m spools, meaning that it is best used with some backing – the size of this spool ensures that you aren’t filling your reel with hundreds of metres of expensive braid that will never see the light of day!

CODE	DISCRIPTION
KBX043	Basix Spod/Marker Braid 200m

BASIX LEAD CLIP LEADERS

The BASIX Lead Clip Leaders are constructed from a woven, lead-free material which takes on water very well, ensuring that it not only sinks quickly, but due to its suppleness, also follows the contours of the lake bed. It is a camo green colour which blends in well to help keep it disguised. The leader comes complete with a lead clip and tail rubber, also in camo green, along with a size 8 QC swivel attached to one end. Perfect to use in conjunction with the BASIX Ready Tied Hair Rigs, you can simply clip on your rig, add a lead, and you are ready to go!

BASIX Lead Clip Leaders are 50cm long and there is a spliced loop at the other end to make it easy to attach to your main line. Available in packs of 2.

CODE	DISCRIPTION
KBX020	BASIX Lead Clip Leaders

BASIX LEAD CLIP ACTION PACK

The lead clip system combined with tubing is a very effective and tangle-free way to fish for carp in a variety of situations, and the BASIX Lead Clip Action Pack provides you with all the components that you need to construct five of these set-ups.

Everything in this kit is camo green in colour to blend in well with the lake bed, and it includes two metres of sinking rig tube; five lead clips; five tail rubbers; and five QC swivels. Once you've put it together, all you need to do is clip on a rig – such as the BASIX Ready Tied Hair Rig – and add a lead, and you're ready to cast out.

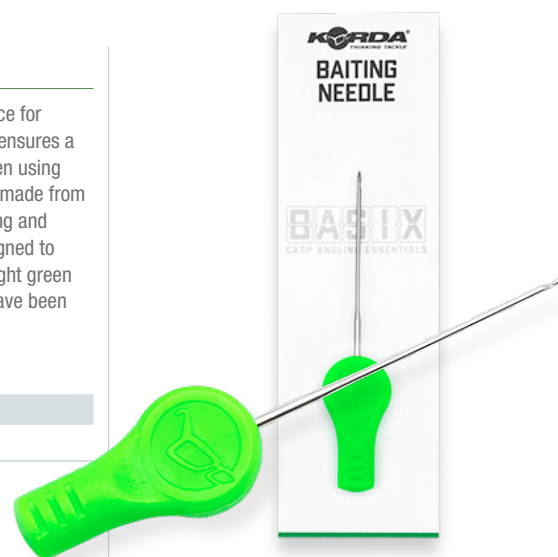

CODE	DISCRIPTION
KBX021	BASIX Lead Clip Action Pack

BASIX RIG SCISSORS

The BASIX Rig Scissors are the perfect choice for anglers, as the serrated area on the blades ensures a clean cut, which is especially important when using braided hook link materials. The blades are made from stainless steel to ensure they are long-lasting and won't rust. The ergonomic handles are designed to fit your fingers comfortably and they are bright green in colour to make them easy to find. They have been designed to fit in the BASIX Tackle Box.

CODE	DISCRIPTION
KBX022	BASIX Rig Scissors

BASIX BAITING NEEDLE

The Basix Baiting Needle can be used with most baits, as it is sharp and strong, meaning that it can be pushed through most harder baits without fear of splitting them. The 'crook' on the end has been designed to hold your hair in place whilst the bait is threaded onto it, off of the needle, but without danger of it fraying braided materials or causing them to separate, which can make it hard to insert a hair stop. The bright green handle has been ergonomically designed, and should you drop it on the ground makes it easier to find. The chrome plated needle has been designed to last and won't rust.

CODE	DISCRIPTION
KBX023	BASIX Baiting Needle

BASIX ANTI TANGLE SLEEVES

These soft, tapered rubber, anti tangle sleeves not only help to prevent tangles, but are also designed to be used in conjunction with the QC swivels. They can easily be slid into place once you have clipped on your rig to ensure that the connection stays secure and is covered. The BASIX Anti Tangle Sleeves are camo green in colour and come in packs of ten.

CODE	DISCRIPTION
KBX025	Basix Anti Tangle Sleeves

BASIX COATED HOOKLINK

The BASIX Coated Hooklink is a soft, supple coated braid material that lends itself to all sorts of different presentations for bottom baits, wafers and pop-ups. Both the inner braid and outer coating are a subtle 'camo green' colour to help ensure that it will blend in with whatever type of lakebed you are fishing over. It will lay straight without the need for steaming and has great anti-tangle properties, plus the coating can easily be stripped back where required to create a hinge and give your rigs extra movement. It knots very well without breaking the outer coating, and good strength can be achieved with any conventional fishing knot. The BASIX Coated Hooklink comes in a choice of 18lb or 25lb breaking strains, and is supplied on 10m, which should be plenty enough to last you for a long time and to tie lots of rigs!

CODE	DISCRIPTION
KBX010	BASIX Coated Hooklink 18lb 10 m
KBX011	BASIX Coated Hooklink 25lb 10 m

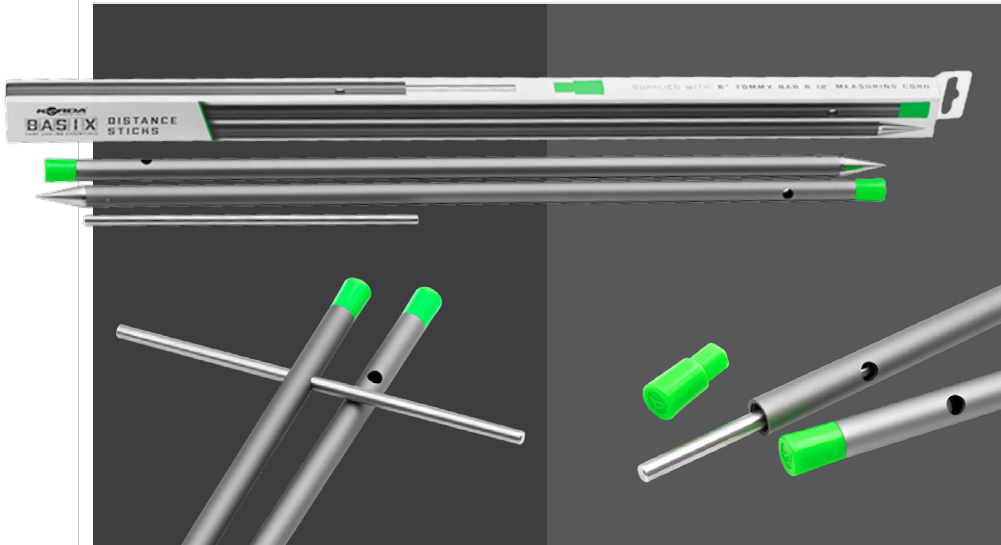

BASIX BRAIDED HOOKLINK

This is the perfect hook link choice for fishing in solid PVA bags, or any other presentation where you don't have to worry about tangles, such as the Method. The BASIX Braided Hooklink material is very supple, yet also strong and abrasion resistant, and it knots very well with any conventional fishing knot. It is 'camo green' in colour and will blend in well with whatever lake bed you are fishing over.

Available in a choice of 18lb or 25lb breaking strains, and it is supplied on 10m spools, which will provide you with enough rigs to keep you going for a long time.

CODE	DISCRIPTION
KBX012	BASIX Braided Hooklink 18lb 10 m
KBX013	BASIX Braided Hooklink 25lb 10 m

BASIX DISTANCE STICK

The BASIX Distance Sticks have designed to allow you to 'clip-up' at the required distance as easily and accurately as possible, ensuring that you can recast to the same spot repeatedly with your fishing rods and spod. Keeping a record of your spots will also mean that you are able to fish them again on future sessions, should you find ones that are productive.

BASIX Distance Sticks have a stainless-steel point to allow them to easily be pushed or screwed into the ground, and includes a green cord of exactly 12ft in length so that they can easily be set the same distance apart each time. A T-bar is supplied to ensure they go into almost any ground with ease. The BASIX Distance Sticks are made from a stylish grey anodised aluminium with bright green end caps on the top for increased visibility – especially in low light or when using them with a headtorch at night. The caps can be unscrewed so that the T-bar can be stored inside, to ensure it isn't lost when not in use.

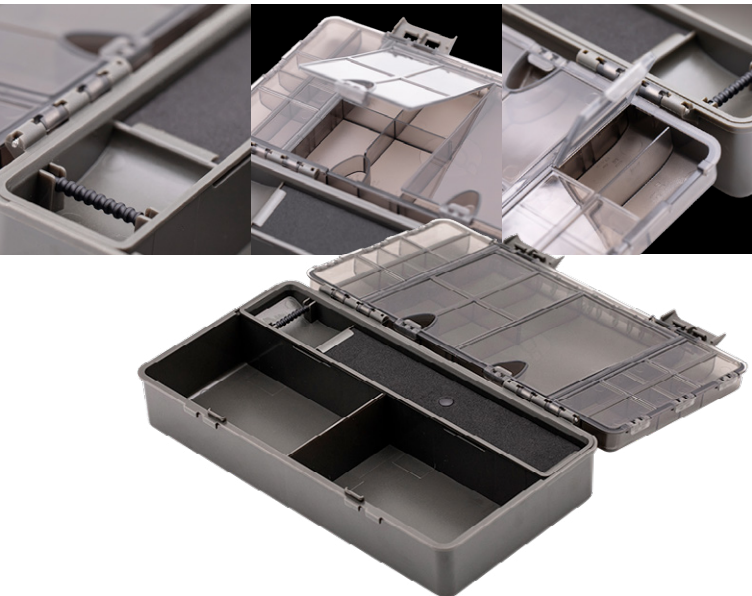

CODE	DISCRIPTION
KBX001	BASIX Distance Sticks

BASIX TACKLE BOX

The BASIX Tackle Box has been designed to offer plenty of storage space for all your rig bits, whilst making it easy to organise and find them when you need to. It is made from shockproof, high impact plastic, with a translucent lid to enable you to see inside. The lid features a ruler to enable you to accurately measure your rigs and is fastened via two latch closures to prevent any chance of it coming open during transit. Inside the lid of the BASIX Tackle Box are 21 small latched compartments of various sizes, which are perfect for storing items such as lead clips and swivels. Inside the box there are two large compartments, with fixed dividers, which are perfect for rig tools, hook link spools and the like. It also features a removeable rig tray, complete with pins, which can be used to store up to eight pre-tied rigs (such as the BASIX Ready Tied Hair Rigs), and under this is another long storage compartment.

CODE	DISCRIPTION
KBX024	BASIX Tackle Box

BASIX MINI STOW

This is a smaller version of the famous Stow bobbins, which were developed on the banks of Elstow Lake and have been used by many members of Team Korda for years. The principle behind this bobbin is that it can be fished with both tight and slack lines, and when you get a take, the line releases from the clip on the side of it. For that to happen the stainless steel ball chain which it is fitted to needs to be the same length as your bite alarm, and a detachable connector system allows you to easily adjust it so that it is compatible with any buzzer (it comes set at the correct length for use with something like a Delkim, or similar sized alarm). It comes fitted with a stainless steel weight, but the 6g and 8g Overweights, which are sold separately as part of the Stow range, can also be used with it. The Basix Mini Stow can be fitted with a Mini Isotope (available in seven different colours), and is fitted below your bite alarm using a moulded hockey stick, which the ball chain screws into. It is available in a choice of red, green or blue.

CODE	DISCRIPTION
KBX029	Basix Mini Stow Green
KBX030	Basix Mini Stow Red
KBX031	Basix Mini Stow Blue

BASIX CARP CRADLE

The BASIX Carp Cradle has been designed to offer the maximum protection to your catch when it is on the bank, whilst at the same time being practical to use and carry. It is made from 50mm padded foam to provide plenty of cushioning, with a waterproof outer layer that is designed to be fish-friendly when wet and won't remove the fish's protective slime. The padded walls help ensure that your catch stays safe and within its confines. When not in use the BASIX Carp Cradle folds in two, and there is space to store a Carp Care Kit and Basix Weigh Sling inside. The carry handles can also be used to peg it down once you're in a swim to prevent any risk of it blowing away.

The BASIX Carp Cradle is suitable for carp up to 40lb/18kg.
The BASIX Carp Cradle XL is suitable for carp up to 60lb/27kg.

CODE	DISCRIPTION
KBX028	BASIX Carp Cradle
KBX041	Basix Carp Cradle XL NEW 2024

BASIX RANGE

BASIX WEIGH SLING

“The BASIX Weigh Sling (along with the Basix Cradle) is perfect for youngsters; anglers new to the sport; those on a limited budget; occasional anglers; and anyone who simply doesn't want to spend a lot of money, to ensure fish safely is prioritised but not compromised.

NOTE: The BASIX Weigh Sling MUST NOT be used as a retainer.

This is a traditional weigh sling, but with some additional features, which has been designed to allow you to safely transfer fish from the water to your unhooking mat, and vice versa, and to weigh them – it isn't a retainer and can't be safely used for that purpose. This weigh sling is constructed from a durable nylon material and is long and deep enough to weigh any carp that you are likely to catch in the UK, and is also suitable for use overseas on many venues. It features strong, lightweight powder-coated two-piece metal bars at the top, to give rigidity and to help make the weighing process safer for the fish. When not in use these bars can easily be split in the middle – they are elasticated - and the sling folded back into the compact stink bag that is supplied with it (the folded length allows it to fit inside the Basix Cradle unhooking mat or inside an exterior pocket on a Compac Rod Holdall). A strong webbing strap is attached to the bars on each side and give good balance once they are attached to the hook on your scales, allowing the fish to be weighed safely. It features plenty of large drainage holes along the bottom, so once the fish is transferred into it in the margins, in your rolled up landing net, the water will quickly drain out when you lift it out and carry it to your unhooking mat. A good quality, free-running zip at each end of the sling ensures that the fish can't slide out during transit or weighing, and is easy to do up or undo. The sling has been designed to float, so as to enable the easy transfer of the fish and rolled up net into it in the water – this ensures no lifting of the net is required, thus reducing the risks of splitting or damaging the fins and tail. The box that the Basix Weigh Sling is supplied in features a step-by-step guide on the best weighing practice.”
